

Proceedings of the Society of Photo-Optical Instrumentation Engineers

Volume 104

Multidisciplinary Microscopy

April 18-21, 1977, Reston, Virginia

Robert L. Whitman
Editor

Presented By
The Society of Photo-Optical Instrumentation Engineers
and
The Society of Photographic Scientists and Engineers

MULTIDISCIPLINARY MICROSCOPY

Volume 104

CONTENTS

Seminar Committee v
Introduction vii

SESSION 1. OPTICAL MICROSCOPY 1

104-01 **What Microscope Should I Use? 2**
Walter C. McCrone, McCrone Research Institute

104-02 **New Approaches to Phase Microscopy 6**
Brian J. Thompson, College of Engineering and Applied Science, University of Rochester

104-03 **Real Time Measurement and Observation of Viruses in Biological Fluids 16**
Tomas Hirschfeld, Block Engineering, Inc.

104-04 **Interferometry with a Holographic Microscope 21**
M. B. Rhodes, R. F. Cournoyer, Chemistry Department, University of Massachusetts

104-05 **Molecular Microprobe-Microscope System 29**
Edward DaSilva, Lirinord Div. de Instruments SA Lille; Angelo C. Grillo, J-Y Optical Systems

108-13 **Optical Microscopy as Used in Unorthodox Ways 31**
Charles Proffer Saylor, Institute for Materials Research, National Bureau of Standards

103-11 **Design and Construction of a Phase-Locked Interference Microscope. 38**
Glen W. Johnson, Duncan T. Moore, The Institute of Optics, University of Rochester

SESSION 2. OPTICAL MICROSCOPY 49

104-06 **Analysis of Microscopic Imaging. 50**
Jack G. Dodd, Dept. of Physics and Astronomy, Colgate University

104-07 **On the Equivalence of Conventional and Scanning Imaging Systems 56**
Dorian Kermisch, Webster Research Center, Xerox Corporation

104-08 **Increased Depth of Focus in Scanning Microscope 59**
Robert L. Whitman, Zenith Radio Corporation

104-09 **Holographic Microscopy- Theory and Applications 69**
Mary E. Cox, Dept. of Physics and Astronomy, The University of Michigan—Flint

104-10 **Electro-Optic and Holographic Measurement Techniques for the Atmospheric Sciences 73**
W. Walding Moore, Jr., James F. Lemons, Marshall Space Flight Center;
Robert L. Kurtz, TAI Corporation; Hua-Kuang Liu, University of Alabama

SESSION 3. ELECTRON AND ION MICROSCOPES	83
104-11 Electron Microscopy of Atoms (not available for publication)	84
Albert Crewe, University of Chicago	
104-12 Ion Imaging in Secondary Ion Mass Spectrometry	85
Dale E. Newbury, Institute for Materials Research, National Bureau of Standards	
104-13 New Approaches for Identification of Small Particles	90
John Gavrilovic, Walter C. McCrone Associates, Inc.	
104-14 A Microscopist Views the Environment (not available for publication).	96
Ronald Draftz, IIT Research Institute	
104-15 SEM/EDX Imaging Techniques and Applications	97
William D. Stewart, United Scientific Corp.; Glenn W. Meyer, Inter. Scientific Instruments, Inc.	
SESSION 4. ACOUSTIC AND INFRARED MICROSCOPY	103
104-20 The Infrared Microimager and Integrated Circuits	104
Richard F. Leftwich, Barnes Engineering; Cal A. Lidback, Motorola Integrated Circuits	
104-16 A Review of Acoustic Microscopy	111
A. Korpel, Zenith Radio Corporation	
104-17 Principles and Applications of the Scanning Laser Acoustic Microscope	115
Lawrence W. Kessler, Sonoscan, Inc.	
104-18 Application of Acoustic Microscopy to the Study of Muscle Mechanics	117
Reginald C. Eggleton, Indianapolis Center for Advanced Research	
104-19 Infrared Microscopy for Evaluation of Silicon Devices and Die-Attach Bonds	125
Barry G. Cohen, Research Devices, Inc.	
Author Index	133
Subject Index	134
