A CHAPMAN & HALL BOOK

# CONTENTS

<b>Preface</b> .....	<b>xxv</b>
<b>Editors</b> .....	<b>xxvii</b>
<b>Part I. Mathematics</b> .....	<b>1</b>
<b>M1. Arithmetic and Elementary Algebra</b> .....	<b>3</b>
M1.1. Real Numbers .....	3
M1.1.1. Integer Numbers .....	3
M1.1.2. Real, Rational, and Irrational Numbers .....	4
M1.2. Equalities and Inequalities. Arithmetic Operations. Absolute Value .....	5
M1.2.1. Equalities and Inequalities .....	5
M1.2.2. Addition and Multiplication of Numbers .....	5
M1.2.3. Ratios and Proportions .....	6
M1.2.4. Percentage .....	6
M1.2.5. Absolute Value of a Number (Modulus of a Number) .....	7
M1.3. Powers and Logarithms .....	7
M1.3.1. Powers and Roots .....	7
M1.3.2. Logarithms .....	8
M1.4. Binomial Theorem and Related Formulas .....	9
M1.4.1. Factorials. Binomial Coefficients. Binomial Theorem .....	9
M1.4.2. Related Formulas .....	9
M1.5. Progressions .....	10
M1.5.1. Arithmetic Progression .....	10
M1.5.2. Geometric Progression .....	10
M1.6. Mean Values and Some Inequalities .....	11
M1.6.1. Arithmetic Mean, Geometric Mean, and Other Mean Values .....	11
M1.6.2. Inequalities for Mean Values .....	11
M1.6.3. Some Inequalities of General Form .....	11
M1.7. Some Mathematical Methods .....	12
M1.7.1. Proof by Contradiction .....	12
M1.7.2. Mathematical Induction .....	12
M1.7.3. Proof by Counterexample .....	13
Bibliography for Chapter M1 .....	13
<b>M2. Elementary Functions</b> .....	<b>15</b>
M2.1. Power, Exponential, and Logarithmic Functions .....	15
M2.1.1. Power Function: $y = x^\alpha$ .....	15
M2.1.2. Exponential Function: $y = a^x$ .....	17
M2.1.3. Logarithmic Function: $y = \log_a x$ .....	18
M2.2. Trigonometric Functions .....	19
M2.2.1. Trigonometric Circle. Definition of Trigonometric Functions .....	19
M2.2.2. Graphs of Trigonometric Functions .....	21
M2.2.3. Properties of Trigonometric Functions .....	22

M2.3. Inverse Trigonometric Functions .....	26
M2.3.1. Definitions. Graphs of Inverse Trigonometric Functions .....	26
M2.3.2. Properties of Inverse Trigonometric Functions .....	27
M2.4. Hyperbolic Functions .....	29
M2.4.1. Definitions. Graphs of Hyperbolic Functions .....	29
M2.4.2. Properties of Hyperbolic Functions .....	30
M2.5. Inverse Hyperbolic Functions .....	33
M2.5.1. Definitions. Graphs of Inverse Hyperbolic Functions .....	33
M2.5.2. Properties of Inverse Hyperbolic Functions .....	34
Bibliography for Chapter M2 .....	35
<b>M3. Elementary Geometry .....</b>	<b>37</b>
M3.1. Plane Geometry .....	37
M3.1.1. Triangles .....	37
M3.1.2. Polygons .....	43
M3.1.3. Circle .....	46
M3.2. Solid Geometry .....	49
M3.2.1. Straight Lines, Planes, and Angles in Space .....	49
M3.2.2. Polyhedra .....	51
M3.2.3. Solids Formed by Revolution of Lines .....	55
Bibliography for Chapter M3 .....	60
<b>M4. Analytic Geometry .....</b>	<b>61</b>
M4.1. Points, Segments, and Coordinate Plane .....	61
M4.1.1. Cartesian and Polar Coordinates on Plane .....	61
M4.1.2. Distance Between Points. Division of Segment in Given Ratio. Area of a Polygon .....	62
M4.2. Straight Lines and Points on Plane .....	64
M4.2.1. Equations of Straight Lines on Plane .....	64
M4.2.2. Mutual Arrangement of Points and Straight Lines .....	66
M4.3. Quadratic Curves .....	68
M4.3.1. Circle .....	68
M4.3.2. Ellipse .....	69
M4.3.3. Hyperbola .....	71
M4.3.4. Parabola .....	74
M4.3.5. Transformation of Quadratic Curves to Canonical Form .....	75
M4.4. Coordinates, Vectors, Curves, and Surfaces in Space .....	78
M4.4.1. Vectors and Their Properties .....	78
M4.4.2. Coordinate Systems .....	79
M4.4.3. Scalar, Cross, and Scalar Triple Products of Vectors .....	82
M4.5. Line and Plane in Space .....	84
M4.5.1. Plane in Space .....	84
M4.5.2. Line in Space .....	89
M4.5.3. Mutual Arrangement of Points, Lines, and Planes .....	91
M4.6. Quadric Surfaces (Quadrics) .....	96
M4.6.1. Quadrics and Their Canonical Equations .....	96
M4.6.2. Quadrics (General Theory) .....	99
Bibliography for Chapter M4 .....	102

<b>M5. Algebra</b> .....	<b>103</b>
M5.1. Polynomials and Algebraic Equations .....	103
M5.1.1. Polynomials and Their Properties .....	103
M5.1.2. Linear and Quadratic Equations .....	105
M5.1.3. Cubic Equations .....	105
M5.1.4. Fourth-Degree Equation .....	107
M5.1.5. Algebraic Equations of Arbitrary Degree and Their Properties .....	108
M5.2. Determinants and Matrices .....	112
M5.2.1. Determinants .....	112
M5.2.2. Matrices. Types of Matrices. Operations with Matrices .....	114
M5.2.3. Inverse Matrix. Functions of Matrices .....	119
M5.2.4. Eigenvalues and Characteristic Equation of a Matrix. The Cayley–Hamilton Theorem .....	120
M5.3. Systems of Linear Algebraic Equations .....	123
M5.3.1. Consistency Condition for a Linear System .....	123
M5.3.2. Finding Solutions of a System of Linear Equations .....	124
M5.4. Quadratic Forms .....	127
M5.4.1. Quadratic Forms and Their Transformations .....	127
M5.4.2. Canonical and Normal Representations of a Quadratic Form .....	129
M5.5. Linear Spaces .....	131
M5.5.1. Concept of a Linear Space. Its Basis and Dimension .....	131
M5.5.2. Subspaces of Linear Spaces .....	134
M5.5.3. Coordinate Transformations Corresponding to Basis Transformations in a Linear Space .....	135
M5.5.4. Euclidean Space .....	136
Bibliography for Chapter M5 .....	138
<b>M6. Limits and Derivatives</b> .....	<b>139</b>
M6.1. Basic Concepts of Mathematical Analysis .....	139
M6.1.1. Number Sets. Functions of Real Variable .....	139
M6.1.2. Limit of a Sequence .....	141
M6.1.3. Limit of a Function. Asymptotes .....	144
M6.1.4. Infinitely Small and Infinitely Large Functions .....	146
M6.1.5. Continuous Functions. Discontinuities of the First and the Second Kind .....	147
M6.1.6. Convex and Concave Functions .....	148
M6.1.7. Convergence of Functions .....	149
M6.2. Differential Calculus for Functions of a Single Variable .....	150
M6.2.1. Derivative and Differential: Their Geometrical and Physical Meaning .....	150
M6.2.2. Table of Derivatives and Differentiation Rules .....	151
M6.2.3. Theorems about Differentiable Functions. L'Hospital Rule .....	153
M6.2.4. Higher-Order Derivatives and Differentials. Taylor's Formula .....	154
M6.2.5. Extremal Points. Points of Inflection .....	156
M6.2.6. Qualitative Analysis of Functions and Construction of Graphs .....	158
M6.2.7. Approximate Solution of Equations (Root-Finding Algorithms for Continuous Functions) .....	160

