CONTENTS OF FASCICLE VI.4 OF THE BLUE BOOK

Part I – Recommendations Q.310 to Q.331

Specifications of Signalling System R1

Rec. No.		Page
	INTRODUCTION – <i>Principles of Signalling System R1</i>	3
	SECTION 1 – <i>Definition and function of signals</i>	
Q.310	1. Definition and function of signals	5
	SECTION 2 – <i>Line signalling</i>	
Q.311	2.1 2600 Hz line signalling	7
Q.312	2.2 2600 Hz line signal sender (transmitter)	8
Q.313	2.3 2600 Hz line signal receiving equipment	9
Q.314	2.4 PCM line signalling	11
Q.315	2.5 PCM line signal sender (transmitter)	11
Q.316	2.6 PCM line signal receiver	13
Q.317	2.7 Further specification clauses relative to line signalling	13
Q.318	2.8 Double seizing with both-way operation	14
Q.319	2.9 Speed of switching in international exchanges	14
	SECTION 3 – <i>Register signalling</i>	
Q.320	3.1 Signal code for register signalling	15
Q.321	3.2 End-of-pulsing conditions – Register arrangements concerning ST signal	16
Q.322	3.3 Multifrequency signal sender	17
Q.323	3.4 Multifrequency signal receiving equipment	17
Q.324	3.5 Analysis of address information for routing	18
Q.325	3.6 Release of registers	19
Q.326	3.7 Switching to the speech position	19

SECTION 4 – Testing arrangements

Q.327	4.1	General arrangements	21
Q.328	4.2	Routine testing of equipment (local maintenance)	21
Q.329	4.3	Manual testing	22
Q.330	4.4	Automatic transmission and signalling testing	22
Q.331	4.5	Test equipment for checking equipment and signals	23
		Annex A to the specifications of signalling system R1	24

Part II – Recommendation Q.332**Interworking of Signalling System R1
with other standardized systems**

Q.332	5.	Interworking	29
-------	----	------------------------	----

Part III – Recommendations Q.400 to Q.490**Specifications of Signalling System R2**

INTRODUCTION – <i>General</i>	33
---	----

SECTION 1 – Definitions and functions of signals

Q.400	1.1	Forward line signals	37
	1.2	Backward line signals	37
	1.3	Forward register signals	38
	1.4	Backward register signals	39

SECTION 2 – Line signalling, analogue version

Q.411	2.1	Line signalling code	41
Q.412	2.2	Clauses for exchange line signalling equipment	42
	2.3	Clauses for transmission line signalling equipment	48
Q.414	2.3.1	Signal sender	48
Q.415	2.3.2	Signal receiver	50
Q.416	2.4	Interruption control	52

SECTION 3 – Line signalling, digital version

Q.421	3.1	Digital line signalling code	57
Q.422	3.2	Clauses for exchange line signalling equipment	58
Q.424	3.3	Protection against the effects of faulty transmission	63
Q.430	3.5	Conversion between analogue and digital versions of System R2 line signalling	64

SECTION 4 — *Interregister signalling*

Q.440	4.1	General	85
Q.441	4.2	Signalling code	88
Q.442	4.3	Pulse transmission of backward signals A-3, A-4, A-6 or A-15	97
	4.4	Multifrequency signalling equipment	98
Q.450	4.4.1	General	98
Q.451	4.4.2	Definitions	99
Q.452	4.4.3	Requirements relating to transmission conditions	101
Q.454	4.4.4	The sending part of the multifrequency signalling equipment	102
Q.455	4.4.5	The receiving part of the multifrequency equipment	103
	4.5	Range, speed and reliability of interregister signalling	106
Q.457	4.5.1	Range of interregister signalling	106
Q.458	4.5.3	Reliability of interregister signalling	109

Annexes to Section 4:

Annex A	—	Development of formulae for the power level of signalling frequencies	110
Annex B	—	Possible method of improving protection from interruptions	111
Annex C	—	Development of a formula for the admissible forward transmission loss in a country of destination	112

SECTION 5 — *Signalling procedures*

Q.460	5.1	Normal call set-up procedures for international working	115
Q.462	5.1.2	Signalling between the outgoing international R2 register and an incoming R2 register in an international exchange	116
Q.463	5.1.3	Signalling between the outgoing international R2 register and an incoming R2 register in a national exchange in the destination country	118
Q.464	5.1.4	Signalling between the outgoing international R2 register and the last incoming R2 register	119
Q.465	5.1.5	Particular cases	120
Q.466	5.1.6	Supervision and release of the call	120
Q.468	5.2	Routing and numbering for international working	121
	5.3	Termination of interregister signalling	121
Q.470	5.3.1	At an incoming R2 register situated in a transit exchange	121
Q.471	5.3.2	At the last incoming R2 register situated in the exchange to which the called subscriber is connected	122
Q.472	5.3.3	At the last incoming R2 register situated in a transit exchange	123
Q.473	5.3.4	Use of end-of-pulsing signal I-15 in international working	124
Q.474	5.3.5	Use of group B signals	125
Q.475	5.4	Normal release of outgoing and incoming R2 registers	127
Q.476	5.5	Abnormal release of outgoing and incoming R2 registers	129
Q.478	5.6	Relay and regeneration of R2 interregister signals by an outgoing R2 register in a transit exchange	130
Q.479	5.7	Echo-suppressor control — Signalling requirements	132
Q.480	5.8	Miscellaneous procedures	136

SECTION 6 – *Testing and maintenance*

Q.490	Testing and maintenance	139
	Annex A to Signalling System R2 Specifications – Provision of a forward-transfer signalling facility	143

**Part IV – Supplements to the Series Q Recommendations
concerning Signalling Systems R1 and R2**

Supplement No. 1	Line signalling for DC lines with System R2 interregister signalling	147
Supplement No. 2	Both-way working of the analogue line signalling version of Signalling System R2	155
Supplement No. 3	Use of the analogue line signalling version on 2048 kbit/s PCM transmission systems	158
Supplement No. 4	In-band line signalling for 3 kHz spaced channels	161
Supplement No. 5	Line signalling (analogue version) with metering	161
Supplement No. 6	Line signalling (digital version) with metering	165
Supplement No. 7	Semi-compelled and non-compelled multifrequency interregister signalling for national satellite applications based on System R2 interregister signalling	169

PRELIMINARY NOTES

1 The strict observance of the specifications for standardized international signalling and switching equipment is of the utmost importance in the manufacture and operation of the equipment. Hence these specifications are obligatory except where it is explicitly stipulated to the contrary.

The values given in Fascicles VI.1 to VI.14 are imperative and must be met under normal service conditions.

2 The Questions entrusted to each Study Group for the Study Period 1989-1992 can be found in Contribution No. 1 to that Study Group.

3 In this Fascicle, the expression "Administration" is used for shortness to indicate both a telecommunication Administration and a recognized private operating agency.
