Preface

Participants List

*Memorial Lecture: The Development of the Idea of a Crystal Dislocation F.R.N. Nabarro	3
---	---

I. ELASTIC THEORY

Boundary Problems for Dislocations T. Mura	17
The Effect of Boundaries of a Rectangular Elastic Plate on the Stress Field Surrounding a Dislocation R. Solecki	25
The Line Tension of $\langle 111 \rangle$ Screw Dislocation In Isotropic H.O. K. Kirchner	29
Mean Square Strains Caused by Dislocations H.O.K. Kirchner	33
Point Force Model of Dislocation-Defect Interactions C.S. Hartley	37
On Dislocation Patterning E.C. Aifantis	41

II. ATOMIC STRUCTURE

The Atomic Structure of Dislocations in H.C.P. Metals D.J. Bacon and M.H. Liang	51
The Core Structure of $a+c$ Dislocations and Their Behavior Under Applied Shear Stresses in a Model hcp Metal Y. Minonishi, S. Ishioka, M. Koiwa, and S. Morozumi	55
On the Atomic and Electronic Structures of Dislocations in BCC Transition Metals K. Masuda-Jindo	59
A Computer Simulation for a Dislocation in Rare Gas Solids Y. Kogure, T. Tsuchiya, and Y. Hiki	63
The Effects of Dislocation Core Structure on Plastic Flow of $L1_2$ Ordered Alloys D.P. Pope and V. Vitek	67
The Effect of External Stresses on the Dislocation Core and the Motion of Dislocations in $L1_2$ Ordered Alloys V. Paidar	73
Dislocation Dissociation and Dislocation Core Structures in F.C.C. -Based	

*Invited paper

Tetragonal Superstructures
 M. Yamaguchi, Y. Umakoshi, and T. Yamane 77

Core Structure Effects on the Motion of Superlattice Dislocations in the DO₃
 Type-Ordered Structure
 Y. Umakoshi, M. Yamaguchi, and T. Yamane 81

Computer Simulation of the Deformation of Iron Whiskers
 M. Doyama and R. Yamamoto 85

III. ELECTRONS AND PHONONS IN DISLOCATED CRYSTALS

*Influence of the Long-Ranged Topological Disorder on Waves in a Dislocated
 Solid
 K. Kawamura 91

*Dislocation Flutter in Zinc
 J.M. Galligan 97

Electron Propagation in Imperfect Crystals
 R.A. Brown 105

Gauge Theory of Dislocations and Gauge Potentials in the Interaction of Elec-
 trons/Phonons/Magnons with Dislocations
 H. Teichler 109

Deformation Potential, Gauge Field and Mass Fluctuation Associated with a
 Screw Dislocation in Polyvalent Metals
 K. Kawamura and H.-J. Huang 113

Transport in a Topologically Disordered Medium
 K. Kitahara, H. Araki, and K. Nakazato 117

Scattering and Bound States Due to the Potential Field in a Lattice with the
 Long-Ranged Topological Disorder of a Screw Dislocation
 Y. Zempo 121

Radiation from Arbitrarily Accelerating Dislocations in Anisotropic Solids
 X. Markenscoff and L. Ni 125

Logarithmic Temperature Dependence of the Dislocation Resistivity in Alumi-
 num Dilute Alloys
 T. Endo, K. Sasaki, and T. Kino 129

Localized Mode Due to a Vibrating Dislocation in Alkali Halide Crystal
 Y.H. Ohashi, K. Ohashi, and K. Haruna 133

Computer Simulation on the Vibrational States of Atoms Around Edge Dislo-
 cation in Copper
 R. Yamamoto, E. Okamoto, and M. Doyama 137

Phonon Scattering by Dislocation in LiF Crystal
 K. Ohashi, Y.H. Ohashi, and M. Fukuchi 141

Two Dimensional Angular Correlation of Positron Annihilation in Al and Cu
 Single Crystals Containing Edge Dislocations
 S. Tanigawa, K. Ito, S. Terakado, S. Fujii, and R. Suzuki 145

The Annihilation of Positrons at the Jogs on Dislocations in Pure Aluminium
 I. Kanazawa, T. Kurihara, Y. Sakurai, and H. Murakami 149

