

EUROPEAN ENGINEERING RESEARCH AND TECHNOLOGY TRANSFER CONGRESS

Papers presented at a series of Seminars organized by
the Institution of Mechanical Engineers in collaboration
with other leading Professional Societies worldwide, and
held at the International Conference Centre,
Birmingham, UK, on 2 - 4 July 1991.

Published by
Mechanical Engineering Publications Limited for
The Institution of Mechanical Engineers
LONDON

CONTENTS

Section 1 — Technology trends in power generation Technology transfer in energy efficiency

Power generation into the 21st Century <i>J. G. Collier</i>	3
A view of future power generation in the UK <i>A. R. Jack</i>	17
European trends in power generation <i>M. Stonard</i>	19
Environmental constraints on power generation <i>J. Rae</i>	21
The development of gas turbine generation systems <i>J. A. Roberts</i>	23
A boilermaker's response to the environmental challenge <i>P. Beal</i>	27
METPOLAM — a case study <i>L. A. Jenkins</i>	29
The Energy Efficiency Office programmes <i>J. E. P. Miles</i>	31
The transfer of energy efficient practices to industry <i>G. V. Evans</i>	35
Putting energy efficiency into the control loop <i>T. C. Fogarty</i>	39
Development and marketing of an innovative 40kWe CHP unit <i>J. P. Packer</i>	43

Section 2 — Technology transfer and product development Technology strategy and management Financial and legal aspects of technology

Financing of new technology products <i>D. J. Goff and S. F. Noonan</i>	49
Sources of finance for new technology <i>J. W. Welfare</i>	55
Marketing strategies for new products <i>D. A. A. Lamb</i>	61
Intellectual property rights: safeguarding and exploiting good ideas <i>J. A. James</i>	67
Invention, innovation, and opportunity <i>A. R. E. Singer</i>	71
The Torotrak story: the first one hundred years are the hardest <i>G. B. Soar</i>	75
Technology strategy and its relationship to business strategy <i>B. Young</i>	79
Technology strategy and how to develop an optimum technology portfolio <i>S. Bone</i>	85
Which route to greater profit: R & D or innovation? <i>L. Santos</i>	87
Can you keep a secret? How to protect your technology <i>A. A. Horton</i>	93

Everyday computer law for the engineer <i>F. J. Robichaux</i>	97
Pollution control: best available technology <i>T. E. F. Sutherland</i>	101
Best available technology for air pollution control <i>J. T. Foster, P. Bisbjerg, and D. W. James</i>	105
Section 3 — Academic — Industrial links	
A rationale for industrial — academic collaboration <i>D. H. Clark</i>	113
Academic — industrial links <i>J. D. Howarth</i>	117
Experiences in academic — industrial collaboration for research <i>G. Mullineux</i>	121
Advantages of academic — industrial collaboration <i>P. Hancock and T. N. Rhys-Jones</i>	125
Application-oriented research in academe <i>C. Le Pair</i>	129
Technology transfer between higher education and industry in Europe <i>C. J. Hull</i>	137
Section 4 — Science Parks	
Development of science parks in the United Kingdom <i>J. C. Allen</i>	145
The contribution of a major centre of research to industry — university co-operation <i>J. Moe</i>	147
The contribution of an industrial research centre to the development of a science park <i>G. Hunter</i>	151
Technology transfer to and from universities: the role of spin-offs <i>D. H. McQueen</i>	155
Business creation and venture capital <i>H. A. Nicholls</i>	159
The role of innovation centres <i>H. Fiedler</i>	163
