

CLASSICAL AND QUANTUM SYSTEMS

Foundations and Symmetries

Proceedings of the II International Wigner Symposium

Goslar, Germany July 16 – 20, 1991

*organized by: Arnold Sommerfeld Institute for Mathematical Physics,
Technical University Clausthal and
Department of Mathematics, Florida Atlantic University*

Editors: H. D. Doebner

*Arnold-Sommerfeld-Institute for Mathematical Physics
Technical University Clausthal*

W. Scherer

*Institute for Theoretical Physics A
Technical University Clausthal*

F. Schroeck, Jr.

*Department of Mathematics
Florida Atlantic University*

World Scientific

Singapore • New Jersey • London • Hong Kong

Table of Contents

Preface	v
Letter from Eugene P. Wigner	vii

I. Plenary Contributions

G.G. Emch	The Philosophy of Eugene P. Wigner	2
J. Bub	Measurement and Objectivity in Quantum Mechanics	9
P. Busch	The Quantum Theory of Unsharp Measurements	19
S.T. Ali	Survey of Quantization Methods	29
G.A. Goldin	From 'Anyons' to Nonlinear Quantum Mechanics: Physical Predictions from Diffeomorphism Group Representations	38
I. Prigogine, T. Petrosky	Quantum Chaos — Towards the Formulation of an Alternate Quantum Theory	49
A. Bohm	The Geometric Phase in Quantum Physics	59
Y.S. Kim	Wigner Functions and Lorentz Transformations	68
V.I. Man'ko	Wigner Function of Nonstationary Quantum and Optical Systems	78
K. Vogel, W.P. Schleich, G. Süssmann, H. Walther	From the One-Atom Maser to Schrödinger Cats	91
G.C. Hegerfeldt, T.S. Wilser	Ensemble or Individual System, Collapse or no Collapse: A Description of a Single Radiating Atom	104
R.R. Gerhardts	Magnetotransport in Two-Dimensional Mesoscopic Superlattices: Experimental Consequences of Commensurability Effects	116
R. Haag,	Symmetries, Points, Superselection	127

Y. Ne'eman, C.Y. Lee, Dj. Sijacki	SU(2/1), Superconnections and Geometric Higgs Fields	131
L. O'Raifeartaigh	W-Algebras and Conformally Reduced WZNW Theories	138
S. Helgason	The Wave Equation on Symmetric Spaces	149
P. Winternitz	Lie Point Symmetries and Exact Solutions of Nonlinear Differential Equations	158
W. Schempp	Bohr's Indeterminacy Principle in Quantum Holography, Adaptive Neural Networks, Molecular Computers, and Cortical Self-Organization	167
J.G. Taylor	Neural Networks: From Spin Glasses to Consciousness	191

II. Foundations of Quantum Mechanics

P. Mittelstaedt	The Problem of Objectification in Quantum Mechanics and the Ignorance Interpretation	200
H.D. Zeh	Measurements in a Quantum Universe	205
E.G. Beltrametti, M.J. Maczynsky	Some Remarks on Quantum Probabilities	209
G. Cassinelli, P.J. Lahti	Conditional Probability and Strong Correlations in the Quantum Theory of Measurement	212
A. Rimini	A Discussion on some Theories of Quantum Measurement	216
K.K. Wan, R.G. McLean	Local Position Measurements and State Preparation	220
M. Ozawa	Wigner-Araki-Yanase Theorem for Continuous Observables	224
S. Kamefuchi	Variations on a Theme by E.P. Wigner	228
M.B. Mensky	The Action Uncertainty Principle in Continuous Quantum Measurements	232
L.E. Szabó	Quantum Theory and Causality	236
G. Svetlichny	Does the Covering Law follow from Lorentz Covariance?	241
M. Zukowski	Greenberger-Horne-Zeilinger Correlations in Quadrature Phase Measurements	245

L. Hardy	Testing Bell's Inequalities With a Mach-Zehnder Interferometer	249
M. Ferrero, J.M. Getino	Predictions for Bell's Type Experiments in Stochastic Optics	253
A.O. Barut, M. Božić	Magnetic Top: On the Origin of Quantum Spin and Magnetic Moment	257
P.F. González-Díaz	Topological Arrow of Time and Quantum-Mechanical Evolution	261

