CONTENTS OF FASCICLE VI.3 OF THE BLUE BOOK

Part I – Recommendations Q.251 to Q.297

Specifications of Signalling System No. 6

Rec. No.			Page
INTRODUCTION			3
SECTION 1 –	*Functional description of the signalling system*		
Q.251	1.1	General	5
Q.252	1.2	Signal transfer time definitions	8
Q.253	1.3	Association between signalling and speech networks	9
SECTION 2 –	*Definition and function of signals*		
Q.254	2.1	Telephone signals	13
Q.255	2.2	Signalling-system-control signals	17
Q.256	2.3	Management signals	18
SECTION 3 –	*Signal unit formats and codes*		
Q.257	3.1	General	19
Q.258	3.2	Telephone signals	23
Q.259	3.3	Signalling-system-control signals	30
Q.260	3.4	Management signals	34
SECTION 4 –	*Signalling procedures*		
Q.261	4.1	Normal call set-up	39
Q.262	4.2	Analysis of digital information for routing	45
Q.263	4.3	Double seizing with both-way operation	45
Q.264	4.4	Potential for automatic repeat attempt and re-routing	46
Q.265	4.5	Speed of switching and signal transfer in international exchanges	47
Q.266	4.6	Blocking and unblocking sequences and control of quasi-associated signalling	47
Q.267	4.7	Unreasonable and superfluous messages	49
Q.268	4.8	Release of international connections and associated equipment	52

Rec. No. Page

SECTION 5 — *Continuity check of the speech path*

Q.271 5.1 General . . . 57
5.2 Reliability of the speech path across the exchange . . . 57
5.3 Continuity check of the speech circuit between exchanges . . . 57
5.4 Loop checking method . . . 57
5.5 Transmission requirements for the continuity check . . . 57
5.6 Continuity signal . . . 58
5.7 Timing considerations for the continuity check . . . 58

SECTION 6 — *Signalling link*

Q.272 6.1 Requirements for the signalling data link . . . 61
Q.273 6.2 Data transmission rate . . . 66
Q.274 6.3 Transmission methods . . . 67
6.4 Modem and interface requirements . . . 68
Q.275 6.5 Data channel failure detection . . . 75
Q.276 6.6 Service dependability . . . 75
Q.277 6.7 Error control . . . 76
Q.278 6.8 Synchronization . . . 79
Q.279 6.9 Drift compensation . . . 82

SECTION 7 — *Signal traffic characteristics*

Q.285 7.1 Signal priority categories . . . 83
Q.286 7.2 Signalling channel loading and queueing delays . . . 84
Q.287 7.3 Signal transfer time requirements . . . 88

SECTION 8 — *Security arrangements*

Q.291 8.1 General . . . 91
8.2 Basic security arrangements . . . 91
8.3 Types of failure, recognition of failure and abnormal error rates . . . 92
Q.292 8.4 Reserve facilities provided . . . 94
Q.293 8.5 Intervals at which security measures are to be invoked . . . 96
8.6 Changeover and changeback procedures . . . 97
8.7 Emergency restart procedure . . . 100
8.8 Full-time synchronized reserve links . . . 102
8.9 Load sharing method . . . 103

Rec. No. Page

SECTION 9 – *Testing and maintenance*

Q.295 9.1 Overall tests of Signalling System No. 6 105
9.2 Signalling data link 106
9.3 (Reserved) 107
9.4 (Reserved) 107
9.5 Network maintenance 107
Q.296 9.6 Monitoring and maintenance of the common signalling channel 110

SECTION 10 – *Network management*

Q.297 10. Network management 117
10.1 General 117
10.2 Information categories 117
Annex – The application of network management signals transported by System No. 6 118

Annex A to Signalling System No. 6 specifications 120
Annex B – Reasonableness check tables 125
Glossary of terms specific to Signalling System CCITT No. 6 130
Abbreviations specific to Signalling System No. 6 135
Alphabetical Index for System No. 6 137

Part II – Recommendation Q.300

Interworking between CCITT Signalling System No. 6 and national common channel signalling systems

Q.300 Interworking between CCITT Signalling System No. 6 and national common channel signalling systems 149

REMARKS

1 The strict observance of the specifications for standardized international signalling and switching equipment is of the utmost importance in the manufacture and operation of the equipment. Hence these specifications are obligatory except where it is explicitly stipulated to the contrary.

The values given in Fascicles VI.1 to VI.14 are imperative and must be met under normal service conditions.

2 The Questions entrusted to each Study Group for the Study Period 1989-1992 can be found in Contribution No. 1 to that Study Group.

3 In this Fascicle, the expression "Administration" is used for shortness to indicate both a telecommunication Administration and a recognized private operating agency.