M6.3. Functions of Several Variables. Partial Derivatives .....	162
M6.3.1. Point Sets. Functions. Limits and Continuity .....	162
M6.3.2. Differentiation of Functions of Several Variables .....	163
M6.3.3. Directional Derivative. Gradient. Geometrical Applications .....	166
M6.3.4. Extremal Points of Functions of Several Variables .....	167
M6.3.5. Differential Operators of the Field Theory .....	170
Bibliography for Chapter M6 .....	170
<b>M7. Integrals .....</b>	<b>171</b>
M7.1. Indefinite Integral .....	171
M7.1.1. Antiderivative. Indefinite Integral and Its Properties .....	171
M7.1.2. Table of Basic Integrals. Properties of the Indefinite Integral. Examples of Integration .....	172
M7.1.3. Integration of Rational Functions .....	174
M7.1.4. Integration of Irrational Functions .....	177
M7.1.5. Integration of Exponential and Trigonometric Functions .....	179
M7.1.6. Integration of Polynomials Multiplied by Elementary Functions ...	181
M7.2. Definite Integral .....	183
M7.2.1. Basic Definitions. Classes of Integrable Functions. Geometrical Meaning of the Definite Integral .....	183
M7.2.2. Properties of Definite Integrals and Useful Formulas .....	184
M7.2.3. Asymptotic Formulas for the Calculation of Integrals .....	185
M7.2.4. Mean Value Theorems. Properties of Integrals in Terms of Inequalities .....	187
M7.2.5. Geometric and Physical Applications of the Definite Integral .....	188
M7.2.6. Improper Integrals with Infinite Integration Limits .....	190
M7.2.7. Improper Integrals of Unbounded Functions .....	193
M7.2.8. Approximate (Numerical) Methods for Computation of Definite Integrals .....	194
M7.3. Double and Triple Integrals .....	195
M7.3.1. Definition and Properties of the Double Integral .....	195
M7.3.2. Computation of the Double Integral .....	197
M7.3.3. Geometric and Physical Applications of the Double Integral .....	199
M7.3.4. Definition and Properties of the Triple Integral .....	200
M7.3.5. Computation of the Triple Integral. Some Applications. Iterated Integrals and Asymptotic Formulas .....	201
M7.4. Line and Surface Integrals .....	203
M7.4.1. Line Integral of the First Kind .....	203
M7.4.2. Line Integral of the Second Kind .....	205
M7.4.3. Surface Integral of the First Kind .....	206
M7.4.4. Surface Integral of the Second Kind .....	207
M7.4.5. Integral Formulas of Vector Calculus .....	208
Bibliography for Chapter M7 .....	209
<b>M8. Series .....</b>	<b>211</b>
M8.1. Numerical Series and Infinite Products .....	211
M8.1.1. Convergent Numerical Series and Their Properties. Cauchy's Criterion .....	211
M8.1.2. Convergence Criteria for Series with Positive (Nonnegative) Terms	212
M8.1.3. Convergence Criteria for Arbitrary Numerical Series. Absolute and Conditional Convergence .....	213

M8.1.4. Multiplication of Series. Some Inequalities .....	215
M8.2. Function Series .....	215
M8.2.1. Pointwise and Uniform Convergence of Function Series .....	215
M8.2.2. Basic Criteria of Uniform Convergence. Properties of Uniformly Convergent Series .....	216
M8.3. Power Series .....	218
M8.3.1. Radius of Convergence of Power Series. Properties of Power Series	218
M8.3.2. Taylor and Maclaurin Power Series .....	220
M8.3.3. Operations with Power Series. Summation Formulas for Power Series .....	221
M8.4. Fourier Series .....	223
M8.4.1. Representation of $2\pi$ -Periodic Functions by Fourier Series. Main Results .....	223
M8.4.2. Fourier Expansions of Periodic, Nonperiodic, Even, and Odd Functions .....	225
M8.4.3. Criteria of Uniform and Mean-Square Convergence of Fourier Series	226
Bibliography for Chapter M8 .....	227
<b>M9. Functions of Complex Variable .....</b>	<b>229</b>
M9.1. Complex Numbers .....	229
M9.1.1. Definition of a Complex Number. Arithmetic Operations with Complex Numbers .....	229
M9.1.2. Trigonometric Form of Complex Numbers. Powers and Radicals ..	230
M9.2. Functions of Complex Variables .....	231
M9.2.1. Basic Concepts. Differentiation of a Function of a Complex Variable	231
M9.2.2. Integration of Functions of Complex Variables .....	238
M9.2.3. Taylor and Laurent Series .....	241
M9.2.4. Zeros and Isolated Singularities of Analytic Functions .....	243
M9.2.5. Residues. Calculation of Definite Integrals .....	245
Bibliography for Chapter M9 .....	249
<b>M10. Integral Transforms .....</b>	<b>251</b>
M10.1. General Form of Integral Transforms. Inversion Formulas .....	251
M10.2. Laplace Transform .....	251
M10.2.1. Laplace Transform and the Inverse Laplace Transform .....	251
M10.2.2. Main Properties of the Laplace Transform. Inversion Formulas for Some Functions .....	252
M10.2.3. Limit Theorems. Representation of Inverse Transforms as Convergent Series .....	255
M10.3. Various Forms of the Fourier Transform .....	255
M10.3.1. Fourier Transform and the Inverse Fourier Transform .....	255
M10.3.2. Fourier Cosine and Sine Transforms .....	257
M10.4. Mellin Transform and Other Transforms .....	258
M10.4.1. Mellin Transform and the Inversion Formula .....	258
M10.4.2. Main Properties of the Mellin Transform. Relation Among the Mellin, Laplace, and Fourier Transforms .....	259
M10.4.3. Summary Table of Integral Transforms .....	259
Bibliography for Chapter M10 .....	260

