## Section I: Silicon-based Polymeric Materials

The Wonderful World of Silicon on Unsaturated Carbon. From Gas Phase Rearrangements to Ceramic Fibers <i>Thomas J. Barton</i>	3
Silicon Ceramics with a Dash of Boron <i>Dietmar Seyferth, Herbert Plenio, William S. Rees, Jr., and Klaus Büchner</i>	15
Organosilicon Pre ceramic Polymer Technology <i>William H. Atwell, Gary T. Burns, and Gregg A. Zank</i>	28
New Convergent Strategies for the Synthesis of Silicon Carbide and Carbide Nitride Precursors <i>J.-P. Pillot, M. Birot, F. Duboudin, M. Bordeau, C. Biran, and J. Dunoguès</i>	40
Heterochain Polysilahydrocarbons containing Silicon-Silicon Bonds in the Main Chain <i>L. E. Gusel'nikov and Yu. P. Polyakov</i>	50
Small Polysilylalkane Molecules: Feedstock Gases for Chemical Vapour Deposition of Silicon and Silicon Alloys <i>H. Schmidbauer, R. Hager, and J. Zech</i>	62
Synthesis and Properties of Some Polysilaethers - Polyoxymultisilylenes <i>J. Chojnowski, J. Kurjata, S. Rubinsztajn, and M. Scibiorek</i>	70
Recycling - Magic or Tragic? <i>A. Stroh</i>	81

## Section II: Mechanistic Organosilicon Chemistry

### a) Gas Phase and Photochemical Reactions

Mechanisms of Pyrolysis of Some Polysilanes <i>Iain M.T. Davidson, Terry Simpson, and Richard Taylor</i>	89
Recent Results in the Chemistry of Silylenes and Germlyenes <i>P.P. Gaspar, K.L. Bobbitt, M.E. Lee, D. Lei, V.M. Maloney, D.H. Pae, and M. Xiao</i>	100

<b>Direct Kinetic Studies of Silicon Hydride Radicals in the Gas Phase</b> <i>Joseph M. Jasinski</i>	112
<b>Silylene and Disilene Addition Reactions</b> <i>Manfred Weidenbruch</i>	122
<b>Reactive Intermediates and Mechanistic Aspects of Organosilicon Photoreactions</b> <i>M. Kira, T. Taki, T. Maruyama, and H. Sakurai</i>	134
<b>Structure and Reactivity of 7-Sila- and 7-Germanorbornadienes as Precursors of Silylenes and Germylenes</b> <i>O.M. Nefedov and M.P. Egorov</i>	145
<b>Reactions of Silane with Some Halogen and Oxygen-containing Organic Compounds Induced by Infrared Laser Radiation</b> <i>J. Pola</i>	159
<b>Reactions of Functionalized Silenes and Cyclosilanes</b> <i>Wataru Ando and Yoshio Kabe</i>	170
 <b>Section III: Mechanistic Organosilicon Chemistry</b> <b>b) Hypervalent Silicon, Nucleophilic Substitution, and Biotransformations</b>  	
<b>Hypervalent Species of Silicon: Structure and Reactivity</b> <i>R.J.P. Corriu</i>	185
<b>Hydrogen Peroxide Oxidation of the Silicon-Carbon Bond: Mechanistic Studies</b> <i>Kohei Tamao, Takashi Hayashi, and Yoshihiko Ito</i>	197
<b>Nucleophilic Substitution Reactions of Functional Siloxanes</b> <i>K. Rühlmann, U. Scheim, K. Käppler, and R. Gewalt</i>	208
<b>Bioorganosilicon Chemistry - Recent Results</b> <i>R. Tacke, S. Brakmann, M. Kropfgans, C. Strohmann, F. Wuttke, G. Lambrecht, E. Mutschler, P. Proksch, H.-M. Schiebel, and L. Witte</i>	218
 <b>Section IV: Structural Organosilicon Chemistry and New Organosilicon Compounds</b>  	
<b>The Role of Trimethylsilyl-substituted Ligands in Coordination Chemistry; Bis(Trimethylsilyl)methylmetal Complexes</b> <i>Michael F. Lappert</i>	231
<b>Structure and Reactivity - The Role of Bulky Silyl Groups</b> <i>David W.H. Rankin.</i>	253
<b>Sterically Overloaded Organosilicon Compounds</b> <i>N. Wiberg</i>	263

Structure Systematics of Di- and Oligosilanes <i>L. Párkányi</i>	271
Unusual Low Valent and Multiply Bonded Silicon Compounds from Cyclopropenyl Silanes <i>Mark J. Fink</i>	285
Transition-metal Complexes of Reactive Silicon Intermediates <i>T.D. Tilley, B.K. Campion, S.D. Grumbine, D.A. Straus, and R.H. Heyn</i>	295
Decamethylsilococene: Synthesis, Structure, and Some Chemistry <i>P. Jutzi</i>	307
<b>Section V: Organic Synthesis using Silicon</b>	
Stereocontrol in Organic Synthesis using Silicon Compounds <i>Ian Fleming</i>	321
Stereocontrol by Means of Organosilanes. Some Observations on Chemoselectivity, Stereoselectivity, and Enantioselectivity in Allylsilane Reactions <i>Cristina Nativi, Alfredo Ricci, and Maurizio Taddei</i>	332
Enantioselective Synthesis using Organosilicon Compounds <i>T.H. Chan, D. Wang, P. Pellon, S. Lamothe, Z.Y. Wie, L.H. Li, and L.M. Chen</i>	344
$\beta$ -Lactams from Allylsilanes <i>E.W. Colvin, M.A. Loreto, M. Monteith, and I. Tommasini.</i>	356
Some Synthetic Applications of Organosilicon Reagents to Organic Synthesis <i>K. Utimoto</i>	366
Alkenylsilanes in the Synthesis of Nitrogen-Containing Heterocycles <i>E. Lukevics and V. Dirnens</i>	378
Palladium-catalyzed Insertion Reactions of Unsaturated Carbon Compounds into Silicon-Silicon Bonds of Polysilanes. <i>Y. Ito.</i>	391
Subject Index	399
