# **Physics and the Energy Problem—1974**

(APS Chicago)

Editors

**M.D. Fiske**

General Electric Corporation, Research and Development

and

**W.W. Havens, Jr.**

Columbia University

**American Institute of Physics**

New York

1974

PROGRAM AND TABLE OF CONTENTS

The Energy Problem in Perspective, M.D. Fiske, presiding  
Monday, 4 February, 9:00 A.M.

- AA1 The Fuel Situation  
J.C. Fisher, General Electric Company.....1
- AA2 Physics and Energy Conservation (Abstract only)  
John H. Gibbons, U.S. Department of Interior.....15
- AA3 Research Priorities for the Electric Utility Industry  
Chauncey Starr, Electric Power Research Institute.....16
- AA4 The Energy Problem in Perspective (Abstract only)  
Paul F. Donovan, National Science Foundation.....27
- AA5 Toward a National Energy Policy (Text not available)  
John Andelin, Administrative Aide, Congressman Mike  
McCormack

Resource Development, W.C. Griffith, presiding  
Monday, 4 February, 2:00 P.M.

- BA1 Contributions of Physicists to the Exploration for  
Hydrocarbons  
Franklyn K. Levin, Esso Production Research Company.....28
- BA2 Coal Liquefaction  
Harry Perry, Resources for the Future.....43
- BA3 Fluid-Bed Physics (Text not available)  
David Archer, Westinghouse Electric Corporation
- BA4 Catalysis  
T.E. Fischer, Esso Research and Engineering Co.....56

Mobile Powerplants, F.E. Jamerson, presiding  
Tuesday, 5 February, 9:00 A.M.

- DA1 To Drive or Breathe?  
P.S. Myers, University of Wisconsin.....70
- DA2 Combustion Modeling in Automotive Engines  
John B. Heywood, Massachusetts Institute of Technology..102
- DA3 High Temperature Materials for Automotive Power Plants  
J.J. Harwood, Ford Motor Company.....115
- DA4 Energy Requirements for High Speed Ground Transport Systems  
John T. Harding, Federal Railroad Administration.....130

Energy Transmission and Storage, B. Weinstock, presiding  
Wednesday, 6 February, 9:00 A.M.

- GA1 Opportunities for Physicists in the Area of Electric Power  
Delivery  
Allan Greenwood, Rensselaer Polytechnic Institute.....140

GA2 Dielectric Breakdown Problems in Electric Energy Transmission and Storage Thomas W. Dakin, Westinghouse Research Laboratories.....	153
GA3 Physics Opportunities in Electrochemical Energy Conversion E.J. Cairns, General Motors Research Laboratories.....	160
GA4 The Hydrogen Economy Concept D.P. Gregory, Institute of Gas Technology.....	171

Power Generation: Fission, B.L. Cohen, presiding  
Wednesday, 6 February, 2:00 P.M.

HA1 Breeder Reactors - The Physicist's Contribution M. Dyos, Westinghouse Corporation.....	175
HA2 Radiation Damage in Reactors G.H. Vineyard, Brookhaven National Laboratory.....	182
HA3 High-Level Radioactive Waste Disposal R.C. Liikala, R.W. McKee and W.K. Winegardner, Battelle-Northwest Laboratory.....	202
HA4 Reactor Safety Herbert Kouts, U.S. Atomic Energy Commission.....	242

Power Generation: Fusion, S.J. Buchsbaum, presiding  
Thursday, 7 February, 9:00 A.M.

JA1 Lasers for Fusion Keith A. Brueckner, KMS Fusion, Inc.....	260
JA2 Electron-Beam-Induced Fusion Gerold Yonas, Sandia Laboratories.....	299
JA3 Magnetic Confinement of Thermonuclear Plasmas H.P. Furth, Princeton University.....	314
JA4 Physics Problems of Thermonuclear Reactors F.L. Ribe, Los Alamos Scientific Laboratory.....	337

Power Generation: Other Options, J.K. Hulm, presiding  
Thursday, 7 February, 2:00 P.M.

KA1 MHD Power Generation A. Kantrowitz and R.J. Rosa, Avco Everett Research Laboratory, Inc.....	357
KA2 Solar Research and Technology L.O. Herwig, National Science Foundation.....	379
KA3 Geothermal Power M.C. Smith, Los Alamos Scientific Laboratory.....	401
KA4 Solar Sea Power Clarence Zener, Carnegie-Mellon University.....	412
