CONTENTS

Preface	xv
Editor's Comments.....	xvii
Special Paper: The Role of Boron in Cosmology	1
V. E. Viola	

I. ELECTRONIC STRUCTURE

<i>Ab Initio</i> Calculations of Boron and its Carbides.....	13
L. Kleinman	
The Electronic Origin of Disorder in Boron and Boron-Rich Borides	21
D. W. Bullett	
Influence of the Jahn–Teller Effect on the Electronic Band Structure of Boron-Rich Solids Containing B_{12} Icosahedra	29
R. Franz and H. Werheit	
Electronic Studies of B_4C	37
M. M. Florence and C. L. Beckel	
Geometry and B (1S) Core Excitons of <i>Ortho</i> - Carborane.....	42
T. A. Green	
The Electron Fermi Surface of HfB_2	46
T. Tanaka and Y. Ishizawa	
Electronic Structure and Charge Density of Zirconium Diboride.....	54
A. C. Switendick	

II. ELECTRONIC AND OPTICAL PROPERTIES

Electronic and Vibrational Hopping Transport in Boron Carbides	65
D. Emin	
Low Temperature Dielectric Properties and ac Conductivities of the Icosahedral Boron Carbides	77
G. A. Samara, H. L. Tardy, E. L. Venturini, T. L. Aselage, and D. Emin	
Low Temperature ac Electrical Properties of Boron Carbide.....	85
N. Papandreou and L. Zuppiroli	
Low Temperature Properties of Boron Carbides	90
J. C. J. M. de Rooy, D. Reefman, D. van der Putten, H. B. Brom, T. Aselage, and D. Emin	
Electronic Transport Properties of Hot-Pressed Boron-Rich Compounds of the Al–B–C System.....	94
A. I. Kharlamov and S. V. Loichenko	
Electronic Transport Properties of Boron Carbide within the Homogeneity Range.....	104
H. Werheit, U. Kuhlmann, R. Franz, W. Winkelbauer, B. Herstell, D. Fister, and H. Neisius	

Boron-Rich Borides as the Models of Amorphous Semiconductors	108
O. A. Golikova	
Films of Aluminium Boride (AlB₁₀)	117
O. A. Golikova, M. M. Kazanin, Z. Mirzazhonov, T. Khomidov, and Yu. A. Shiyarov	
Properties of MB₆₆ (M-Rare Earth Elements) in the Homogeneity Region.....	121
O. A. Golikova, N. Amandzhanov, and A. Tadzhiyev	
Electronic Transport and Optical Properties of YB₆₆.....	125
H. Werheit, U. Kuhlmann, and T. Tanaka	
Transient Photoconduction of β-Rhombohedral Bulk Boron (III).....	130
R. Uno, H. Ozawa, and J. Ishigaki	
Dielectric Function of Boron Carbides from Kramers-Kronig Analysis of Reflectance Spectra	138
H. L. Tardy, T. L. Aselage, and D. Emin	
Optical Absorption of Carbon-Doped β-Rhombohedral Boron and Boron Carbide in the Absorption Edge Range	144
H. Werheit, U. Kuhlmann, F. H. Werheit, and G. Krach	
Optical Properties of ¹⁰B Enriched β-Rhombohedral Boron.....	148
U. Kuhlmann, H. Werheit, B. Fahy, and P. Perkins	

III. SUPERCONDUCTIVITY

Superconducting Borides	155
Z. Fisk	
Superconductivity and Magnetism in Rare Earth Transition Metal Borides.....	165
M. B. Maple	

IV. STRUCTURE

Structural Model of the Boron Carbide Solid Solution	177
T. L. Aselage and D. Emin	
Structural Aspects of Some Boron-Rich Refractory Compounds Related to B₄C.....	186
T. Lundström	
On the Crystal Structure of Boron Carbides.....	193
B. Morosin, T. L. Aselage, and D. Emin	
Structure Refinement of the Boron Suboxide B₆O by the Rietveld Method.....	197
H. Bolmgren, T. Lundström, and S. Okada	
Crystal Structure of B₆O.....	201
I. Higashi, M. Kobayashi, J. Bernhard, C. Brodhag, and F. Thévenot	
Electronic Charge Density and Bonding in α-Boron: An Experimental-Theoretical Comparison.....	205
A. C. Switendick and B. Morosin	
Crystal Structure and Magnetic Properties of ErRh₃B₂.....	212
J. Bernhard, H. Kitazawa, I. Higashi, T. Shishido, T. Fukuda, and H. Takei	

