TELEGRAPH AND TELEPHONE
CONSULTATIVE COMMITTEE

BLUE BOOK

VOLUME II – FASCICLE II.3

TELEPHONE NETWORK AND ISDN QUALITY OF SERVICE, NETWORK MANAGEMENT AND TRAFFIC ENGINEERING

RECOMMENDATIONS E.401-E.880

IXTH PLENARY ASSEMBLY
MELBOURNE, 14-25 NOVEMBER 1988

Geneva 1989

ISBN 92-61-03271-0

CONTENTS OF FASCICLE II.3 OF THE BLUE BOOK

Part I — Recommendations E.401 to E.428

International telephone network management and checking of service quality

Rec. No.		Page
SECTION 1 — <i>International service statistics</i>		
E.401	Statistics for the international telephone service (number of circuits in operation and volume of traffic)	3
SECTION 2 — <i>International network management</i>		
E.410	International network management — General information	5
E.411	International network management — Operational guidance	8
E.412	Network management controls	21
E.413	International network management — Planning	29
E.414	International network management — Organization	34
SECTION 3 — <i>Checking the quality of the international telephone service</i>		
E.420	Checking the quality of the international telephone service — General considerations	37
E.421	Service quality observations on a statistical basis	43
E.422	Observations on international outgoing telephone calls for quality of service	47
E.423	Observations on traffic set up by operators	54
E.424	Test calls	57
E.425	Internal automatic observations	60
E.426	General guide to the percentage of effective attempts which should be observed for international telephone calls	63
E.427	Collection and statistical analysis of special quality of service observation data for measurements of customer difficulties in the international automatic service	64
E.428	Connection retention	67

Part II — Recommendations E.500 to E.600

Traffic engineering

SECTION 1 — *Measurement and recording of traffic*

E.500	Traffic intensity measurement principles	71
E.501	Estimation of traffic offered in the international network	83

Rec. No.		Page
E.502	Traffic measurement requirements for SPC (especially digital) telecommunication exchanges	90
E.503	Traffic measurement data analysis	105
E.504	Traffic measurement administration	108
 SECTION 2 – <i>Forecasting of traffic</i>		
E.506	Forecasting international traffic	111
E.507	Models for forecasting international traffic	128
E.508	Forecasting new international services	148
 SECTION 3 – <i>Determination of the number of circuits in manual operation</i>		
E.510	Determination of the number of circuits in manual operation	157
 SECTION 4 – <i>Determination of the number of circuits in automatic and semiautomatic operation</i>		
E.520	Number of circuits to be provided in automatic and/or semiautomatic operation, without overflow facilities	159
E.521	Calculation of the number of circuits in a group carrying overflow traffic	161
E.522	Number of circuits in a high-usage group	171
E.523	Standard traffic profiles for international traffic streams	181
E.524	Overflow approximations for non-random inputs	187
E.525	Service protection methods	196
 SECTION 5 – <i>Grade of service</i>		
E.540	Overall grade of service of the international part of an international connection	201
E.541	Overall grade of service for international connections (subscriber-to-subscriber)	202
E.543	Grades of service in digital international telephone exchanges	205
E.550	Grade-of-service and new performance criteria under failure conditions in international telephone exchanges	208
 SECTION 6 – <i>Definitions</i>		
E.600	Terms and definitions of traffic engineering	217
 SECTION 7 – <i>ISDN traffic engineering</i>		
E.700	Framework of the E.700 Series of Recommendations	229
E.701	Reference connections for traffic engineering	229
E.710	ISDN traffic requirements overview	231
E.711	User demand	232
E.713	Control plane traffic models	244
E.720	ISDN grade of service concept	251
E.721	Network grade of service parameters in ISDN	253

Part III – Recommendations E.800 to E.880

**Quality of services; concepts, models,
Objectives, dependability planning**

Rec. No.		Page
SECTION 1 – <i>Terms and definitions related to the quality of telecommunication services</i>		
E.800	Quality of service and dependability vocabulary	257
SECTION 2 – <i>Models for telecommunication services</i>		
E.810	Model for the serveability performance on a basic call in the telephone network	269
E.830	Models for the allocation of international telephone connection retainability, accessibility and integrity	272
SECTION 3 – <i>Objectives for quality of service and related concept of telecommunication services</i>		
E.845	Connection accessibility objective for the international telephone service	275
E.850	Connection retainability objective for the international telephone service	281
E.855	Connection integrity objective for international telephone service	286
SECTION 4 – <i>Use of quality of service objectives for planning of telecommunication networks</i>		
E.862	Dependability planning of telecommunication networks	291
SECTION 5 – <i>Field data collection, analyses and evaluation on the performance of equipment, networks and services</i>		
E.880	Field data collection and evaluation on the performance of equipment, networks and services	303

**Part IV – Supplements to the Series E Recommendations
relating to telephone network management
and traffic engineering**

Supplement No. 1	Table of the Erlang formula	313
Supplement No. 2	Curves showing the relation between the traffic offered and the number of circuits required	314
Supplement No. 3	Information on traffic routing in the international network	315
Supplement No. 4	Use of computers for network planning and circuit group dimensioning	316
Supplement No. 5	Teletraffic implications for international switching and operational procedures resulting from a failure of a transmission facility	316
Supplement No. 6	Terms and definitions for quality of service, network performance, dependability and trafficability studies	317
Supplement No. 7	Guide for evaluating and implementing alternate routing networks	366