PAC Study of Dislocation by ¹⁸¹Hf Atom in Aluminium
 I. Kanazawa, Y. Sakurai, T. Kurihara, H. Murakami, and T. Iwashita 153

IV. FUNDAMENTAL PROCESSES IN DISLOCATION MOTION

*Quantum Tunneling of Dislocations Through Peierls Potential
 T. Suzuki and H. Koizumi 159

Tunneling of the Dislocations in LiH and KCl Single Crystals at Low Temperatures

T. Kataoka and T. Yamada	165
Tunneling of Dislocations in hcp ⁴ He H. Suzuki and Y. Nishioka	169
Motion of Dislocations in bcc ³ He I. Iwasa, E. Morita, and H. Suzuki	173
Deviation from Classical Rate Theory of Dislocation Motion in BCC Metals at Low Temperatures S. Takeuchi and T. Hashimoto	177
A New Approach to Rate Processes in Dislocation Motion S. Ishioka	181
Brownian Motion of a Dislocation in a Crystal Having High Peierls Barrier Y. Kawata and S. Ishioka	185
Diffusion of Dislocations Induced by Chaotic Motion M. Inoue and H. Fujisaka	189
Reinterpretation of the Frenkel-Kontrova Model T. Suzuki	193

V. DISLOCATIONS IN METALS: INTERACTION WITH POINT DEFECTS

Computer Simulation of Solid Solution Strengthening in F.C.C. Solid Solu- tions R.J. Arsenault and D.M. Esterling	199
Computer Simulation of the Interaction Between a Screw Dislocation and a Self-Interstitial Atom under Stress Y. Aono, T. Tsutsumi, and E. Kuramoto	203
Interaction Between Radiation-Induced Defects and Screw Dislocations Mov- ing in BCC Lattice Y. Aono, E. Kuramoto, H. Abe, and K. Kitajima	207
In-Situ Observation of Dislocation Interaction with Defects Produced by Ener- getic Heavy Ion Irradiations T. Muroga and S. Ishino	211
Solute-Atmosphere Dragging Stress of Dislocations in Al-Mg Alloys H. Yoshinaga, S. Goto, and H. Kurishita	215
Direct Observations of the Effect of Hydrogen on Dislocation Behavior in Iron T. Tabata and H.K. Birnbaum	219
Interstitial and Substitutional Solid Solution Hardening and Softening in BCC Metals ⁽⁺⁾ V.K. Sethi, R. Gibala, and T.E. Mitchell	223
Dislocation-Precipitate Interaction in Superalloys A.J. Huis in't Veld and J.Th.M. De Hosson	227
Mechanism of Climb of Shockley Dislocations in Quenched F.C.C. Alloys M. Condat and B. Décamps	231
Experimental Study of Climb of Shockley Dislocations in Quenched F.C.C. Alloys B. Décamps and M. Condat	235
Effects of Moving Traps on Hydrogen Transport by Dislocations K. Maruyama, M. Meshii, and H. Oikawa	239
The Role of Dislocation in Swelling Process of Electron Irradiated Stainless Steel N. Igata and Y. Kohno	243
Conversion Between Dislocations and Point Defects in Metal Crystals with Low Dislocation Density	