<b>M11. Ordinary Differential Equations</b> .....	<b>261</b>
M11.1. First-Order Differential Equations .....	261
M11.1.1. General Concepts. The Cauchy Problem. Uniqueness and Existence Theorems .....	261
M11.1.2. Equations Solved for the Derivative. Simplest Techniques of Integration .....	263
M11.1.3. Exact Differential Equations. Integrating Factor .....	265
M11.1.4. Riccati Equation .....	267
M11.1.5. Equations Not Solved for the Derivative .....	268
M11.1.6. Approximate Analytic Methods for Solution of Equations .....	269
M11.1.7. Numerical Integration of Differential Equations .....	270
M11.2. Second-Order Linear Differential Equations .....	271
M11.2.1. Formulas for the General Solution. Some Transformations .....	271
M11.2.2. Representation of Solutions as a Series in the Independent Variable	274
M11.2.3. Boundary Value Problems .....	276
M11.2.4. Eigenvalue Problems .....	277
M11.3. Second-Order Nonlinear Differential Equations .....	281
M11.3.1. Form of the General Solution. Cauchy Problem .....	281
M11.3.2. Equations Admitting Reduction of Order .....	281
M11.3.3. Methods of Regular Series Expansions with Respect to the Independent Variable .....	283
M11.3.4. Perturbation Methods in Problems with a Small Parameter .....	284
M11.3.5. Galerkin Method and Its Modifications (Projection Methods) .....	287
M11.3.6. Iteration and Numerical Methods .....	291
M11.4. Linear Equations of Arbitrary Order and Linear Systems of Equations .....	292
M11.4.1. Linear Equations with Constant Coefficients .....	292
M11.4.2. Linear Equations with Variable Coefficients .....	296
M11.4.3. Systems of Linear Equations with Constant Coefficients .....	298
M11.5. Nonlinear Equations of Arbitrary Order .....	301
M11.5.1. Structure of the General Solution. Cauchy Problem .....	301
M11.5.2. Equations Admitting Reduction of Order .....	302
Bibliography for Chapter M11 .....	303
<b>M12. Partial Differential Equations</b> .....	<b>305</b>
M12.1. First-Order Quasilinear Partial Differential Equations .....	305
M12.1.1. Characteristic System. General Solution .....	305
M12.1.2. Cauchy Problem .....	306
M12.2. Classification of Second-Order Linear Partial Differential Equations .....	307
M12.2.1. Equations with Two Independent Variables .....	307
M12.2.2. Equations with Many Independent Variables .....	310
M12.3. Basic Problems for Linear Equations of Mathematical Physics .....	311
M12.3.1. Initial and Boundary Conditions. Cauchy Problem. Boundary Value Problems .....	311
M12.3.2. First, Second, Third, and Mixed Boundary Value Problems .....	313
M12.4. Properties and Exact Solutions of Linear Equations .....	314
M12.4.1. Homogeneous Linear Equations and Their Particular Solutions ..	314
M12.4.2. Nonhomogeneous Linear Equations and Their Particular Solutions	319

M12.5. Method of Separation of Variables (Fourier Method) .....	320
M12.5.1. Solution of Problems for Parabolic Equations .....	320
M12.5.2. Solution of Problems for Hyperbolic Equations .....	324
M12.5.3. Solution of Problems for Elliptic Equations .....	326
M12.6. Integral Transforms Method .....	328
M12.6.1. Laplace Transform and Its Application to Linear Mathematical Physics Equations .....	328
M12.6.2. Fourier Transform and Its Application for Linear Equations of Mathematical Physics .....	331
M12.7. Boundary Value Problems for Parabolic Equations with One Space Variable. Green's Function .....	332
M12.7.1. Representation of Solutions via the Green's Function .....	332
M12.7.2. Problems for Parabolic Equation $\rho(x)\frac{\partial w}{\partial t} = \frac{\partial}{\partial x} [p(x)\frac{\partial w}{\partial x}] - q(x)w +$ $\Phi(x, t)$ .....	334
M12.8. Boundary Value Problems for Hyperbolic Equations with One Space Variable. Green's Function. Goursat Problem .....	336
M12.8.1. Representation of Solutions in terms of the Green's Function ....	336
M12.8.2. Problems for Hyperbolic Equation $\rho(x)\frac{\partial^2 w}{\partial t^2} = \frac{\partial}{\partial x} [p(x)\frac{\partial w}{\partial x}] - q(x)w +$ $\Phi(x, t)$ .....	338
M12.8.3. Goursat Problem (a Problem with Initial Data of Characteristics)	340
M12.9. Boundary Value Problems for Elliptic Equations with Two Space Variables	342
M12.9.1. Problems and the Green's Functions for Equation $a(x)\frac{\partial^2 w}{\partial x^2} + \frac{\partial^2 w}{\partial y^2} +$ $b(x)\frac{\partial w}{\partial x} + c(x)w = -\Phi(x, y)$ .....	342
M12.9.2. Representation of Solutions to Boundary Value Problems via the Green's Functions .....	343
M12.9.3. Solutions of Problems for the Laplace Equation in the Polar Coordinate System .....	344
M12.10. Problems with Many Space Variables. Representation of Solutions via Green's Functions .....	345
M12.10.1. Boundary Value Problems for Parabolic Equations .....	345
M12.10.2. Boundary Value Problems for Hyperbolic Equations .....	347
M12.10.3. Boundary Value Problems for Elliptic Equations .....	348
M12.10.4. Construction of the Green's Functions. General Formulas and Relations .....	348
M12.11. Duhamel's Principles in Nonstationary Problems .....	349
M12.11.1. Problems for Homogeneous Linear Equations .....	349
M12.11.2. Problems for Nonhomogeneous Linear Equations .....	351
Bibliography for Chapter M12 .....	352
<b>M13. Special Functions and Their Properties .....</b>	<b>355</b>
M13.1. Some Coefficients, Symbols, and Numbers .....	355
M13.1.1. Factorials. Binomial Coefficients. Pochhammer Symbol .....	355
M13.1.2. Bernoulli Numbers .....	356
M13.2. Error Functions. Exponential and Logarithmic Integrals .....	356
M13.2.1. Error Function and Complementary Error Function .....	356
M13.2.2. Exponential Integral .....	357
M13.2.3. Logarithmic Integral .....	357

M13.3. Sine Integral and Cosine Integral. Fresnel Integrals .....	358
M13.3.1. Sine Integral .....	358
M13.3.2. Cosine Integral .....	358
M13.3.3. Fresnel Integrals .....	359
M13.4. Gamma Function, Psi Function, and Beta Function .....	359
M13.4.1. Gamma Function .....	359
M13.4.2. Psi Function (Digamma Function) .....	360
M13.4.3. Beta Function .....	361
M13.5. Incomplete Gamma Function .....	361
M13.5.1. Integral Representations. Recurrence Formulas .....	361
M13.5.2. Expansions as $x \rightarrow 0$ and $x \rightarrow \infty$ . Relation to Other Functions .....	362
M13.6. Bessel Functions (Cylinder Functions) .....	362
M13.6.1. Definitions and Basic Formulas .....	362
M13.6.2. Integral Representations and Asymptotic Expansions .....	364
M13.7. Modified Bessel Functions .....	365
M13.7.1. Definitions. Basic Formulas .....	365
M13.7.2. Integral Representations and Asymptotic Expansions .....	366
M13.8. Degenerate Hypergeometric Functions (Kummer Functions) .....	367
M13.8.1. Definitions and Basic Formulas .....	367
M13.8.2. Integral Representations and Asymptotic Expansions .....	370
M13.9. Elliptic Integrals .....	370
M13.9.1. Complete Elliptic Integrals .....	370
M13.9.2. Incomplete Elliptic Integrals .....	372
M13.10. Orthogonal Polynomials .....	373
M13.10.1. Legendre Polynomials and Legendre Functions .....	373
M13.10.2. Laguerre Polynomials and Generalized Laguerre Polynomials .....	375
M13.10.3. Chebyshev Polynomials .....	376
M13.10.4. Hermite Polynomials .....	377
Bibliography for Chapter M13 .....	378
<b>M14. Probability Theory .....</b>	<b>379</b>
M14.1. Basic Concepts and Simplest Probabilistic Models .....	379
M14.1.1. Rules and Formulas of Combinatorics .....	379
M14.1.2. Probabilities of Random Events .....	380
M14.1.3. Conditional Probability. Total Probability Formula .....	382
M14.1.4. Sequence of Trials .....	384
M14.2. Random Variables and Their Characteristics .....	386
M14.2.1. One-Dimensional Random Variables .....	386
M14.2.2. Expectation, Variance and Moments of a Random Variable .....	388
M14.2.3. Main Discrete Distributions and Their Numerical Characteristics .....	390
M14.2.4. Main Continuous Distributions and Their Numerical Characteristics .....	393
M14.2.5. Two-dimensional and Multivariate Random Variables .....	396
M14.3. Limit Theorems .....	399
M14.3.1. Convergence of Random Variables .....	399
M14.3.2. Limit Theorems .....	400
Bibliography for Chapter M14 .....	402

