Harald Räcke

Data Management and Routing in General Networks

Contents

1 Introduction **1**

1.1 Bibliographical Notes 3

2 Communication-efficient Data Management Strategies **5**

2.1 Formal description of the problems 6

2.2 Related work and new results 10

2.2.1 Previous work 10

2.2.2 Our results 14

2.2.3 Further work 15

2.3 Hierarchy-based algorithms 15

2.3.1 Preliminaries 15

2.3.2 The bisimulation technique 16

2.3.3 The virtual tree network 18

2.3.4 Simulation results 20

2.3.5 Applications 25

2.3.6 Constructing the hierarchical decomposition 35

2.4 Optimal oblivious routing 48

2.4.1 Preliminaries 48

2.4.2 LP formulation 50

2.5 Conclusions 54

3 Cost-efficient Data Management Strategies **65**

3.1 The cost based model 66

3.2 Related work and new results 67

3.3 The approximation algorithm for arbitrary networks 68

3.3.1 Proper placements 71

3.3.2 The approximation algorithm 75

3.4 The optimal algorithm for trees 78
3.4.1 The read-only case 79
3.4.2 The general case 84
3.5 Conclusions 88

A Appendix **97**
A.1 Proof of Claim 2.16 97
