PROCEEDINGS

OF THE TWENTYSIXTH

INTERNATIONAL

POWER CONVERSION

CONFERENCE

JUNE 22 – 24, 1993
NÜRNBERG, GERMANY

This Book is the Property of

POWER CONVERSION '93 - JUNE

TABLE OF CONTENTS

Technical Papers and Authors	Session No.	Page No.
RESONANT CONVERTERS AND SOFT SWITCHING	PC 1	
A New Converter Topology Uniquely Suited to High Output Voltage Applications - G. Dokopoulos, B. Taylor, International Rectifier, GB	1.1	1
Resonance and Discontinuous Conduction Mode: Two Advantages to Increase the Power-Frequency Product - J. L. Schanen, J. Roudet, J. Barbaroux, Lab. d'Electrotechnique/ENSIEG, France	1.2	11
Novel Front-End Converter System for Distributed Power Supplies Providing High Performance and Low Costs - S. Hadjivassilev, J. Pforr, L. Hobson, University of Teesside, GB	1.3	20
Zero-Voltage Soft-Switching Discrete Pulse Modulated Three-Phase AC-DC Power Converter with Power Factor Correction and its New Digital Control Scheme - M. Nakaoka, H. Yonemori, M Michihira, K. Miyagawa, Kobe University, Japan	1.4	35
Resonant Converter for Induction Heating with IGBT - D. Kisel, Technical University Kosice, Slovakia	1.5	497
Advanced Development of 50KW Multi-Resonant Soft-Switching PWM DC-DC Converter with Resonant-Pole and Resonant AC Tank Topologies Using Internal Parasitic Circuit Components - M. Nakaoka, Y. J. Kim, Kobe University, Japan	1.6	42
A Resonant Converter Application as an AC Power Supply for a Continuous Wave CO2 Laser - E. Clavier, D. Lafore, Ecole Supérieure d'Ingénieurs de Marseille, M. Gastaud, Institut Méditerranéen de Technologie, H. Brunet, Laserdot, France	1.7	52
On the Design of High Power Current Fed Inverters for Tube Welding Applications - E. J. Dede, V. Esteve, J. Jordan, J. V. Gonzalez, E. Maset, G. H. Industrial, Spain	1.8	62
Extended Versions of Saturable Reactor-Assisted ZVS-PWM DC-DC Power Converters - S. Hamada, Sansha Electric, S. Nagai, M. Michihira, M. Nakaoka, Kobe University,	1.9	70
Novel Fully-Stabilized Constant-Frequency Low-Noise Multi-Resonant Converter - A. Gentchev, Puls, Germany	1.10	80
NEW APPLICATIONS AND TOPOLOGIES	PC 2	
100 A/600 V Static Circuit Breaker - J. F. de Palma, Ferraz, J. J. Rousseau, Cegley-ECPA, France	2.1	93
High-Power Solid-State DC/AC Power Supplies for Broadcast Transmitters and other High-Voltage Applications - N. Tomljenovic, ABB Infocom, Switzerland	2.2	103
Very High Power Modulator - O. Rabot, Thomson CSF, France	2.3	116
A Novel High Performance Converter System - R. K. Jardan, G. Peremy, Deltronic, Hungary, G. J. Ruumpol, De Drie Electronics, Netherlands	2.4	121

Technical Papers and Authors	Session No.	Page No.
POWER FACTOR CONTROL	PC 3	
New Power Stage for Boost Converters -A Perfect Match for PFC Controller IC's - Th. Schneider, ABB-IXYS Semiconductor, W. Chrystowski, E-Drive and Battery Consulting, Germany	3.1	**
An Economical Controller Corrects Power Factor - F. Lhermite, Motorola France, J. H. Alberkrack, S. M. Barrow, Motorola, USA	3.2	136
Soft Transitions Power Factor Correction Circuit - I.D. Jitaru, Rompower, USA	3.3	144
Analysis and Design of a New Three-Phase Power Conditioner Providing Sinusoidal Input Currents and Multiple Isolated DC Outputs - J.W. Kolar, H. Ertl, F.C. Zach, Technical University Vienna, Austria	3.4	151
Power Factor Correction with New Integrated Circuit - R. Blöckl, Siemens, Germany	3.5	166
L4981: A power Factor Corrector that Makes the Job Easy - B. Ferrario, SGS-Thomson Microelectronics, Italy	3.6	506
Design Aids for Single-Phase High-Frequency Power-Factor Correctors with Capacitive Energy Storage - R. Redl, Elfi, L. Balogh, Ascrom Energy Systems, Switzerland	3.7	180
MOS-BIPOLAR POWER COMPONENTS - STATE OF THE ART - EVOLUTION (Part I)	PVC 4	
IGBT - STATE OF THE ART	4.1	
The IGBT Conquers the Automotive Ignition Market - H. Sax, SGS-Thomson, Germany	4.1.1	195
Ultrafast Second Generation IGBT's for SMPS and Battery Traction Applications - B. Taylor, International Rectifier, GB	4.1.2	201
IGBT Halfbridge Module with Galvanically Isolated Digital Interface - M. Hierholzer, ABB-IXYS Semiconductor, Germany	4.1.3	206
IGBT with Homogeneous Structure Used for High Power Converter Design - D. Srajber, Semikron, Germany	4.1.4	215
The Third Generation IGBT and it's Model for Circuit Simulations - Y. Nakagomi, T. Otani, Hitachi, Japan	4.1.5	223
1700 V 180 A Half Bridge IGBT Module Utilizing Optimized Life Time Control and High Voltage Planar Structures - K. Murakami, Y. Iwano, K. Mase, Toshiba Semiconductor System Engineering Center, T. Ito, M. Kuwahara, T. Tsunoda, Toshiba Microelectronis Center, Japan	4.1.6	228
IGBT - State of the Art and Future Development - L. Lorenz, Siemens AG, Germany	4.1.7	240
3rd Generation High Performance Intelligent Power Module Series - Y.Yu, S. Yoshida, H. Yamaguchi, Mitsubishi Japan E. Thal, Mitsubishi Electric Europe	4.1.8	247
IGBT MEASUREMENT	4.2	
Power Testing - Static & Dynamic Parameter in one Handling - H. Giessibl, SZ Testsysteme, Germany	4.2.1	257
How to Evaluate IGBT Characteristics in Operating Conditions - D. Lafore, A.C. Sanchez, E. Clavier, ESIM-IMT	4.2.2	269