<b>Part II. Physics</b>	<b>403</b>
<b>P1. Physical Foundations of Mechanics</b>	<b>405</b>
P1.1. Kinematics of a Point	405
P1.1.1. Basic Definitions. Velocity and Acceleration	405
P1.1.2. The Direct and Inverse Problems of Kinematics	406
P1.1.3. Circular Motion	407
P1.1.4. Relativity of Motion. Addition of Velocities	407
P1.2. Kinematics of a Rigid Body	408
P1.2.1. Translational and Rotational Motion. Plane Motion	408
P1.2.2. Instantaneous Axis of Rotation. Addition of Angular Velocities. Motion Relative to a Rotational Frame	408
P1.3. Dynamics	410
P1.3.1. Newton's First Law. Mass. Momentum. Force	410
P1.3.2. Newton's Second and Third Laws	411
P1.3.3. Action at a Distance. Causality. Natural Forces	411
P1.3.4. Galilean Relativity Principle	412
P1.4. Law of Conservation of Momentum	413
P1.4.1. Center of Mass. Momentum of a System of Particles	413
P1.4.2. Law of Conservation of Momentum. Motion of Center of Mass	414
P1.5. Law of Conservation of Energy	415
P1.5.1. Work and Power. Kinetic Energy	415
P1.5.2. Conservative Forces. Potential Energy	416
P1.5.3. Mechanical Energy of a System of Particles. Law of Conservation of Mechanical Energy	418
P1.5.4. Potential Curves. Stability	419
P1.6. Law of Conservation of Angular Momentum	420
P1.6.1. Moment of Force. Net Force	420
P1.6.2. Angular Momentum of a Particle. Motion in Central Field	421
P1.6.3. Conservation of Angular Momentum for a System of Particles	423
P1.6.4. Two-Body Problem. Reduced Mass	424
P1.7. Gravitational Field	425
P1.7.1. Law of Universal Gravitation. Superposition Principle	425
P1.7.2. Strength and Potential of Gravitational Field	426
P1.7.3. Motion in a Central Field of Gravity. Kepler's Laws. Orbital and Escape Velocities	427
P1.8. Non-Inertial Reference Frames	427
P1.8.1. Definition of Fictitious Forces	427
P1.8.2. Translationally Moving Non-Inertial Frames	428
P1.8.3. Uniformly Rotating Reference Frame	428
P1.9. Dynamics of Rigid Body	429
P1.9.1. Rotation About a Fixed Axis	429
P1.9.2. Properties of Moment of Inertia	430
P1.9.3. Plane Motion of a Rigid Body	431
P1.9.4. Motion with a Fixed Point	432
P1.10. Special Theory of Relativity	434
P1.10.1. Basics of the Special Theory of Relativity	434
P1.10.2. Consequences of the Lorentz Transformations. STR Kinematics	435
P1.10.3. STR Dynamics	437
Bibliography for Chapter P1	439

<b>P2. Molecular Physics and Thermodynamics</b> .....	<b>441</b>
P2.1. Basic Principles and Definitions .....	441
P2.1.1. Two Approaches to Studying Matter .....	441
P2.1.2. Equation of State .....	441
P2.2. First Law of Thermodynamics .....	443
P2.2.1. Quantity of Heat. Internal Energy .....	443
P2.2.2. First Law of Thermodynamics .....	443
P2.2.3. First Law of Thermodynamics for an Ideal Gas .....	445
P2.3. Second Law of Thermodynamics .....	446
P2.3.1. Formulations .....	446
P2.3.2. Carnot's Theorem .....	446
P2.3.3. Calculation of the Internal Energy .....	447
P2.4. Entropy .....	448
P2.4.1. Clausius Inequality .....	448
P2.4.2. Definition of Entropy .....	449
P2.4.3. Direction of Non-Equilibrium Processes in a Thermally Insulated System .....	449
P2.4.4. Statistical Meaning of Entropy .....	450
P2.4.5. Third Law of Thermodynamics .....	451
P2.4.6. Thermodynamic Potentials .....	451
P2.5. Kinetic Theory of Ideal Gases .....	453
P2.5.1. The Basic Equation of the Kinetic Theory .....	453
P2.5.2. Temperature and Energy of an Ideal Gas .....	454
P2.5.3. Maxwell's Distribution .....	456
P2.5.4. Boltzmann's Distribution .....	457
P2.6. Real Gases. Van Der Waals Equation .....	458
P2.6.1. Isotherms of a Real Gas .....	458
P2.6.2. Van Der Waals Equation .....	459
P2.7. Phase Equilibrium. Phase Transitions .....	461
P2.7.1. Conditions for Phase Equilibrium .....	461
P2.7.2. First-Order Phase Transitions .....	462
P2.8. Surface Tension .....	462
P2.8.1. Surface Energy .....	462
P2.8.2. Additional Pressure Under a Curved Surface .....	463
P2.8.3. Wetting. Capillary Effects .....	464
P2.9. Transfer Phenomena in Gases .....	464
P2.9.1. Collision of Molecules in a Gas .....	464
P2.9.2. Qualitative Model of Transfer Phenomena in Gases .....	465
Bibliography for Chapter P2 .....	467
<b>P3. Electrodynamics</b> .....	<b>469</b>
P3.1. Electric Charge. Coulomb's Law .....	469
P3.1.1. Electric Charge and Its Properties .....	469
P3.1.2. Coulomb's Law .....	470
P3.2. Electric Field. Strength and Potential .....	470
P3.2.1. Strength of Electric Field .....	470
P3.2.2. Potential of an Electrostatic Field .....	472