New Rare-Earth Borocarbides	216
J. Bauer	
Metal Distribution in $Al_xCu_yB_{105}$ ($x=0-3.4$, $y=4.2-0$) of the β-Rhombohedral Boron Structure.....	224
I. Higashi, M. Kobayashi, Y. Akagawa, K. Kobayashi, and J. Bernhard	
On the Regularities Governing the Formation and Crystal Structure of a New Group of Borides $LnAlB_{14}$.....	232
M. M. Korsukova	
A Neutron Diffraction Study of Amorphous Boron	241
R. G. Delaplane, T. Lundström, U. Dahlborg, and W. S. Howells	
Theoretical Estimation of Predominant Position and Charge State for Fe and Mn in β-RH Boron Lattice.....	245
V. A. Shmugurov, G. P. Tsiskarishvili, G. V. Tsagareishvili, and T. Lundström	
Investigation of Structural Model of Amorphous Boron by High Resolution Electron Microscopy	250
A. L. Vasiljev, M. A. Gribeluk, E. V. Orlova, A. M. Dovidenko, G. P. Tsiskarishvili, and G. V. Tsagareishvili	
On the Structure of Thermal Magnesium Boron	255
K. V. Tkachev, T. E. Kerkher, E. A. Knyshev, B. S. Kogan, and Yu. S. Plyshevskii	

V. MAGNETIC PROPERTIES

^{11}B and ^{13}C NMR Spectroscopy of Boron Carbides	261
R. J. Kirkpatrick, T. Aselage, B. L. Phillips, and B. Montez	
Nuclear Quadrupole Resonance Studies of Structure and Bonding in Glasses	271
P. J. Bray, S. Gravina, and D. Lee	
Isotope Effect in β-Rhombohedral Boron	280
G. P. Tsiskarishvili, T. Lundström, J. Tegenfelt, T. V. Dolidze, and G. V. Tsagareishvili	
Mössbauer Study of Boron-Rich Phases Doped with Fe	289
O. A. Golikova, M. M. Kazanin, G. M. Klimashin, and V. V. Kutasov	
A Mössbauer Study of Hydrogen in Powders Obtained by a Borohydride Reduction Process	294
S. Nikolov, I. Dragieva, and D. Buchkov	

VI. VIBRATIONAL PROPERTIES

Structure of Icosahedral Borides by Raman Spectroscopy	301
D. R. Tallant, T. L. Aselage, and D. Emin	
Lattice Vibrations of Icosahedral Boron-Rich Solids	312
C. L. Beckel and M. Yousaf	
Lattice Dynamics in Fluctuation Valence Compound SrB_6.....	318
P. A. Alekseev, A. S. Ivanov, K. A. Kikoin, A. S. Mischenko, A. N. Lazukov, A. Yu. Rumyantsev, I. P. Sadikov, E. S. Konovalova, Yu. B. Paderno, B. Dorner, and H. Schober	

Infrared Absorption in Boron Carbides: Dependence on Isotopes and Carbon Concentration	322
H. Stein, T. L. Aselage, and D. Emin	
Role of Interatomic Interactions in Characteristic Debye Temperature of Rare Earth Hexaborides	326
N. Yu. Shitsevalova and Ju. B. Paderno	
Infrared Study of Local Vibrations in Hydrogenated α-B and α-B_{1-x}C_x Alloys Prepared by Plasma Deposition	336
K. Shirai, S. Ae, and S. Gonda	
IR Optical Properties of Fe-Doped β-Rhombohedral Boron	340
U. Kuhlmann, H. Werheit, T. Dose, and T. Lundström	
Vibrational Analysis of B₄C	344
B. S. Abbott and C. L. Beckel	
Raman Spectra of Boron-Rich Solids	347
O. A. Golikova and A. P. Sokolov	
Optical Properties of α-Rhombohedral Boron	350
H. Werheit, U. Kuhlmann, N. E. Solov'ev, G. P. Tsiskarishvili, and G. Tsagareishvili	
On the Interpretation of the Phonon Spectra of Boron Carbide and β-Rhombohedral Boron	355
H. Werheit and H. Haupt	