Technical Papers and Authors	Session No.	Page No.
MOS-BIPOLAR POWER COMPONENTS		
STATE OF THE ART - EVOLUTION (Part II)	PC 4	
MCT	4.3	
MCT and the Future - V. Temple, F. Lokuta, D. Burke, B. Arlt, Harris Semiconductor, USA	4.3.1	277
Features of MOS Controlled Thyristors in Voltage-Source Inverters - H.-G. Eckel, L. Sack, University of Erlangen, Germany	4.3.2	298
MOS Controlled Power Switches above 2000 V: MCT Versus IGBT - F. Bauer, T. Stockmeier, ABB Semiconductors, H. Lendenmann, H. Dettmer, W. Fichtner, Swiss Federal Inst. of Technology, Switzerland	4.3.3	312
TRANSFORMERS AND MAGNETICS	PC 5	
Measurement and Calculation Techniques for Power Losses of Ferrites from KHz to MHz-Range - J. Hess, Siemens Matsushita Components, Germany	5.1	327
Fit Formulae for Power Loss in Ferrites and their Use in Transformer Design - S. A. Mulder, Philips Components, Netherlands	5.2	345
New Ferrite Material for High Frequency Power Transformers - M. Bogs, M. Esquerro, W. Holubarsch, Siemens Matsushita, Germany	5.3	360
Saturable Reactor Cores for SMPS - J. Elias, Metglas Div. Allied Signal Inc., USA	5.4	**
Winding Losses Optimization in a Flyback Converter Transformer - A. Reatti, University of Florence, Italy	5.5	371
Potential-Free AC Current Measurement with Double Current Transformer - L. Erhart, F.A. Himmelstoss, F. C. Zach, University of Vienna, Austria	5.6	383
Design of a Resonant Transformer - M. Schlenk, Siemens Nixdorf, Germany	5.7	391
PACKAGING AND DRIVING	PC 6	
A New Power Package Concept Dedicated to Surface Mount Technology - A. Ehnert, V. Sukumar, SGS-Thomson, Microelectronics, Italy	6.1	401
Successful Power Electronics Packaging Technologies Used with Insulated Metal Substrates - H. Fick, Bergquist, USA	6.2	406
Gate Drive Design for Large Die Mosfets - K. Dierberger, Advanced Power Technology, USA	6.3	416
Novel Primary-Side Controller and Error-Signal Isolator Cs for Switching Power Supplies in Low-Cost Five-Pin Packages - B. P. Erisman, F. Martin, TOKO, USA, R. Redl, Elfi, Switzerland	6.4.a	424
and Smart Insulated-Gate-Transistor Drive with Built-In Current Limit in a Small, Inexpensive Five-Pin One-Watt Package - R. Redl, Elfi, Switzerland, G. T. Reizik, B. P. Erisman, TOKO, USA	6.4.b	437
Dissipation of Heat in Power Electronics - F. Koppe, Keramische Folien, Germany	6.5	444

Technical Papers and Authors	Session No.	Page No.
CONTROL	PC 7	
Recommended Procedures for Practical Small-Signal Analysis of Switching Power Cells - A. S. Kislovski, <i>Ascom Hasler Energy Systems, Switzerland</i>	7.1	448
The Charge Equalizer - the Solution to an old Battery Problem - H. Schmidt, Ch. Siedle, <i>Fraunhofer Institute for Solar Energy Systems, Germany</i>	7.2	461
Automotive Ignition Power Integrated Circuits - V. Sukumar, A. Russo, M. Pesce, S. Sueri, <i>SGS-Thomson Microelectronics, Italy</i>	7.3	471
Analysis of the Multi Output Coupled Inductor in the Continuous Inductor Current Mode for Forward and Push Pull Converters - K. Mehrotra, <i>Hindustan Aeronautics, India</i>	7.4	477
State-Feedback Control-based 100kHz Carrier Switched-mode PWM Power Conversion Amplifier for Magnetic-Gradient Field Current-Tracking Control - H. Fukuda, M. Nakaoka, <i>Kobe University, Japan</i>	7.5	487
ADDITIONAL PAPER - no oral presentation		
Power Tracking Methods in Photovoltaic Applications - A.S. Kislovski, <i>Ascom Energy Systems Ltd., Switzerland</i>		513

** Copies to be handed out at conference