P3.3. Gauss's Theorem .....	474
P3.3.1. Statement of the Theorem .....	474
P3.3.2. Application of Gauss's Theorem .....	475
P3.4. Conductors and Capacitors .....	477
P3.4.1. Electrostatics of Conductors .....	477
P3.4.2. Capacitors .....	479
P3.5. Electrostatics of Dielectrics .....	481
P3.5.1. Polarization of Dielectrics .....	481
P3.5.2. Types of Dielectric and Polarization Mechanisms .....	484
P3.6. Energy of Electrostatic Field .....	485
P3.6.1. Energy of a System of Charges .....	485
P3.6.2. Energy of an Electrostatic Field .....	486
P3.7. Direct Current .....	488
P3.7.1. Electric Current in a Circuit .....	488
P3.7.2. Current in a Closed Circuit .....	490
P3.7.3. Classical Free-Electron Theory of Metals .....	491
P3.8. Constant Magnetic Field .....	492
P3.8.1. Lorentz Force and Ampère Force .....	492
P3.8.2. Calculation of Magnetic Induction .....	494
P3.8.3. Ampère's Circuital Law and Flux of Magnetic Induction .....	496
P3.9. Magnetic Field in Matter .....	498
P3.9.1. Magnetization. Molecular Currents .....	498
P3.9.2. Types of Magnetic Materials and Magnetization Mechanisms .....	500
P3.10. Electromagnetic Induction .....	502
P3.10.1. Faraday's Law of Electromagnetic Induction .....	502
P3.10.2. Self-Induction and Mutual Induction .....	504
P3.10.3. Energy of Magnetic Field .....	505
P3.11. Maxwell's Equations .....	506
P3.11.1. Maxwell's Equations in Vacuum and Matter .....	506
P3.11.2. Law of Conservation of Energy for Electromagnetic Fields .....	508
P3.11.3. Relativistic Properties of Fields .....	509
Bibliography for Chapter P3 .....	510
<b>P4. Oscillations and Waves .....</b>	<b>511</b>
P4.1. Oscillations .....	511
P4.1.1. Harmonic Oscillations. Composition of Oscillations .....	511
P4.1.2. Free Undamped Oscillations .....	513
P4.1.3. Damped and Forced Oscillations .....	517
P4.2. Wave Processes .....	521
P4.2.1. Elastic and Acoustic Waves .....	521
P4.2.2. Electromagnetic Waves .....	528
Bibliography for Chapter P4 .....	533
<b>P5. Optics .....</b>	<b>535</b>
P5.1. Geometric Optics. Radiometry .....	535
P5.1.1. Geometric Optics .....	535
P5.1.2. Radiometry and Photometry .....	537

P5.2. Wave Properties of Light .....	539
P5.2.1. Interference of Light .....	539
P5.2.2. Diffraction .....	545
P5.3. Interaction Between Light and Matter .....	551
P5.3.1. Light Polarization. Fresnel Formulas .....	551
P5.3.2. Light Dispersion and Absorption .....	555
P5.4. Foundations of Quantum Optics .....	558
P5.4.1. Thermal Radiation .....	558
P5.4.2. Light Quanta .....	562
P5.4.3. Principle of Laser Operation .....	565
Bibliography for Chapter P5 .....	568
<b>P6. Quantum Mechanics. Atomic Physics .....</b>	<b>569</b>
P6.1. Atomic Structure. Bohr Model .....	569
P6.1.1. Nuclear Atomic Model .....	569
P6.1.2. Bohr Model .....	570
P6.2. Elements of Quantum Mechanics .....	573
P6.2.1. Wave Function. Uncertainty Relation .....	573
P6.2.2. The Schrödinger Equation .....	574
P6.2.3. Operator Approach in Quantum Mechanics .....	578
P6.2.4. Motion in a Central Field. Hydrogen Atom .....	580
P6.2.5. Electron Spin and Fine Structure of the Spectrum .....	585
P6.3. Structure and Spectra of Complex Atoms .....	586
P6.3.1. Pauli Exclusion Principle. Structure of Complex Atoms .....	586
P6.3.2. Spectra of Complex Atoms .....	588
P6.4. Elements of Physics of Molecules .....	591
P6.4.1. Classification of Levels of a Molecule .....	592
P6.4.2. Electron Energy. Theory of Chemical Bond .....	593
P6.4.3. Vibrational and Rotational Spectra .....	594
Bibliography for Chapter P6 .....	596
<b>P7. Quantum Theory of Crystals .....</b>	<b>597</b>
P7.1. Quantum Statistical Distributions and Their Application .....	597
P7.1.1. Elements of Quantum Statistics .....	597
P7.1.2. Electron Gas in Metal .....	601
P7.1.3. Heat Capacity of Crystal Lattice. Phonons .....	604
P7.2. Electrons in a Periodic Field. Energy Bands .....	608
P7.2.1. Qualitative Theory of Energy Bands .....	609
P7.2.2. Quantum Mechanical Description of Energy Regions .....	611
P7.2.3. Dynamics of Electron in Crystal .....	612
P7.2.4. Band Theory of Semiconductors .....	614
Bibliography for Chapter P7 .....	616
<b>P8. Elements of Nuclear Physics .....</b>	<b>617</b>
P8.1. Basic Properties of Nuclei .....	617
P8.1.1. Characteristics of Nuclei .....	617
P8.1.2. Nuclear Forces .....	621
P8.1.3. Nuclear Models .....	623

P8.2. Nuclear Transformations .....	625
P8.2.1. Radioactivity .....	625
P8.2.2. Nuclear Reactions .....	632
P8.3. Nuclear Power Engineering .....	637
P8.3.1. Nuclear Fission .....	637
P8.3.2. Fusion Reactions .....	641
P8.4. Subatomic Particles .....	642
P8.4.1. Classes of Subatomic Particles .....	643
P8.4.2. Characteristics of Particles .....	647
P8.4.3. Interaction Unification .....	650
Bibliography for Chapter P8 .....	651
<b>Part III. Elements of Applied and Engineering Sciences</b> .....	<b>653</b>
<b>E1. Dimensions and Similarity</b> .....	<b>655</b>
E1.1. Dimensions .....	655
E1.1.1. Basic and Derived Units of Measurement. Systems of Units of Measurement .....	655
E1.1.2. Dimensional and Dimensionless Quantities. Dimensional Formula ..	655
E1.2. The $\pi$ -Theorem and Its Practical Use .....	656
E1.2.1. The $\pi$ -Theorem .....	656
E1.2.2. Simplest Examples of the Use of the $\pi$ -Theorem .....	659
E1.3. Similarity and Simulation. General Remarks .....	664
E1.3.1. Similarity and Simulation .....	664
E1.3.2. General Concluding Remarks .....	665
Bibliography for Chapter E1 .....	665
<b>E2. Mechanics of Point Particles and Rigid Bodies</b> .....	<b>667</b>
E2.1. Kinematics .....	667
E2.1.1. Kinematics of a Point .....	667
E2.1.2. Kinematics of a Rigid Body .....	671
E2.1.3. Plane-Parallel (Plane) Motion of a Rigid Body .....	675
E2.1.4. Arbitrary Motion of a Rigid Body .....	678
E2.1.5. Compound Motion of a Point .....	681
E2.1.6. Compound Motion of a Body .....	684
E2.2. Basic Notions and Laws of Mechanics .....	687
E2.2.1. Basic Notions of Mechanics .....	687
E2.2.2. Basic Laws of Mechanics .....	689
E2.3. Statics .....	690
E2.3.1. Basic Laws and Theorems of Statics .....	690
E2.3.2. Balance Conditions for a System of Forces Applied to a Rigid Body	692
E2.3.3. Solution of the Problems of Statics .....	693
E2.3.4. Center of Parallel Forces. Center of Gravity of a Rigid Body .....	698
E2.3.5. Distributed Forces .....	699
E2.3.6. Friction Laws (Coulomb Laws) .....	700
E2.4. Dynamics of a Point Particle .....	701
E2.4.1. Equations of Motion of a Point Particle .....	701
E2.4.2. First and Second Problems of Dynamics .....	702