T. Kino, K. Mizuno, N. Kamigaki, Y. Deguchi, and K. Ono	247
Transmission Electron Microscopy of Suzuki Segregation in F.C.C. Alloys	
H. Saka	251
The Intrinsic Temperature Dependence of the Stacking-Fault Energy in Ag- and Cu-Base Alloys	
H. Saka, T. Kondo, and T. Imura	255
VI. DISLOCATIONS IN METALS: MOTION	
*Dislocation Dynamics in Solids: A Nuclear Magnetic Resonance and Transmis- sion Electron Microscopic Study	
J.Th.M. De Hosson	261
Pre-Yield Motion of Surface Dislocations in Highly Perfect Copper Crystals	
H. Kurishita and S. Kitajima	271
Dislocation Multiplication in Highly Perfect Copper Crystals	
S. Kitajima and H. Kurishita	275
TEM Video Observations on the Movement of Dislocations and Polygonization Boundaries in High-Purity Aluminium and the Correlation with Internal Friction Measurements	
L.D. Zhang (Zhang Lide) and T.S. Kê (Ge Tingsui)	279
Characteristics of Obstacles for Dislocation Movement in the Pre-Multiplica- tion Region in White Tin Single Crystals	
T. Hirokawa and M. Fujiwara	283
Direct Measurement of Mobility of Dislocations in High-Purity Molybdenum	
T. Imura, K. Noda, H. Matsui, H. Saka, and H. Kimura	287
Dislocation Properties in High Purity Molybdenum Single Crystals at Very Low Temperatures	
H. -J. Kaufmann, A. Luft, and D. Schulze	291
Dislocation Behavior in Crystals with Low Stacking Fault Energies	
H. Fujita, H. Mori, and H. Inui	295
Dislocation Motion in Slip Bands of Neutron-Irradiated Copper Crystals	
K. Shinohara and S. Kitajima	299
Observation of Dislocations in Copper and Its Dilute Alloy Single Crystals at the Early Stage of Deformation by X-Ray Topography	
K. Marukawa, Y. Sakaguchi, and S. Sato	303
Motion and Multiplication of Dislocations in Copper-Based Alloy Crystals Stud- ied by Etch Pit Method	
K. Marukawa and H. Tanaka	307
Discontinuous Flow in Cu-Ge Alloy Single Crystals Deformed at 77 and 4.2 K	
I. Yoshizawa	311
Cross-Slipping Processes in F.C.C. Metals	
G. Vanderschaeve, R. Martinez, and B. Escaig	315
Cross-Slip of Shockley Partial Dislocations via the Stair-Rod Mode	
G. Vanderschaeve and B. Escaig	319
Studies on the Dynamics of Dislocation Groups by Microcinematography of Slip Band Formation	
O.B. Arkan, H. Godon, H. Neuhäuser, and H. -H. Potthoff	323
Formation Mechanism of Dislocation Bands in Deformed Single Crystals of White Tin	
K. Ojima and T. Hirokawa	327
Dislocation Structures of β -CuZn Deformed Between 25 and 300°C	
H. Saka, Y.M. Zhu, M. Kawase, and T. Imura	331

VII. DISLOCATIONS IN SEMICONDUCTORS: ELECTRONIC STATES

*New Results on the Core of Dislocations in Silicon by EPR and TEM H. Alexander, H. Gottschalk, and C. Kisielowski-Kemmerich	337
*Calculations and Implications of the Electronic Spectra of Straight and Kinked Dislocations in Silicon and Diamond R. Jones	343
Study of Dislocation Level by a Simple Model of the Two-Dimensional Elec- tron K. Imura and K. Kawamura	349
Electron States at Dislocations in Semiconductors and Transition Metals H. Teichler, M. Gröhlich, and M.A. Oldfield	353
The Scattering of Tight-Binding Electrons Due to the Long-Ranged Topologi- cal Disorder Off a Screw Dislocation in Semiconductors Y. Zempo and K. Kawamura	357
Calculation of Kink Structures in Covalent Semiconductors K. Kojima and K. Masuda-Jindo	361
Defect States in Dislocated p-Type Silicon Crystals H. Ono and K. Sumino	365
Dislocation Electric Conductivity in the Absence of Impurity and Point-Defect Diffusion Towards Dislocations Yu. A. Ossipyan	369
Induced Currents in Si : IRBIC Contrast Dependence on Wavelength A. Cavallini, P. Gondi, and A. Castaldini	373
No Indication of Metallic Conduction along Dislocations in GaAs Y. Misawa, K. Maeda, and S. Takeuchi	377
On Dislocation Effect on the Carrier Density in Samarium Monosulfide B.I. Smirnov and A. V. Ryabov	381

VIII. DISLOCATIONS IN SEMICONDUCTORS: INTERACTION WITH POINT DEFECTS

Segregation Behavior of Oxygen Atoms on Dislocations in Silicon I. Yonenaga and K. Sumino	385
Locking of Dislocations by Impurity Oxygen in Silicon Crystals M. Sato and K. Sumino	391
Interaction of Hydrogen with Dislocations in Si V.V. Kveder and Yu.A. Ossipyan	395
Interaction of Dislocations with Nitrogen in Silicon Crystals H. Kamiyama and K. Sumino	399
Dislocation Loops Induced by Gold Diffusion in Silicon M. Yoshida, M. Morooka, Y. Sugita, T. Abe, and H. Harada	403
Characterization of Dislocation and Stacking Fault in Electron Irradiated Ger- manium M. Hirata, S. Takeda, and M. Kiritani	407
Shrinkage of Dislocation Loops by Emission and Absorption of Point Defects and Identification of Self-Diffusion Carriers in Metals and Semiconductors M. Kiritani and M. Hirata	411