III. General Group Theoretical and Quantization Methods

L.P. Horwitz, A. Razon	Tensor Product of Quaternion Hilbert Modules	266
J. Negro, M.A. del Olmo	A Relationship between Local and Irreducible Realizations of Lie Groups	269
B. Broda	Skein Relations for Any Pair of Irreducible Representations of Any Lie Group	273
C. Cotter, I. Szczyrba	Group Extensions and Unification Theories	278
E. Norvaisas	Separation of the Pure Gauge and Dynamic Degrees of Freedom in Quantum Chromodynamics	282
V. Bhansali	Fate of an Invariant Operator in the Enveloping Algebra of $SO(d-1,1)$	285
P. Moylan	Unitary Structures for Spanners	293
R. Aldrovandi	Discrete Weyl-Wigner Transformations	297
J. Katriel	Many Particle Dirac Identities	301
S. De Bièvre, A.M. El Gradechi	Quantization and Contraction of an Elementary System on a Curved Spacetime	305
V. Hussin	Contraction of the Discrete Series Fock-Bargmann Representation of $SU(1,1)$	309
N.A. Gromov	Contractions of the Representations of the Orthogonal Algebras	314
T.D. Palev, N.I. Stoilova	Classification of All Noncanonical Three-Dimensional Quantum Oscillators Generating Classical Lie Superalgebras	318

E.P. Osipov	Kac-Moody-Malcev Algebras and Superalgebras	322
R.F. Wehrhahn, I.L. Cooper	The Local Behaviour of Supersymmetric Quantum Mechanics Potentials	326
J. Löhmus, P. Paal, L. Sorgsepp	Moufang Loops and Conservation Laws	330
A. Inomata, G. Junker	Path Integral Realization of Dynamical Symmetries	334
M. Bordemann, H. Römer	Total Space Quantization of Kähler Manifolds	338
V.F. Molchanov	Quantization on Semisimple Symmetric Spaces	342
L.J. Boya	Dynamical Groups of Free Motion	347
J.C. Zambrini	A New Probabilistic Quantization Method and its Semiclassical Limit	352
I.M. Pavlichenkov	Quasiclassical Approximation in Bargmann Representation of Lie Groups	357
S.A. Fulling, C.J. Cummins, R.C. King, B.G. Wybourne	Group-Theoretical Classification of Polynomial Functions of the Riemann Tensor	362

IV. Coherent States

J.-P. Antoine, J.-P. Gazeau	Coherent States: From Group Representations to Relativistic Quantum Frames	368
D.J. Rowe	Vector Coherent State Representations as Induced Representations	376
A. Odziejewicz	Geometric Quantization and Coherent States Methods	380
J.-P. Antoine, U. Moschella	Massless Poincaré Coherent States and Wavelets	384
P. Kasperkovitz	Phase Space Description of Electrons in the One-Band Approximation	388

V. Berry Phase

B. Kendrick	Invariance of the Geometrical Phase Under Time Dependent Unitary Transformations	394
M. Szopa, A. Ceulemans	Quantum Geometrical Phase for a Threefold Degenerate State	398
J. Dittmann, G. Rudolph	On a Certain Class of Connections in the $U(n)$ -bundle over Density Matrices	402
M. Hübner	The Bures Metric and Uhlmann's Transition Probability: Explicit Results	406

VI. Phase Space and Wigner Distributions

F.E. Schroeck Jr.	The Great Orthogonality Theorem and Informational Completeness	412
H. Fink, H. Leschke	Phase-Space- and Other Representations of Quantum Mechanics: A Unifying Approach	416
J.P. Dahl	The Dual Nature of Phase-Space Representations	420
J. Krüger	New Constructions of Positive Probability Distributions in Phase Space	424
S. Guiasu	Solution of a Variational Problem Confirming Wigner's Result on the Joint Probability Distribution	428
M.E. Noz	Lorentz Squeezed Harmonic Oscillators	432
C. Zylka, G. Vojta	Wigner Formalism for Quantum Statistics of Nonrelativistic and Relativistic Anharmonic Oscillator Systems	436
S. Abe, N. Suzuki	Wigner Distribution Function on a Graded Phase Space and its Application to Optical Systems	440
E.A. Akhundova, V.V. Dodonov	Exact Wigner Function of Some Nonquadratic Quantum Systems	444
D.M. Davidovic, D. Lalovic	On the Positiveness of the Smoothed Wigner Function	447
S.S. Mizrahi, M.A. Marchioli	The Phase Space Representation of Quantum States and the Gibbs Entropy	450
P. Garbaczewski	Nelson's Stochastic Mechanics as the Problem of Random Flights	454