E2.5. General Theorems of Dynamics of a Mechanical System .....	703
E2.5.1. Basic Notions and Definitions .....	703
E2.5.2. Theorem on the Motion of the Center of Mass .....	707
E2.5.3. Theorem on the Momentum .....	708
E2.5.4. Theorem on the Angular Momentum .....	710
E2.5.5. Theorem on the Kinetic Energy .....	712
E2.6. Elements of Analytical Mechanics .....	716
E2.6.1. D'Alembert's Principle .....	716
E2.6.2. Classification of Mechanical Constraints. Generalized Coordinates ..	718
E2.6.3. Principle of Virtual Displacements .....	720
E2.6.4. General Equation of Dynamics (d'Alembert-Lagrange Principle) ...	722
E2.6.5. Lagrange Equations of the Second Kind .....	723
E2.7. Small Oscillations of Mechanical Systems .....	724
E2.7.1. Preliminaries .....	724
E2.7.2. Small Oscillations of a Conservative System .....	725
E2.7.3. Normal Coordinates .....	727
E2.7.4. Influence of Small Dissipative Forces on System Oscillations .....	728
E2.7.5. Forced Oscillations .....	729
E2.8. Dynamics of an Absolutely Rigid Body .....	730
E2.8.1. Rotation of a Rigid Body about a Fixed Axis .....	730
E2.8.2. Plane-Parallel (Plane) Motion of a Rigid Body .....	731
E2.8.3. Motion of a Rigid Body about a Fixed Point .....	732
E2.8.4. Elementary Theory of Gyroscope .....	737
E2.9. Elementary Theory of Impact .....	738
Bibliography for Chapter E2 .....	743
<b>E3. Elements of Strength of Materials .....</b>	<b>745</b>
E3.1. Basic Notions .....	745
E3.1.1. Introduction. External and Internal Forces .....	745
E3.1.2. Stresses and Strains at a Point .....	746
E3.1.3. Basic Notions and Hypotheses .....	747
E3.2. Stress-Strain State at a Point .....	748
E3.2.1. Types of Stress State .....	748
E3.2.2. Uniaxial Tension and Compression .....	748
E3.2.3. Simple Shear .....	749
E3.3. Central Tension and Compression .....	750
E3.3.1. Longitudinal Force .....	750
E3.3.2. Stresses and Strains under Tension or Compression .....	751
E3.3.3. Strength Analysis under Tension and Compression .....	752
E3.4. Torsion .....	753
E3.4.1. Twisting Moment .....	753
E3.4.2. Stresses and Strains in Torsion .....	753
E3.4.3. Strength Analysis in Torsion .....	755
E3.5. Symmetrical Bending .....	755
E3.5.1. Bending Moment and Transverse Force .....	755
E3.5.2. Stresses and Strains under Symmetric Pure Bending .....	758
E3.5.3. Stresses and Strains in Symmetric Lateral Bending .....	760
E3.5.4. Strength Analysis in the Case of Symmetric Bending .....	761

E3.6. Combined Stress .....	763
E3.6.1. Oblique Bending .....	763
E3.6.2. Eccentric Extension or Compression .....	765
E3.6.3. Bending with Torsion .....	766
E3.7. Stability of Compressed Rods .....	768
E3.7.1. Critical Force .....	768
E3.7.2. Euler Formula .....	768
E3.7.3. Influence of Methods for Fixation of the Rod Ends on the Value of the Critical Force .....	770
E3.7.4. Scope of the Euler Formula .....	770
E3.7.5. Stability Analysis of Compressed Rods .....	771
Bibliography for Chapter E3 .....	771
<b>E4. Hydrodynamics .....</b>	<b>773</b>
E4.1. Hydrostatics .....	773
E4.1.1. Properties of Incompressible Fluid at Rest. Basic Law of Hydrostatics .....	773
E4.1.2. Force of Pressure on a Plane and on a Curved Wall .....	774
E4.1.3. Archimedes Principle. Stability of Floating Bodies .....	777
E4.2. Hydrodynamic Equations and Boundary Conditions .....	778
E4.2.1. Laminar Flows. Navier–Stokes Equations. Euler Equations .....	779
E4.2.2. Initial Conditions and the Simplest Boundary Conditions .....	781
E4.2.3. Turbulent Flows. Reynolds Equations .....	782
E4.3. Hydrodynamics of Thin Films .....	784
E4.3.1. Preliminary Remarks. Different Regimes of Film Type Flow .....	784
E4.3.2. Films on an Inclined Plane and on a Cylindrical Surface .....	785
E4.4. Fluid Flows in Tubes .....	786
E4.4.1. Laminar Flows in Tubes of Various Cross-Sections .....	786
E4.4.2. Turbulent Flows in Tubes .....	791
E4.5. Hydrodynamic Boundary Layers on a Flat Plate .....	796
E4.5.1. Laminar Boundary Layer .....	796
E4.5.2. Turbulent Boundary Layer .....	798
E4.6. Spherical Particles and Circular Cylinders in Translational Flow .....	800
E4.6.1. Stokes Equations and Their Solution for the Axisymmetric Case ....	800
E4.6.2. Spherical Particles in Translational Stokes Flow (at $Re \rightarrow 0$ ) .....	802
E4.6.3. Spherical Particles in Translational Flow in a Wide Range of $Re$ ....	803
E4.6.4. Translational Flow Past a Cylinder (the Plane Problem) .....	804
E4.7. Spherical Drops and Bubbles in Translational Flow .....	806
E4.7.1. Spherical Drops and Bubbles in Translational Stokes Flow (at $Re \rightarrow 0$ ) .....	806
E4.7.2. Spherical Drops and Bubbles in Translational Flow at Various Reynolds Numbers .....	808
E4.8. Flow Past Nonspherical Particles .....	809
E4.8.1. Translational Stokes Flow Past Ellipsoidal Particles .....	809
E4.8.2. Translational Stokes Flow Past Bodies of Revolution .....	811
E4.8.3. Translational Stokes Flow Past Particles of Arbitrary Shape .....	812
E4.8.4. Sedimentation of Isotropic and Nonisotropic Particles .....	814
E4.8.5. Flow Past Nonspherical Particles at Various Reynolds Numbers ....	815