IX. DISLOCATIONS IN SEMICONDUCTORS: MOTION

Some Unsolved Problems in Investigation of Dislocation Mobility in Semicon- ductors V.I. Nikitenko and B. Ya. Farber	417
An Estimation of the Effective Stress and Mobile Dislocation Density at the	

Yield Point of Silicon	
A. Oueddennaoua, J.P. Michel and A. George	421
A Unified View on the Peierls Mechanism in Covalent Crystals	
K. Maeda	425
Dynamic Behavior of Dislocations in GaAs Investigated by In Situ X-Ray Topography and High Voltage Electron Microscopy	
M. Sato, M. Takebe, and K. Sumino	429
Doping Effect and Radiation Enhanced Dislocation Glide in GaAs	
K. Maeda and S. Takeuchi	433
X-Ray Topographic Observation of Dislocation Behaviour near Growth Twin Boundary in the LEC-Grown InP Crystal	
S. Tohno, S. Shinoyama, and A. Katsui	437
Nonequilibrium Interaction Between Moving Dislocations and Electrons in Semiconductors	
Yu.A. Ossipyan and V.F. Petrenko	441
Photoplastic Effect in CuCl	
K. Nakano, K. Maeda, and S. Takeuchi	445
Optically Induced Drag of Dislocations and Photoplastic Effects in Anthracene Crystals	
K. Kojima	449
X. DISLOCATIONS IN IONIC CRYSTALS	
Choice of Slip System and Peierls Stresses in the NaCl Structure	
P. Haasen, C. Barthel, and T. Suzuki	455
Dislocation Cutting Processes in Ionic Crystals	
F. Apple and U. Messerschmidt	463
Photoplastic Effect in Additively Colored KCl at Low Temperatures	
T. Kataoka and T. Yamada	467
The Characteristic Interaction Between Moving Dislocation and the Photochem- ical Products of the F-Center	
T. Hagihara and T. Okada	471
An Evaluation of the Lifetime of the F ⁻ -Center Interacting with Dislocations by Means of the Photomechanical Analysis	
T. Hagihara, Y. Hayashiuchi, and T. Okada	475
Dislocation Motion in Alkali-Halides with CsCl Structure	
H. Koizumi and T. Suzuki	479
Debris, a Transformation of Dislocation Dipoles in Alkali Halides	
H.P. Strunk	483
Deformation-Induced ITC-Phenomena Detected in Alkali Halides	
M. Suszyńska and R. Capeletti	487
XI. DISLOCATIONS IN SPECIAL MATERIALS	
*Dislocations, Domain Walls, and Dynamic Solitons in Magnetics	
V.I. Nikitenko, L.M. Dedukh and V.K. Vlasko-Vlasov	493
Superlattice Dislocations and Magnetic Properties	
S. Takahashi	499
Cross-Slip Behaviour of Superlattice Dislocations in Ordered Ni ₃ Fe	
A. Korner and H.P. Karnthaler	503
The Movement of Dislocations in Ice	
R.W. Whitworth	507
Dynamical Dislocation Processes in Ice Crystal	

A. Higashi, A. Fukuda, T. Hondoh, K. Goto, and S. Amakai 511
 The Dislocation Mechanism of Sliding at the Serrated Large-Angle Grain
 Boundary in Ice
 T. Hondoh 516
 Imperfect Dislocations in the Laves Phase Structure
 Y. Kitano, M. Takata, and Y. Komura 521
 Dissociation, and Non-Dissociation of Dislocations in W_2C Deformed at
 High Temperatures
 T. Epicier, J. Dubois, C. Esnouf, and G. Fantozzi 525
 Dislocations and Defects in α -Quartz
 M.I. Heggie, R. Jones, and M. Nylén 529

