Contents

Preface	
Opening remarks by Prof. Abdus Salam	vii
Magnetic Monopoles and the Yang-Baxter Equations <i>M. Atiyah</i>	1
Introduction to Cohomological Field Theories <i>E. Witten</i>	15
Topological Quantum Field Theories and Gauge Invariance in Stochastic Quantization <i>L. Baulieu</i>	33
On the Algebraic Structure of Quantum Gravity in Two Dimensions <i>J.-L. Gervais</i>	44
Strings in Critical Dimensions <i>C. Vafa</i>	67
A Proof of Modular Invariance <i>W. Nahm</i>	75
On E. Verlinde's Formula in the Context of Stable Bundles <i>R. Bott</i>	84
The Geometry of the KdV Equation <i>G. Segal</i>	96
Universal W-Algebras in Quantum Field Theory <i>I. Bakas and E. B. Kiritsis</i>	107
Properties of Covariant W-Gravity <i>P. Van Nieuwenhuizen, K. Schoutens and A. Sevrin</i>	127
Intuitive Understanding of Anomalies – A Paradox with Regularization <i>H. B. Nielsen and M. Ninomiya</i>	149

Although M. Douglas (Rutgers University) has not submitted a paper for these Proceedings, his talk entitled “*Strings in less than one dimension and KdV flows*” was based on a similar talk presented at the Texas A&M Strings '90 Workshop in March 1990 and the Cargese Workshop in May-June 1990, and published in the Proceedings of those meetings.
