CONTENTS OF FASCICLE VI.8 OF THE BLUE BOOK

Recommendations Q.721 to Q.766

Specifications of Signalling System No. 7

Rec. No.		Page
SECTION 1 – <i>Telephone user part (TUP)</i>		
Q.721	Functional description of the Signalling System No. 7 Telephone User Part (TUP) . . .	3
	1 General	3
	2 Telephone User Part	3
	3 Message Transfer Part	4
Q.722	General function of telephone messages and signals	4
	1 Telephone signalling messages	4
	2 Service information	6
	3 Signalling information	6
Q.723	Formats and codes	15
	1 Basic format characteristics	15
	2 Label	17
	3 Telephone signal message formats and codes	19
	<i>Annex A – Charging messages</i>	38
Q.724	Signalling procedures	43
	1 Normal call set-up	43
	2 Dual seizure with both-way operation	55
	3 Automatic repeat attempt	56
	4 Speed of switching and signal transfer in international exchanges	56
	5 Blocking and unblocking of circuits and circuit groups	56
	6 Release of international connections and associated equipment	58

7	Continuity-check for 4-wire speech circuits	61
8	Continuity-check for 2-wire speech circuits	65
9	Interruption control for multiplex systems	65
10	Supplementary services	66
11	Digital connectivity	73
12	Echo suppressor control	74
13	Congestion control	76
14	Telephone User Part outage	76
15	State transition diagrams	77
Q.725	Signalling performance in the telephone application	117
1	Introduction	117
2	Unsuccessful calls due to signalling malfunction	117
3	Unavailability of a signalling route set	117
4	Labelling potential	117
5	Cross-office transfer time	118
SECTION 2 – <i>ISDN supplementary services</i>		
Q.730	ISDN supplementary services	125
1	General	125
2	User-to-user signalling service	126
3	Closed user group (CUG)	129
4	General description of the Calling Line Identity Presentation and Restriction service	143
5	Direct Dialling In (DDI)	153
6	Call Forwarding services	154
7	Time-out table	168
	<i>Annex A</i> – Signalling procedure for the explicit invocation of user-to-user signalling services 1, 2 and 3	169
SECTION 3 – <i>Data user part (DUP)</i>		
Q.741	Signalling System No. 7 – Data user part	185
	(This Recommendation appears in Fascicle VIII.3 of the Blue Book, as Recommendation X.61.)	
SECTION 5 – <i>Integrated services digital network user part (ISUP)</i>		
Q.761	Functional description of the ISDN user part of Signalling System No. 7	187
1	General	187
2	Services supported by the ISDN User Part	188
3	Services assumed from the Message Transfer Part (MTP)	188
4	End-to-end signalling	189
5	Future enhancements	190

Rec. No.		Page
Q.762	General function of messages and signals	191
	1 Signalling messages	191
	2 Signalling information	194
Q.763	Formats and codes	208
	1 General	208
	2 Parameter formats and codes	212
	3 ISDN user part parameters	214
	4 ISDN user part messages and codes	246
	<i>Annex A</i> – Interpretation of spare codes	256
Q.764	Signalling procedures	257
	1 General	257
	2 Basic call control and signalling procedures	258
	3 End-to-end signalling	303
	<i>Annex A</i> – Timers used in Recommendation Q.764	317
	<i>Annex B</i> – State transition diagrams	323
	<i>Appendix I</i> – Contents of the interface elements between the ISDN user part and the SCCP	434
Q.766	Performance objectives in the integrated services digital network application	434
	1 Introduction	434
	2 Signalling availability	435
	3 Signalling dependability	435
	4 Signalling delay	436
	5 Signalling system limitations	437
	Glossary of terms used in Signalling System No. 7	439
	Abbreviations specific to Signalling System No. 7	465

PRELIMINARY NOTES

1 The Questions entrusted to each Study Group for the Study Period 1989-1992 can be found in Contribution No. 1 to that Study Group.

2 In this Volume, the expression “Administration” is used for shortness to indicate both a telecommunication Administration and a recognized private operating agency.

3 The strict observance of the specifications for standardized international signalling and switching equipment is of the utmost importance in the manufacture and operation of the equipment. Hence these specifications are obligatory except where it is explicitly stipulated to the contrary.

The values given in Fascicles VI.1 to VI.13 are imperative and must be met under normal service conditions.
