CONTENTS

Preface	vii
Components of the electrode Potential. Concepts and Problems. S. Trasatti.	1
Potentials of Zero Charge. What they suggest about the structure of the interfacial region. S. Trasatti	25
Temperature Effects of Interfacial Properties. A. Fernando Silva	49
Electrochemistry on well-defined solid metal electrodes. R. Parsons	71
Trends in Experimental Electrochemistry on sp and sd metal single crystal electrodes. A. Hamelin	83
Structure of the Double Layer and Rates of ion crossings at 'single' immiscible Liquid/Liquid (L/L) Interfaces. J.D. Reid, O.R. Melroy, W.E. Bronner, H.C. Hughes, P. Vanysek and R.P. Buck	103
Electrical Double Layers at Interfaces between Colloidal Materials and Ionic Solutions. B.H. Bijsterbosch	187
Phase Transitions in Adsorbed Layers. C. Buess-Herman	205
Surface Science Model Studies of the Electrochemical Interface. E.M. Stuve, K. Bange and J.K. Sass.	255

Solvent Effects upon Electrochemical kinetics: Influences of Interfacial Solvation and Solvent Relaxation Dynamics. M.J. Weaver	281
UV-Visible Reflectance Spectroscopy in the Study of the Metal-Electrolyte Interface. D.M. Kolb	301
Molecular Structure and Orientation in the Electrode/ /Electrolyte Solution Interface - In Situ IR Spectroscopy. A. Bewick	331
Structure, Thermodynamics and Kinetics of Water at Interfaces. N.G. Parsonage	359
Models of the Electrical Double Layer: an Overview of the Present Situation. R. Parsons	373
Monolayer Models of Metal-Water Interphases and their use in the Interpretation of Differential Capacity Curves and of Organic Adsorption. R. Guidelli	387
The Capacity of the Metal/Liquid Electrolyte Interphase: Contribution of the Metal. W. Schmickler	453
Recent developments in the theory of electrified interfaces. D. Henderson	473
The semiconductor-electrolyte interface. L. M. Peter	523
List of Participants	547
List of Contributors	550
Subject Index	551