XII. AMORPHOUS STRUCTURE

*Defects in Amorphous Materials
 D.R. Nelson 537
 Fluctuations in 2D Defect Melting
 S. Ami and H. Kleinert 543
 Geometrical Features of Amorphous Structures
 T. Ninomiya 547
 Dislocation Model of Two-Level Systems
 H. Suzuki 551
 Defects in Amorphous Materials
 J.C.M. Li 555
 Propagation of Somigliana Dislocations in Polymeric Glasses
 B. Escaig 559
 Electron-Irradiation Induced Amorphous Transition at Dislocations in Inter-
 metallic Compounds
 H. Mori and H. Fujita 563

XIII. INTERNAL FRICTION

Analytic Approximations for Vibrating Dislocations
 A. V. Granato and K. Lücke 569
 Thorough Testing of the Dislocation Resonance Theory by Simultaneous Measure-
 ments of Attenuation and Sound Velocity in the MHz Range
 H. Schmidt, D. Lenz, and K. Lücke 573
 Dislocation Resonance Investigation of Defect Annealing in Cu and Dilute Cu
 Alloys after γ -Irradiation and Deformation
 K. Tatsumi, H. Schmidt, D. Lenz, and K. Lücke 579
 Two-Level Tunneling System Like-Behavior of Dislocations in Aluminum Single Crystals at
 Low Temperatures
 A. Hikata and C. Elbaum 583
 New Expression of Dislocation Loop Length Distribution in Cu and in Cu-Ag
 Alloy as Obtained from Amplitude Dependent Internal Friction
 R.R. Hasiguti, M. Ozawa, T. Sasaki, and H. Yumoto 587
 Dislocation Contribution to the Low-Frequency Internal Friction Peaks in Poly-
 Crystalline, Macro-Crystalline and Single-Crystal High-Purity Aluminium
 T.S. Kê (Ge Tingsui) 591
 Dislocation Relaxation in Nb Studied by Elastic After-Effect
 S. Okuda, N. Kuramochi, T. Motoyama, T. Arai, and N. Matsumoto 595
 Dislocation Relaxation and Breakaway Phenomena in Nb
 N. Kuramochi, H. Mizubayashi, and S. Okuda 599

Study on Dislocation Pinning Due to Hydrogen in Ta T. Arai, H. Mizubayashi, and S. Okuda	603
The Solid-Liquid Transition and Crystal Dislocations Y. Hiki	607
XIV. FRACTURE	
Dislocation Interactions in Presence of Cracks, etc. R.M. Thomson, I.-H. Lin, S.M. Ohr, and S.-J. Chang	613
Dislocation Crack Interactions J.C.M. Li	617
Screening Effect of Edge Dislocations for a Mode I Crack N. Narita and J. Takamura	621
Inclined Dislocation Emission at a Shielded Crack Tip S.-J. Chang and S.M. Ohr	625
A Dislocation-Theory Explanation of Intergranular Corrosion and Intergranular Stress-Corrosion Cracking in Mild Steels W. Frank and L. Graf	631
XV. GRAIN BOUNDARIES	
Dislocations and Atomic Structure of Grain Boundaries V. Vitek and G.-J. Wang	637
Stress Field, Dilatation and Solute Saturation of a Ledged Edge Dislocation Wall Y.L. Tian and Y.T. Chou	643
Slip Propagation Across Grain Boundaries W.A.T. Clark and R.H. Wagoner	647
Dislocation-Grain Boundary Interactions in Body-Centered Cubic Metals ⁽⁺⁾ J.R. Fekete, J.E. Talia, and R. Gibala	651
Crossing of High Angle Symmetric Tilt Coincidence Boundaries by Disloca- tions in Silicon A. Jacques, E. Marlière, J.-P. Michel, and A. George	655
Creep Sub-Boundaries: Structure and Stress Fields M.A. Morris and J.L. Martin	659
Application of Neutron Double Bragg Reflections at Small Scattering Angle to Measurements of Mosaic Boundary Mobility M. Ono	663
Determination of the Burgers Vector of a Boundary Dislocation by Weak- Beam High Voltage Electron Microscopy Y. Ishida, K. Miyazawa, and M. Mori	667
Author Index	671