VII. THERMAL AND ELASTIC PROPERTIES

Specific Heat and Thermal Conductivity of Amorphous Boron	363
P. A. Medwick, D. G. Cahill, A. K. Raychaudhuri, R. O. Pohl, F. Gompf, N. Nücker, and T. Tanaka	
The Effect of Structural Defects on Thermal Conductivity of Polycrystalline AlB₁₂ and EuB₆	371
L. I. Kekelidze, I. A. Bairamashvili, V. N. Kovtun, I. I. Petrov, and D. K. Tavartkiladze	
Elastic Properties of Boron Carbides	376
J. H. Gieske, T. L. Aselage, and D. Emin	
Thermal Properties of Some Boron-Rich Compounds ("B_nC" and AlB₁₂)	380
D. Gosset, M. Guery, and B. Kryger	
Thermodynamic Properties of Boron Suboxide in the Temperature Range 11.44–781.8 K	384
G. V. Tsagareishvili, D. Sh. Tsagareishvili, M. Ch. Tushishvili, I. S. Omiadze, V. N. Naumov, and A. B. Tagaev	
Estimation of Some Thermoelastic Properties of Boron Suboxide in Wide Ranges of Temperature	392
D. Sh. Tsagareishvili, M. Ch. Tushishvili, and G. V. Tsagareishvili	
Low Temperature Anomaly of Boron Nitride Heat Capacity	396
Sh. Sh. Abel'skii	
Thermal Conductivity of Turbostratic Boron Nitride	399
A. L. Zilichikhis, Sh. Sh. Abel'skii, L. S. Parphen'eva, I. N. Kulikova, and E. A. Knyshev	

VIII. PHASE DIAGRAMS

Investigations in the Boron–Carbon System with the Aid of Electron Probe Microanalysis	405
K. A. Schwetz and P. Karduck	
The Ternary System Uranium–Boron–Nitrogen	414
H. Klesnar and P. Rogl	
Phase Stability Properties of Transition Metal Diborides	423
G. Grimvall and A. F. Guillermet	
Thermodynamical and Physical Aspects of the Occurrence of Absolutely Pure Substances	431
V. N. Gurin	
Thermodynamic Analysis of Complex Boron–Containing Systems	436
V. Yu. Mindin	
Thermodynamic Analysis of Complex Boron–Silicon Systems	444
D. V. Eristavy and V. Yu. Mindin	

IX. MATERIALS PREPARATION

Studies of Crystals of Boron-Rich Borides in the Systems “Me (Ln,Be)–Al(Sn)–B(C,Si)”	451
L. I. Derkhachenko, V. N. Gurin, M. M. Korsukova, A. A. Nechitailov, A. P. Nechitailov, Yu. B. Kuz'ma, and N. F. Chaban	
Crystal Growth of the New Compound Nb₂B₃, and the Borides NbB, Nb₅B₆, Nb₃B₄, and NbB₂, Using the Copper-flux Method	456
S. Okada, K. Hamano, T. Lundström, and I. Higashi	
The Study of RE Dodecaborides Zone Melting Process	460
Ju. Paderno, V. Filippov, and N. Shitsevalova	
Dense Material Obtained on the Basis of Boron Carbide Sintered without Pressing	464
Z. Zakhariyev and D. Radev	
On the Sintering of Superhard TiB₂–Fe Cermets	468
L. S. Sigl and K. A. Schwetz	
Investigation: The Process of Densification of Boron-Rich Compounds of the Al–B–C System	473
A. I. Kharlamov and S. V. Loichenko	
Effects of Reaction Parameters on Boron Carbide Powder Production by the Carbothermic Process	482
D. L. Belitskus, R. J. Campbell, and S. Y. Tzeng	
Crystalline Boron Production in Plasma-Chemical Reactors	490
A. B. Bakhtadze, I. A. Bairamashvili, V. I. Glazov, and V. P. Korobtsev	
A Study of the Plasmochemical Method of Production of Low-Pressure Boron Nitride	494
V. A. Ryabin, E. A. Knyshev, E. D. Shulimovich, Yu. I. Krasnokutskii, A. S. Nechepurenko, and S. V. Pozhenskii	

