

PGIM '93

EUROPE

OFFICIAL

PROCEEDINGS

OF THE TWENTYTHIRD

INTERNATIONAL

INTELLIGENT MOTION

CONFERENCE

JUNE 22 – 24, 1993
NÜRNBERG, GERMANY

This Book is the Property of

INTELLIGENT MOTION '93 - JUNE

TABLE OF CONTENTS

Technical Papers and Authors	Session No.	Page No.
SERVO MOTORS: STATUS, DESIGN AND PERFORMANCE	IM 1	
Servodrives: a Status Review - G. Henneberger, RWTH Aachen, Germany	1.1	1
Performance of Synchronous Reluctance Motors in Servo-drive Applications - G. Franceschini, A. Fratta, G. Rosso, G.P. Troglia, A. Vagati, Politecnico di Torino, Italy	1.2	15
Torque Ripple Compensation in Brushless Servo Drives - D. Jouve, D. Bul, Infranor, France	1.3	28
Direct Drives for Positioning Task Based on Hybrid Stepper Motors - E. Kallenbach, Technical University Ilmenau, E. Wendorff, Pasim Mikrosystemtechnik, Germany	1.4	38
A New Design to Improve the Dynamic Performances of a Step by Step Motor - So. Gradinaru, Sa. Gradinaru, Romanian Academy IASI, D. Alexa, Polytechnical Institute IASI, Romania	1.5	**
Optimum Reduction Gear Ratio for Servoactuators - T. Missala, Industrial Inst. of Automation and Measurements PIAP, Poland	1.6	53
Quadrature Field-Oriented Control of a Linear Stepper Motor - I.A. Viorel, L. Szabo, Z. Kovacs, Technical University of Cluj, Romania	1.7	64
Digital Concept for Brushless AC Motors Servo Amplifier - I. Cohen, G. Cohen, Servotronix, Israel - H. Petsch, D. Berg, Switzerland	1.8	74
Linear Direct Drives Dynamic, Economic, Innovative - O. Hörmann, T. Walz, Krauss Maffei Automationstechnik, Germany	1.9	82
NEW CONTROL STRATEGIES AND IMPLEMENTATIONS	IM 2	
Digital Control of Electrical Drives, Principles and Developments - R. Schönfeld, Technical University Dresden, Germany	2.1	88
New Auto-Tuning Implementation for Fuzzy-Reasoning Based DC Brushless Servo Systems - K. Inoue, Y. Takakado, Shinko Electric, M. Nakaoka, Kobe University, Japan	2.2	98
PC 486 Based Fuzzy Logic Controller for VSI-Fed Machine Drives - R. Blümel, J. Schurig, E. Schurack, University of Federal Defense, Germany	2.3	105
Computer Aided Pulse Pattern Synthesis for VSI-Fed Machine Drives - Roland Blümel, University of Federal Defense, Germany, Reinhold Blümel, University of Delaware, USA	2.4	115
Fuzzy Control of AC-Drives Fed by PWM-Inverter - W. Hofmann, Technical University Chemnitz, M. Krause, Technical University, Dresden, Germany	2.5	123
Robust Control of Position Controlled Drives - S. Grundmann, Technical University Dresden, Germany	2.6	133
Computer Simulation of a Closed-Loop Linear Positioning System - L. Szabo, I.A. Viorel, Z. Kovacs, Technical University of Cluj, Romania	2.7	142
TRANSDUCERS	IM 3	
Modular Rotary Encoders for Controlled Electrical Drives - S. Bielski, R. Hagl, Heidenhain, Germany	3.1	152
Interpolation Techniques for Incremental Encoders - O. Benzaid, B.M. Bird, University of Bristol, GB	3.2	165

Technical Papers and Authors	Session No.	Page No.
Inductive Transducer for Linear Motion Giving Resolver Type Output - P. O'Beirne, J.V. Byrne, AEG Servo Systems, Ireland	3.3	173
Resolver Compatible Angular Transducer with passiv Rotor Design - K. Bruchmann, Printed Motors Heidelberg, Germany	3.4	185
POWER QUALITY ISSUES I	M 4	
Comparison of Transient and Steady State DC Motor Drive Network Harmonics - V. Katic, D. Dapcevic, University of Novi Sad, V. Vuckovic, University of Belgrade, Yugoslavia	4.1	190
DC-Link Design for a Four-Quadrant PWM Converter Drive - K.-U. Witthöft, T. Schreiter, Technical University Dresden, Germany	4.2	202
Reducing the Power Quality Impacts Caused by Adjustable Speed Drives - D. Stade, R. Grünler, H. Schau, Technical University Imenau, Germany	4.3	212
UPS: Development of a new High Performance DC/AC Converter - G. Herman, Merlin Gerin, France	4.4	222
INDUCTION MOTORS: ADVANCES IN CONTROL	IM 5	
A Speed Control System for AC Induction Motor Application to Home Appliances - H. Miyazaki, M. Ono, Toshiba, Japan	5.1	230
Practical Field Oriented Control in a Rotor Reference Frame - P. J. Coussens, A. P. Van den Bossche, J. A. Melkebeek, University of Gent, Belgium	5.2	237
Simulation of Vector-Controlled Induction Motor Drives - P. Vas, J. Li, University of Aberdeen, GB	5.3	250
Compensation of Magnetic Saturation Effects in Air-Gap Flux Oriented Induction Motor Drives - E. Levi, Liverpool John Moores University, GB	5.4	262
Implementation of Fast Response Vector Control for Induction Motor Using Digital Signal Processors and Vector Co Processors - V.T. Ranganathan, Indian Institute of Science, S. Pandit, Infosys Manufacturing Systems, India	5.5	274
A New Starting Method for the Induction Motor - C. Marinescu, D. Marinescu, Transilvania University of Brasov, Romania	5.6	288
Inverter-Fed Linear Induction Motor and its High-Performance Control Scheme in Ultra-Low Speed Range - Y. Ogino, Osaka Institute of Technology, Y. Murakami, Osaka University, M. Nakaoka, Kobe University, Japan	5.7	297
Output Voltage Measurements in Current Controlled Voltage Source Inverter - Z. Krzeminski, Z. Bielewicz, Electronical Institute Gdansk, Poland	5.8	305
ADVANCES IN SWITCHED RELUCTANCE DRIVES	IM 6	
Gate Drivers for Switched Reluctance Motor Drives - B. E. Taylor, International Rectifier, GB	6.1	315
Rapid Prototyping of Switched Reluctance Drives - P. Heidrich, R. Hanitsch, Technical University Berlin, Germany	6.2	320
A New Indirect Rotor Position Sensing with Resonant Method for Switched Reluctance Motor - P. Laurent, M. Gabsi, B. Mutton, L.E.S.I.R. ENS, France	6.3	324
Comparison of Electromagnetic Perturbations and Switching Losses between Commutation Losses between Self-Switching and PWM Mode of Current Control in a Switched Reluctance Motor - P. Laurent, M. Gabsi, B. Mutton, L.E.S.I.R. ENS, France	6.4	332
Switched Reluctance Drives for Electric Vehicles: A Comparative Assessment - N.N. Fulton, P.J. Lawrenson, SR Drives, GB	6.5	562