E4.9. Motion of Several Particles. Effective Viscosity of Suspensions .....	816
E4.9.1. Motion of Two Spheres. Gravitational Sedimentation of Several Spheres .....	816
E4.9.2. Rate of Suspension Precipitation. Effective Viscosity of Suspensions .....	818
Bibliography for Chapter E4 .....	819
<b>E5. Mass and Heat Transfer .....</b>	<b>821</b>
E5.1. Convective Mass and Heat Transfer. Equations and Boundary Conditions ...	821
E5.1.1. Mass and Heat Transfer in Laminar Flows .....	821
E5.1.2. Basic Dimensionless Parameters. Diffusion Fluxes and the Sherwood Number .....	824
E5.1.3. Mass and Heat Transfer in Turbulent Flows .....	825
E5.2. Mass Transfer in Liquid Films .....	826
E5.2.1. Mass Exchange Between Gases and Liquid Films .....	826
E5.2.2. Dissolution of a Plate by a Laminar Liquid Film .....	829
E5.3. Heat Transfer to a Flat Plate .....	831
E5.3.1. Heat Transfer in Laminar Flow .....	831
E5.3.2. Heat Transfer in Turbulent Flow .....	832
E5.4. Convective Heat and Mass Transfer in Tubes and Channels .....	834
E5.4.1. Heat and Mass Transfer in a Circular Tube with Constant Temperature of the Wall for Laminar Flows .....	834
E5.4.2. Heat and Mass Transfer in a Circular Tube with Constant Heat Flux at the Wall for Laminar Flows .....	838
E5.4.3. Heat and Mass Transfer in Plane Channels for Laminar Flows .....	839
E5.4.4. Turbulent Heat Transfer in Circular Tube and Plane Channel .....	841
E5.4.5. Limit Nusselt Numbers for Tubes of Various Cross-Sections .....	843
E5.5. Interior Heat Problems for Solid Bodies of Various Shapes .....	845
E5.5.1. Statement of the Problem .....	845
E5.5.2. Bulk Temperature for Bodies of Various Shapes .....	845
E5.6. Mass and Heat Exchange Between Particles of Various Shapes and a Quiescent Medium .....	847
E5.6.1. Stationary Mass and Heat Exchange .....	847
E5.6.2. Transient Mass and Heat Exchange .....	849
E5.7. Mass and Heat Transfer to a Spherical Particle in a Translational Flow .....	850
E5.7.1. Statement of the Problem .....	850
E5.7.2. Mass Transfer at Low Reynolds Numbers and Various Peclet Numbers .....	851
E5.7.3. Mass Transfer at Moderate and High Reynolds Numbers .....	852
E5.8. Mass and Heat Transfer to Spherical Drops and Bubbles in Translational Flow .....	853
E5.8.1. Statement of the Problem. Some Remarks .....	853
E5.8.2. Mass Transfer at Low Reynolds Numbers and Various Peclet Numbers .....	853
E5.8.3. Mass Transfer at Moderate and High Reynolds Numbers .....	855
E5.8.4. General Correlations for the Sherwood Number .....	855
E5.9. Mass Transfer to Nonspherical Particles in Translational Flow .....	856
E5.9.1. Mass and Heat Transfer to a Particle of Arbitrary Shape at Low Peclet Numbers .....	856
E5.9.2. Mass Transfer to an Ellipsoidal Particle in Translational Flow .....	857
E5.9.3. Mass Transfer to Particles of Arbitrary Shape .....	858
E5.9.4. Mass and Heat Transfer to a Circular Cylinder in Translational Flow .....	859

E5.10. Transient Mass Transfer to Particles, Drops, and Bubbles in Steady-State Flows .....	860
E5.10.1. Statement of the Problem .....	860
E5.10.2. General Correlations for the Sherwood Number .....	861
Bibliography for Chapter E5 .....	862
<b>E6. Electrical Engineering .....</b>	<b>865</b>
E6.1. Generalities .....	865
E6.1.1. Introduction. Basic Notions, Definitions, and Notation .....	865
E6.1.2. Perfect Elements. Active and Passive Elements .....	866
E6.1.3. Electric Circuits and Networks. Classification of Electric Circuits and Their Operation Modes .....	867
E6.1.4. Structure Elements of Network. Notion of the Graph of a Network ..	868
E6.1.5. Physical Laws for Structure Elements .....	868
E6.1.6. Problems of Analysis and Synthesis of a Network. An Analysis of a Network by Physical Laws. Potential Diagram .....	869
E6.2. Linear Circuits of Direct Current .....	871
E6.2.1. Power of Direct Current .....	871
E6.2.2. Notion of Nonideal Source. Equivalent Circuits and External Characteristics .....	872
E6.2.3. Problem of Maximal Power Transfer. The Source Efficiency Factor ..	874
E6.2.4. Theorem on Active Impedor (Two-Terminal Network) and Its Application .....	875
E6.2.5. Two Compensation Theorems. Properties of Linear Circuits: Linearity Theorem and Reciprocity Theorem .....	876
E6.2.6. Equivalent Transformations in Electrical Networks .....	877
E6.2.7. Application of Equivalent Transformations in Network Analysis. Convolution Method .....	878
E6.2.8. Superposition Principle. The Notion of Input and Transfer Conductances (Admittances) .....	880
E6.2.9. Concise Methods for Analyzing Electric Circuits .....	881
E6.3. Nonlinear Electric Circuits of Direct Current .....	884
E6.3.1. Notion of a Nonlinear Element. Several Typical Characteristics of Nonlinear Elements .....	884
E6.3.2. Equivalent Transformations of Characteristics of Nonlinear Elements ..	886
E6.3.3. Graphical Method for Analyzing Circuits with Nonlinear Elements ..	887
E6.4. Magnetic Circuits .....	890
E6.4.1. Magnetic Field and Its Parameters .....	890
E6.4.2. Ampère's Circuital Law .....	891
E6.4.3. Ohm's Law for Magnetic Circuit .....	892
E6.4.4. Ferromagnetic Materials and Their Properties .....	893
E6.4.5. Kirchhoff's Laws for Magnetic Circuits .....	894
E6.4.6. Analysis of an Unbranched Magnetic Circuit .....	896
E6.4.7. Analysis of a Branched Magnetic Circuit .....	898
E6.4.8. Analysis of a Branched Homogeneous Magnetic Circuit with Permanent Magnet .....	899
E6.5. Single-Phase Harmonic Current Circuits .....	900
E6.5.1. Effective and Average Values of Sinusoidal Quantities .....	900
E6.5.2. Representation of Sinusoidal Quantities by Vectors on Complex Plane ..	901
E6.5.3. Active Resistance in a Sinusoidal Current Circuit .....	904

