

Science and Technology of Polymer Colloids

Characterization, Stabilization and
Application Properties
Volume II

edited by

TABLE OF CONTENTS

See Seite 263 im Bd. 67

J. W. Vanderhoff	The Making of a Polymer Colloid	1
D. J. Walbridge	Preparation of Non-Aqueous Polymer Latexes	40
J. Ugelstad, P. C. Mørk, H. R. Mfutakamba, E. Soleimany, I. Nordhuus, R. Schmid, A. Berge, T. Ellingsen & O. Aune	Thermodynamics of Swelling of Polymer, Oligomer and Polymer-Oligomer Particles: Preparation and Application of Mono-disperse Polymer Particles.	51
R. M. Fitch	A Practical Guide to the Control of Latex Particle Size and its Distribution in Emulsion Polymerization.	100
G. W. Poehlein	Emulsion Polymerization in Continuous Reactors.	112
A. E. Hamielec	Emulsion Polymerization Kinetics - - Diffusion Controlled Reactions and Molecular Weight and Branching Development	140
J. W. Vanderhoff	Autoclave Buildup	167
F. J. Schork	Continuous Monitoring of Emulsion Polymerization Systems	188
D. C. Blackley	Production of Carboxylated Latices by Emulsion Polymerization	203
D. R. Basset	Structure and Growth of Latex Particles	220
D. Rance	Colloidal Aspects of Vinyl Chloride Polymerization	241
R. L. Rowell & K. M. Kidnie	Characterization of Latexes by Optical Methods	264
R. Buscall	Stability of Aqueous Latexes	279
A. S. Dunn	Absorption of Emulsifiers and Its Effects on Kinetics of Polymerization	314
B. Vincent	The Stabilisation of Latices by Non-Ionic Polymers	335
D. H. Everett	Properties of Non-Aqueous Colloids	353
D. W. J. Osmond	Some Residual Problems in the Theory of Steric Stabilisation	369
A. M. Joseph-Petit, F. Dumont & A. Watillon	Comparison Between Theoretical and Experimental Turbidity Spectra of Medium and Large Size Monodisperse polystyrene Latexes	380

R. Wessling	Cationic Polymer Colloids	393
M. S. ElAasser	Methods of Latex Cleaning	422
P. Stenius & B. Kronberg	Surface Characterization of Latexes: Conductometry, Potentiometry, Electrophoresis, Hydrodynamic Chromatography	449
W. E. E. Stone & J. H. Stone-Masiu	XPS Study of Sulfate Groups on Polystyrene Latexes	480
R. H. Ottewill	Concentrated Dispersions I. Fundamental Considerations	503
I. M. Krieger	Ordered Polymer Colloids	523
Th. F. Tadros	Concentrated Dispersions II. An Industrial Viewpoint	531
J. W. Goodwin	Rheology of Polymer Colloids	552
R. L. Hoffman	Rheology of Concentrated Latexes and Dispersions	570
R. J. Tarcha & R. M. Fitch	Particle Morphology of Partially Hydrolyzed Acrylic Polymer Colloids by ^{13}C NMR	589
T. Corner	The Colloid Stability of Polyelectrolyte Stabilised Dispersions	600
Z. Adamczyk, T. Dabros & T. G. M. van de Ven	Deposition of Colloid Particles from Flowing Dispersions	619