Shock-induced Reaction Synthesis of Borides	501
H. A. Grebe, A. Advani, and N. N. Thadhani	
Technological Aspects of Production of Titanium–Chromium Boride Powders. Part I	505
E. A. Knyshev, N. V. Obabkov, V. A. Kiselev, A. R. Beketov, E. A. Boev, I. N. Gorbатов, and A. S. Rozhkov	
Technological Aspects of Production of Titanium–Chromium Boride Powders. Part II	508
E. A. Knyshev, A. S. Nechepurenko, and N. A. Klinskaya	
Preparation and Properties of High-Dispersive Powders of Aluminium Dodecarboride and Carboborides	512
A. I. Kharlamov, T. I. Duda, and V. V. Fomenko	
Superfine Boron-Containing Powders, Preparation, Peculiarities, and Application	516
I. Dragieva	
Oriented Boron Carbide Films Produced by Laser Spraying	524
P. D. Kervalishvili, S. O. Shalamberidze, and Yu. A. Bikovsky	
Preparation and Annealing Effects of Boron-Rich Films: Search for Semiconducting Quasicrystal	528
K. Kimura, Y. Takamura, and H. Yamashita	
The Formation Kinetics of α-Rhombohedral Boron under Isothermal Conditions	532
N. E. Solov'ev, V. S. Makarov, L. N. Meshchaninova, and Ya. A. Ugai	
The Real Structure of Crushing Products of Crystalline β-Rhombohedral Boron	538
D. L. Gabunia, T. Sh. Badzagua, M. K. Tsomaya, D. T. Lezhava, D. N. Avlokhshvili, N. T. Maisuradze, and R. N. Dekanosidze	
Chemical Activity of Elementary Boron	542
J. Sh. Jobava, G. I. Kalandadze, and P. J. Kervalishvili	

X. MECHANICAL PROPERTIES

Oxidation Behavior of B_4C-SiC Composites with Various Microstructures	553
R. Telle	
Some Peculiarities of Structure Formation in Eutectic <i>d</i>- and <i>f</i>-Transition Metals Boride Alloys	561
Yu. Paderno, V. Paderno, and V. Filippov	
Thermal Shock Behavior of Sintered Mixtures of Carbon, Boron, and Titanium	570
H. Shinno, M. Fujitsuka, and T. Tanabe	
Boron Containing Ceramic Particulate and Whisker Enhancement of the Fracture Toughness of Ceramic Matrix Composites	574
J. Liu and P. D. Ownby	
Effects of Cobalt on the Properties and Phase Formation of Mo_2FeB_2 Complex Boride Base Hard Alloys	578
M. Komai, K. Takagi, T. Watanabe, and Y. Kondo	

Inelastic Properties of Boron Oxides	582
M. Ch. Tushishvili, G. Sh. Darsavelidze, O. A. Tsagareishvili, I. A. Bairamashvili, and J. Sh. Jobava	
Aluminium Borides and Carboborides	590
T. A. Prikhna and P. S. Kisly	
Peculiarities of Internal Friction in Boron Carbide	594
M. Antadze, G. Darsavelidze, N. Khachapuridze, D. Lezhava, T. Dzigrashvili, and E. Kutelija	
Peculiarities of Internal Friction in the Boron Received by Pressing with Explosion Crystalline Boron Powders	602
M. K. Tsomaya, D. L. Gabunia, D. T. Lezhava, L. R. Kurashvili, G. G. Chubinidze, and I. I. Gogichev	
Relaxation Processes in Re-Doped Boron	606
G. Darsavelidze, M. Antadze, G. Tavadze, O. Tsagareishvili, A. Khvedelidze, and D. Tsikaridze	
Exoemission Properties of Turbostratic Boron Nitride	610
V. I. Kryuk, and E. A. Knyshev	

XI. APPLICATIONS

Boron Carbide Large Area <i>In Situ</i> Coatings for Controlled Nuclear Fusion Research	617
S. Vepřek	
Ion Implantations in Boron: Remarkable Stability of Covalent Structures Based on Icosahedra	630
L. Schmirgeld, L. Zuppiroli, M. Brunel, J. Delafon, and C. Templier	
Carborane Films: Applications to First-Wall Problems in Tokamaks	639
B. L. Doyle, D. S. Walsh, W. R. Wampler, A. K. Hays, H. F. Dylla, D. M. Manos, and S. J. Kilpatrick	
The Reactions of B₂O₃ and O₂ with the β-Rhombohedral Boron (111) Surface	643
W. C. Foo, J. S. Ozcomert, and M. Trenary	
Tribological Properties of Nitrogen Implanted Boron Carbide	647
R. R. Reeber, J. Q. Whitley, R. P. Kusy, R. J. Culbertson, and N. Yu	
Formation of Ti–B Surface Alloys by Excimer Laser Mixing	652
T. R. Jervis, M. Nastasi, J.-P. Hirvonen, and T. G. Zocco	
Variation of Intrinsic Magnetism and Magnetic Anisotropy with Boron and Silicon Content in Amorphous (Fe₈₀Ni₂₀)₇₈Si_{22-x}B_x Alloys	656
K. Guan and J. Wang	
High Coercivity Nd–(Fe,M)–B Magnets	663
L. Fazeng, Z. Xiaoshi, A. Lu, Z. Henghe, and G. Wenqing	
Author Index	669
Subject Index	673