E6.5.4. Inductance in a Sinusoidal Current Circuit .....	905
E6.5.5. Capacitance in a Sinusoidal Current Circuit .....	906
E6.5.6. Unbranched Electric Circuit .....	907
E6.5.7. Branched Electric Circuit .....	910
E6.5.8. Topographic Diagram .....	911
E6.5.9. Resonance Phenomena .....	912
E6.5.10. Improvement of the Power Factor .....	917
Bibliography for Chapter E6 .....	920
<b>E7. Empirical and Engineering Formulas and Criteria for Their Applicability</b> .....	<b>921</b>
E7.1. Empirical, Engineering and Interpolation Formulas. Least-Squares Method ..	921
E7.1.1. Empirical and Engineering Formulas .....	921
E7.1.2. Least-Squares Method .....	922
E7.1.3. Refinement of Empirical Formulas .....	924
E7.1.4. Interpolation Formulas .....	925
E7.2. Criteria for Applicability of Empirical Formulas .....	926
E7.2.1. Direct Method for Verifying Two-Parameter Formulas .....	926
E7.2.2. Three-Parameter Empirical Formulas .....	931
E7.2.3. Combined Method for Verifying Empirical Formulas .....	932
E7.3. Construction of Engineering Formulas by the Method of Asymptotic Analogies .....	933
E7.3.1. Description of the Method of Asymptotic Analogies .....	933
E7.3.2. Illustrating Examples: Interior Heat Exchange Problems for Bodies of Various Shape .....	936
E7.3.3. Illustrating Examples: Mass Exchange Between Bubbles/Particles and Flow .....	939
Bibliography for Chapter E7 .....	942
<b>Part IV. Supplements</b> .....	<b>943</b>
<b>S1. Integrals</b> .....	<b>945</b>
S1.1. Indefinite Integrals .....	945
S1.1.1. Integrals Involving Rational Functions .....	945
S1.1.2. Integrals Involving Irrational Functions .....	949
S1.1.3. Integrals Involving Exponential Functions .....	952
S1.1.4. Integrals Involving Hyperbolic Functions .....	953
S1.1.5. Integrals Involving Logarithmic Functions .....	956
S1.1.6. Integrals Involving Trigonometric Functions .....	957
S1.1.7. Integrals Involving Inverse Trigonometric Functions .....	962
S1.2. Tables of Definite Integrals .....	963
S1.2.1. Integrals Involving Power-Law Functions .....	963
S1.2.2. Integrals Involving Exponential Functions .....	966
S1.2.3. Integrals Involving Hyperbolic Functions .....	967
S1.2.4. Integrals Involving Logarithmic Functions .....	967
S1.2.5. Integrals Involving Trigonometric Functions .....	968
S1.3. General Reduction Formulas for the Evaluation of Definite Integrals .....	970
S1.3.1. Integrals Involving Functions of a Linear or Rational Argument ....	970
S1.3.2. Integrals Involving Functions with Trigonometric Argument .....	971
S1.3.3. Integrals Involving Logarithmic Functions .....	971
S1.3.4. General Reduction Formulas for the Calculation of Improper Integrals ..	972
Bibliography for Chapter S1 .....	973

<b>S2. Integral Transforms</b> .....	<b>975</b>
S2.1. Tables of Laplace Transforms .....	975
S2.1.1. General Formulas .....	975
S2.1.2. Expressions Involving Power Functions .....	977
S2.1.3. Expressions Involving Exponential Functions .....	977
S2.1.4. Expressions Involving Hyperbolic Functions .....	978
S2.1.5. Expressions Involving Logarithmic Functions .....	979
S2.1.6. Expressions Involving Trigonometric Functions .....	979
S2.1.7. Expressions Involving Special Functions .....	981
S2.2. Tables of Inverse Laplace Transforms .....	982
S2.2.1. General Formulas .....	982
S2.2.2. Expressions Involving Rational Functions .....	984
S2.2.3. Expressions Involving Square Roots .....	988
S2.2.4. Expressions Involving Arbitrary Powers .....	990
S2.2.5. Expressions Involving Exponential Functions .....	990
S2.2.6. Expressions Involving Hyperbolic Functions .....	992
S2.2.7. Expressions Involving Logarithmic Functions .....	992
S2.2.8. Expressions Involving Trigonometric Functions .....	993
S2.2.9. Expressions Involving Special Functions .....	994
S2.3. Tables of Fourier Cosine Transforms .....	995
S2.3.1. General Formulas .....	995
S2.3.2. Expressions Involving Power Functions .....	995
S2.3.3. Expressions Involving Exponential Functions .....	996
S2.3.4. Expressions Involving Hyperbolic Functions .....	997
S2.3.5. Expressions Involving Logarithmic Functions .....	997
S2.3.6. Expressions Involving Trigonometric Functions .....	998
S2.3.7. Expressions Involving Special Functions .....	999
S2.4. Tables of Fourier Sine Transforms .....	1000
S2.4.1. General Formulas .....	1000
S2.4.2. Expressions Involving Power Functions .....	1000
S2.4.3. Expressions Involving Exponential Functions .....	1001
S2.4.4. Expressions Involving Hyperbolic Functions .....	1002
S2.4.5. Expressions Involving Logarithmic Functions .....	1002
S2.4.6. Expressions Involving Trigonometric Functions .....	1003
S2.4.7. Expressions Involving Special Functions .....	1004
Bibliography for Chapter S2 .....	1004
<b>S3. Orthogonal Curvilinear Systems of Coordinates</b> .....	<b>1005</b>
S3.1. Arbitrary Curvilinear Coordinate Systems .....	1005
S3.1.1. General Nonorthogonal Curvilinear Coordinates .....	1005
S3.1.2. General Orthogonal Curvilinear Coordinates .....	1006
S3.2. Cylindrical and Spherical Coordinate Systems .....	1008
S3.2.1. Cylindrical Coordinates .....	1008
S3.2.2. Spherical Coordinates .....	1009
Bibliography for Chapter S3 .....	1010

<b>S4. Ordinary Differential Equations</b> .....	<b>1011</b>
S4.1. First-Order Equations .....	1011
S4.1.1. Simplest Equations Integrable in Closed Form .....	1011
S4.1.2. Riccati Equation .....	1012
S4.1.3. Other Equations .....	1014
S4.2. Second-Order Linear Equations .....	1016
S4.2.1. Equations Involving Power Functions .....	1017
S4.2.2. Equations Involving Exponential and Other Functions .....	1024
S4.2.3. Equations Involving Arbitrary Functions .....	1027
S4.3. Second-Order Nonlinear Equations .....	1028
S4.3.1. Equations of the Form $y''_{xx} = f(x, y)$ .....	1028
S4.3.2. Equations of the Form $f(x, y)y''_{xx} = g(x, y, y'_x)$ .....	1030
Bibliography for Chapter S4 .....	1034
<b>S5. Some Useful Electronic Mathematical Resources</b> .....	<b>1035</b>
<b>S6. Physical Tables</b> .....	<b>1037</b>
S6.1. Symbols and Units .....	1037
S6.1.1. Greek Letters .....	1037
S6.1.2. SI Prefixes .....	1037
S6.1.3. SI Base Units .....	1038
S6.1.4. SI Derived Units with Special Names .....	1038
S6.1.5. Non-SI Units Accepted for Use with SI .....	1039
S6.1.6. Other Common Non-SI Units .....	1039
S6.1.7. Base Planck Units .....	1040
S6.2. Physical Constants .....	1040
S6.2.1. Universal Constants .....	1040
S6.2.2. Astronomical Constants .....	1040
S6.2.3. Planetary, Lunar, and Solar Parameters .....	1041
S6.2.4. Electromagnetic Constants .....	1041
S6.2.5. Atomic and Nuclear Constants .....	1041
S6.2.6. Other Constants .....	1042
S6.3. Nuclear Physics .....	1043
S6.3.1. Masses of Light Nuclides .....	1043
S6.3.2. Leptons .....	1043
S6.3.3. Quarks .....	1044
S6.3.4. Elementary Bosons .....	1044
S6.3.5. Some Baryons .....	1044
S6.3.6. Some Mesons .....	1045
Bibliography for Chapter S6 .....	1046
<b>S7. Periodic Table</b> .....	<b>1047</b>
Bibliography for Chapter S7 .....	1049
<b>Index</b> .....	<b>1051</b>
