TABLE OF CONTENTS

Preface IX

John D. Buckmaster
Reminiscences on the Life and Work of G.S.S. Ludford 1

Part I : INVITED LECTURES

Henri Berestycki, Bernard Larrouturou, and Louis Nirenberg
A Nonlinear Elliptic Problem Describing the Propagation of a Curved Premixed Flame 11

John D. Buckmaster
Mathematical Modeling in the Age of Computing : Is it redundant ? 29

John F. Clarke
Combustion and Compressibility in Gases 43

Paul Clavin
Cool Flame Propagation 65

Paul C. Fife
Modeling the Chemistry in Flames 77

Boris P. Gerasimov
Computer Simulation of 2D/3D Reacting Flows in Complicately Shaped Regions for Engineering 89

Guy Joulin
Radiative Transfer in Unsteady, Weakly Curved, Particle-Laden Flames 103

Marcel Lesieur, P. Comte, J.P. Chollet, and P. Le Roy
Numerical Simulation of Coherent Structures in Free Shear Flows 131

Amable Linan
Diffusion Flame Attachment and flame front propagation along mixing layers 151

Martine Marion and Roger Temam
Some Remarks on Turbulent Combustion from the Attractor Point of View 155

Norbert Peters
Grid Requirements Due to the Inner Structure of Premixed Hydrocarbon Flames 173

Thierry Poinsot and Sébastien M. Candel
Nonlinear Studies of Low-Frequency Combustion Instabilities 185

Andrei A. Samarskii
Nonlinear Effects of Blow Up and Localization Processes in Burning Problems 217

Bruno Scheurer
Remarks on the Stability Analysis of Reactive Flows 233

S. Sivasegaram and James H. Whitelaw
Experiments with Premixed Flames 243

Mitchell D. Smooke, A.A. Turnbull, R.E. Mitchell, and D.E. Keyes
Solution of Two-Dimensional Axisymmetric Laminar Diffusion Flames by Adaptive Boundary Value Methods 261

D. Scott Stewart
Shock Induced Thermal Explosion 301

Forman A. Williams
Influences of Detailed Chemistry on Asymptotic Approximations for Flame Structure 315

Part II : SHORTER PAPERS

John Anagnostopoulos and G. Bergeles
Numerical Study of Particle-Laden Jets: A Lagrangian Approach 345

Philippe Arques
Mathematical Modelisation of Enclosed Combustion at Constant or Variable Pressure by Vibe Law 355

E.M. Bahraoui, G. Brun, Denis Jeandel, and L. Fulachier
Experimental and Numerical Study of a Heated Turbulent Round Jet 365

Gérard Bayle-Labouré
Intérêt des Méthodes de Calculs en Combustion dans le Développement des Foyers de Turboréacteurs 375

Jerrold Bebernes and David Kassoy
Characterizing Self-Similar Blow-Up 383

F. Benkhaldoun, A. Dervieux, G. Fernandez, H. Guillard, Bernard Larrouturou
Some Finite-Element Investigations of Stiff Combustion Problems : Mesh Adaption and Implicit Time-Stepping 393

Henning Bockhorn
Modeling of Turbulent Diffusion Flames with Detailed Chemistry 411

Jean-Claude Boettner, Michel Cathonnet, P. Dagaut, and F. Gaillard
Kinetic Modelling of Light Hydrocarbons Combustion 421

Jean Denis Cartigny
Application de Méthodes Variationnelles à une Combustion Turbulente Prémélangée, Homogène et Stationnaire 431

Hugues Chaté
A Minimal Model for Turbulent Flame Fronts 441

Elias Diakoumakos, John Anagnostopoulos, and G. Bergeles
A Theoretical Study of Air-Solid Two-Phase Flows 449

J.W. Dold
Dynamic Transition of a Self-Igniting Region

Francis Dupoirieux and Denis Dutoya
Numerical Model for Turbulent Reactive Flows with Swirl 471

Dany Escudié
Experimental Analysis on the Stability of an Oblique Flame Front 481

Vincent Giovangigli and Nasser Darabiha
Vector Computers and Complex Chemistry Combustion 491

Alain-Yves Le Roux, G.S. Namah, and Dominique Ribereau
Numerical Model for Propellant Grain Burning Surface Recession 505

Paola Mannucci
Global Existence of Solutions for a Problem in Dynamics of Thermal Explosions 515

Jean Noël and Denis Jeandel
Eléments Finis Autoadaptatifs à Multimaillages pour le Calcul de Vitesses de Flamme 519

Roger Prud'homme et Françoise Baillot
Flammes minces et interfaces 529

François Rabié
Second Order Remeshing Method in 2D Lagrangian Fluid Dynamics 539

Bernd Rogg
On Numerical Analysis of Two-Dimensional, Axisymmetric, Laminar Jet Diffusion Flames 551

Charles D. Roten
An Algorithm for Allocation and Temperature, and its Consequences for the Chemistry of H_2-O_2 Combustion 561

Claudine Schmidt-Lainé
Existence and Stability in a Plane Premixed Flame Problem 569

P.L. Viollet, Danièle Garreton, and N. Mechitoua
Computation of Turbulent Diffusion and Premixed Flames with Radiation 579

Index 589
