CONTENTS

STOCHASTIC PROGRAMMING

Modeling and solution strategies for unconstrained stochastic optimization problems, <i>R.J.B. Wets</i>	3
A framework for the probabilistic analysis of hierarchical planning systems, <i>J.K. Lenstra, A.H.G. Rinnooy Kan and L. Stougie</i>	23
A hierarchical scheduling problem with a well-solvable second stage, <i>J.B.G. Frenk, A.H.G. Rinnooy Kan and L. Stougie</i>	43
Stochastic bounds on distributions of optimal value functions with applications to pert, network flows and reliability, <i>G. Weiss</i>	59
Confidence intervals in the solution of stochastic integer linear programming problems <i>B. Apolloni and F. Pezzella</i>	67
Optimal capacity in fisheries; a case where randomness is of minor importance <i>S.D. Flåm</i>	79

GLOBAL OPTIMIZATION

A survey on the global optimization problem: general theory and computational approaches <i>F. Archetti and F. Schoen</i>	87
A Bayesian algorithm for global optimization <i>B. Betrò and R. Rotondi</i>	111
On justification of use of stochastic functions for multimodal optimization models <i>A. Žilinskas</i>	129
Parallel computation and numerical optimisation <i>K.D. Patel</i>	135

Contents

Local and global optimization by parallel algorithms for MIMD systems <i>C. Sutti</i>	151
Evolution strategies: a family of non-linear optimization techniques on imitating some principles of organic evolution <i>H.P. Schwefel</i>	165
COMBINATORIAL OPTIMIZATION AND PROBABILITY THEORY	
Probabilistic methods in graph theory <i>V. Chvátal</i>	171
Colouring random graphs <i>C. McDiarmid</i>	183
When are NP-hard location problems easy? <i>D.S. Hochbaum</i>	201
Probabilistic analysis of geometric location problems <i>E. Zemel</i>	215
A probabilistic analysis of some greedy cardinality of matching algorithms <i>G. Tinhofer</i>	239
A probabilistic analysis of the set covering problem <i>C. Vercellis</i>	255
Probabilistic analysis of the pure literal heuristic for the satisfiability problem <i>J. Franco</i>	273
The density function of the number of moves to complete the Towers of Hanoi puzzle <i>F. Scarioni and M.G. Speranza</i>	291
Optimal policies in stochastic shop scheduling <i>M. Pinedo</i>	305
Randomized algorithms: an annotated bibliography (in alphabetical order) <i>F. Maffioli, M.G. Speranza and C. Vercellis</i>	331
