

AIP Conference Proceedings
Series Editor: Hugh C. Wolfe
Number 48
Particles and Fields Subseries No. 15

**Current Trends in the
Theory of Fields**

(Tallahassee-1978)
A Symposium in Honor of P.A.M. Dirac

Editors
J.E. Lannutti and P.K. Williams
Florida State University

American Institute of Physics
New York 1978

TABLE OF CONTENTS

I.	GAUGE THEORIES	Chairman: Abraham Pais	
A.	<u>Non-Abelian Gauge Theories and Quark Confinement</u>		
	Gerard 't Hooft		1
B.	<u>Quark Confinement and Lattice Calculations</u>		
	Kenneth G. Wilson		9
C.	Panel Discussion		
	i.	<u>A Review of Developments in Lattice Gauge Theory: Extreme Environment and Duality Transformations</u>	
		John B. Kogut	17
	ii.	<u>Steps Toward the Heavy Quark Potential</u>	
		Frank Wilczek	30
II.	APPLICATIONS OF GAUGE THEORIES	Chairman: Maurice Goldhaber	
A.	<u>Neutral Currents and Gauge Theories-- Past, Present and Future</u>		
	J.J. Sakurai		38
B.	<u>Applications of QCD</u>		
	John R. Ellis		81
C.	Panel Discussion		
	i.	<u>Are Quarks Dirac Particles?</u>	
		H. David Politzer	108
	ii.	<u>The Static Potential Energy of a Heavy Quark and Anti-quark</u>	
		Kenneth A. Johnson	112
III.	OTHER DIRECTIONS	Chairman: Sheldon Glashow	
A.	<u>Non-Internal Gauge Theories</u>		
	Yuval Ne'eman		120
B.	Panel Discussion		
	i.	<u>Spin, Supersymmetry and Square Roots of Constraints</u>	
		Claudio Teitelboim	134

ii.	<u>Gravitational Theories Generated by Groups of Transformation and Dirac's Large Number Hypothesis</u>	Leopold Halpern	140
iii.	<u>Poincaré Invariance Without Poincaré Group</u>	Siegfried A. Wouthuysen	153
iv.	<u>Elimination of Redundancy in Super- space Equations of Supergravity</u>	Murray Gell-Mann, Pierre Ramond, and John Schwarz	159
C.	<u>Variation of Constants</u>	Freeman J. Dyson	163
D.	<u>Consequences of Varying G</u>	Paul A.M. Dirac	169
E.	<u>Concluding Remarks</u>	Eugene P. Wigner	175