Technical Papers and Authors	Session No.	Page No.
DIGITAL COMMUNICATION AND CONTROL	IM 7	
Single-Chip Field-Bus Control of Building Automation Actuator - M. Jufer, J.-P. Nussbaumer, Swiss Federal Institute of Technology, Switzerland	7.1	344
Control Application with the Programmable Motion Controller (PMC) - B.K. Kajiyama, Philips, R. van der Burg, Grundig Numeric, Netherlands	7.2	354
European Motion Control Manufacturers Back Drivecom with InterBus-S - W. Blome, Phoenix Contact, Germany	7.3	369
Interbus-S, a Sensor/Actuator Bus for Factory Automation - R. Bent, Phoenix Contact, Germany	7.4	392
A Four Quadrant Motor Driver - E. Kokornaczyk, Technical University Berlin, Germany	7.5	404
TMS320C25 Implementation of a Stepping Servo - O. Benzaid, B.M. Bird, University of Bristol, GB	7.6	411
Controlling a DC Motor with a Low-End Micro-Controller - J. Nicolai, Th. Castagnet, SGS-Thomson, France	7.7	422
New Implementation of Point to Point Reference Profile with "On Fly" Modification - E. Schreiber, Tel Aviv University + Servotronix, I. Cohen, Y. Atzmon, Servotronix, Israel	7.8	432
Field Orientation Concept in Induction Motor Control, a New Point of View - I.A. Viorel, E. Rösler, H.C. Hedesiu, M. Chis, Technical University of Cluj, Romania	7.9	439
IDAS - A new Simulation System for complex Power Electronic and Drive Systems - U. Knorr, SIMEC, Germany	7.10	446
IMPROVED DESIGN AND PERFORMANCE OF PM AND BRUSHLESS MOTORS	IM 8	
Disc-Type Motor with Etched Windings and Magnetoresistive Rotor Position Sensing - R. Hanitsch, D.S. Choi, Technical University Berlin, Germany	8.1	456
Phase Number Effect on the Sensitivity to Manufacturing Tolerances - E. Favre, ETEL, K. Hatefi, Swiss Federal Institute of Technology, Switzerland	8.2	462
Five-Phase Permanent Magnet Synchronous Motor - E. Favre, ETEL, C. Fleury, M. Jufer, Swiss Federal Institute of Technology, Switzerland	8.3	475
Design of Shell-Type DC Motors for Incremental Motion - D. Stoia, D. Ilea, M. Georgescu, University Transilvania of Brasov, Romania	8.4	488
Application of Brushless Electric Motors and Sensors for Motion Control and Condition Monitoring Systems in Jet Engine Environment - S.K. Pal, Muirhead Vactric, GB	8.5	552
Properties of an Axial Field AC Synchronous Servomotor Drive - L. Klug, Technical University of Bratislava, Slovakia	8.6	493
Magnetic Field of DC Motor Excited by Permanent Magnets - J. Wagner, R. Guba, D. Maga, J. Opaterny, R. Führichova, Technical University of Bratislava, V. Hajek, Faculty of Electrical Engineering Brno, Slovakia	8.7	499
ADDITIONAL PAPERS - no oral presentation		
Development of a Simulation System for Electrical Drives and Control Applications - A. Kern, K.-J. Lux, U. Kunz, Department of Power Electronics and Electrical Drives of the University Siegen, Germany		514
A New Method of Power Rating for Locomotive Transformers - H. Güldner, A. Stephan, Department Verkehrswissenschaften of the Technical University Dresden - M. Gloede, AEG Schienenfahrzeuge, Hennigsdorf, Germany		523
Approximate Determination of the Current RMS Value of the DC Link Capacitor of Single-Phase and Three-Phase PWM Converter Systems - J.W. Kolar, H. Ertl, F. Zach, Technical University Vienna, Austria		532

** Copies to be handed out at conference
