CONTENTS OF FASCICLE VI.5 OF THE BLUE BOOK

Part I – Recommendations Q.500 to Q.554

Digital local, combined, transit and international exchanges in integrated digital networks and mixed analogue-digital networks

Rec. No.		Page
SECTION 1 – <i>Introduction and field of application</i>		
Q.500	Digital local, combined, transit and international exchanges, introduction and field of application	3
	1 Introduction	3
	2 Field of application	4
	3 The Q.500-Series of Recommendations	4
SECTION 2 – <i>Exchange interfaces, functions and connections</i>		
Q.511	Exchange interfaces towards other exchanges	7
	1 General	7
	2 Scope of Recommendation	7
	3 Characteristics of digital interfaces towards other exchanges	7
	4 Characteristics of analogue interfaces towards other exchanges	10
Q.512	Exchange interfaces for subscriber access	10
	1 General	10
	2 Scope of Recommendation	10
	3 Characteristics of digital exchange interfaces for subscriber access	13
	4 Characteristics of analogue exchange interface for subscriber access	18
	5 Combined digital and analogue interface for subscriber access	18

Rec. No.		Page
Q.513	Exchange interfaces for operations, administration and maintenance	18
	1 General	18
	2 General characteristics of the interfaces to OAM equipment	19
	3 Functional characteristics of the interface to OAM equipment	19
	4 Exchange OAM interfaces	19
Q.521	Exchange functions	21
	1 General	21
	2 Exchange functions – Introduction and framework	22
	3 Utilization of exchange functions for services	23
	4 General functions required for operation of an exchange in the IDN, ISDN or mixed analogue/digital environment	23
Q.522	Digital exchange connections, signalling and ancillary functions	24
	1 General	24
	2 Connections through an exchange	24
	3 Signalling and D-channel handling	35
	4 Ancillary functions	37
	5 Control functions associated with call handling	37
	6 Control functions associated with maintenance and automatic supervision	39
SECTION 3 – <i>Design objectives and measurements</i>		
Q.541	Digital exchange design objectives – General	41
	1 General	41
	2 General design objectives	41
	3 Integrated Digital Network design objectives	42
	4 Availability design objectives	44
	5 Hardware reliability design objectives	46
Q.542	Digital exchange design objectives – Operations and maintenance	47
	1 General	47
	2 Maintenance design objectives	47
	3 Subscriber line maintenance and testing design objectives	54
	4 Operations design objectives	54
	5 Network management design objectives	56
Q.543	Digital exchange performance design objectives	67
	1 General	67
	2 Performance design objectives	68
	3 Exchange performance during overload conditions	90
	<i>Annex A</i> – An example of methodology for computing the call processing capacity of a Digital Exchange taking into account ISDN services, including packet data handling	93
	<i>Annex B</i> – An example of a methodology for measuring exchange capacity	104

Q.544	Digital exchange measurements	106
1	General	106
2	Measurement processes	107
3	Types of measurement data	108
4	Measurement administration	109
5	Application of measurements	110
6	Call events definition	111
7	Traffic measurements	114
8	Exchange performance and availability measurements	117
9	Data for network management	118

SECTION 4 – *Transmission characteristics*

Q.551	Transmission characteristics of digital exchanges	121
1	Introduction	121
2	Characteristics of interfaces	127
3	Voice frequency parameters of a connection between two interfaces of the same exchange	129
4	Exchange transfer function – Jitter and wander	134
Q.552	Transmission characteristics at 2-wire analogue interfaces of digital exchange	134
1	General	134
2	Characteristics of interfaces	134
3	Characteristics of half-connections	142
	<i>Annex A – Example of a longitudinal interference coupling network</i>	<i>157</i>
Q.553	Transmission characteristics at 4-wire analogue interfaces of a digital exchange	158
1	General	158
2	Characteristics of interfaces	159
3	Characteristics of half connections	162
Q.554	Transmission characteristics at digital interfaces of a digital exchange	170
1	General	170
2	Characteristics of interfaces	170
3	Characteristics of 64 kbit/s half connections	171

Part II – Supplements to the Q.500 series of Recommendations

Supplement No. 1	Definition of relative levels, transmission loss and attenuation/frequency distortion for digital exchanges with complex impedances at Z interfaces	175
Supplement No. 2	Impedance strategy for telephone instruments and digital local exchanges in the British Telecom Network	177