VII. Applications of Quantum Mechanics: From Channel Space to Wigner Crystal

T.H. Seligman	Canonical Transformations in Channel Space and their Unitary Representation: A Step Toward Understanding Chaotic Scattering in Quantum Mechanics	460
I.E. Antoniou	Intrinsic Irreversibility of Quantum Systems Rigged Hilbert Space for the Lee-Friedrichs Model	465
M.P. Silverman	Chiral Symmetry Breaking in Atoms on the Rotating Earth .	469
H.-J. Schmidt, H.-W. Nikolaïski	A Method of Solving the Stern-Gerlach Problem	473
P.K. Aravind	The Quantum Beamsplitter, the 2-D Oscillator and the 2-D Hydrogen Atom: Group Theoretical Connections	477
V. Aldaya, J. Bisquert, J. Navarro-Salas	Higher Order Polarizations and the Relativistic Harmonic Oscillator	481
M. Grabowski	Phase Measurement in Quantum Mechanics	485
A. Barchielli	Quantum Stochastic Calculus, Measurements Continuous in Time, and Heterodyne Detection in Quantum Optics	488
R. Tanaś	Quantum Phase Fluctuations and Correlations in Nonlinear Optical Processes	492
O.V. Man'ko	Quantum Parametric Chain in Wigner Representation	496
A. Anzaldo-Meneses	Analytic Number Theory and Nuclear Level Densities	500
H. Jahn	Types of Nuclear Reaction Mechanisms	504
R.S. Ingarden	Information Thermodynamical Approach and a Comment on Wigner's Statistical Theory of Spectra	509
J. Daboul	Increase of Information and Decrease of Entropy due to Averaging by Doubly Stochastic Transformations	513
A. Cuccoli, M. Neumann, A. Macchi, V. Tognetti, R. Vaia	Quantum Thermodynamics in Classical Phase-Space	517
A.B. Klimov	Magnetization of a Charged Particle Interacting with Reservoir	521

M. Requardt	Wigner Crystallisation in One Component Coulomb Plasmas: Some Rigorous Estimates	525
Y.A. Kosevich	Dynamic Depinning of 2D Electron Wigner Crystal at a Solid State Heterojunction	529

VIII. Quantum Fields and Particles

M. Moshinsky	Relativistic Generalization of the Breit-Wigner Formula	534
H. Joos	On the Symmetry of Lattice Fermions	549
M. Lorente	Lattice Fermions without Species Doubling and with Axial Anomaly	553
N.A. Papadopoulos	Non-Commutative Geometry and the Standard Model in Elementary Particle Physics	557
S.R. Komy	Bound State Quantum Electrodynamics: On Solutions of Relativistic 2-Body Equations	563
C. Villarreal, R. Jáuregui, S. Hacyan, G. Cocho	Vacuum Fluctuations in Prismatic Cavities	567
M. Bordag, D. Hennig, D. Robaschik, K. Scharnhorst, E. Wieczorek	Delta Potentials on Planes in QED	571
B. Geyer, D. Müller, D. Robaschik	General Evolution Equation for the Distribution Amplitude of Exclusive Virtual Compton Scattering	577
P.B. Burt	The Persistence of Interactions in Quantum Field Theories ..	581
W.H. Klink	Relativistic Quantum Mechanics on Fock Space	584
A.O. Barut	Internal Dynamics of Majorana and Dirac Infinite Component Wave Equations and Magnetic Bound States	588
Y. Ohnuki	Particles with Fractional Spin in (2+1)-Relativistic Quantum Theory	592
M.V. Cougo-Pinto	The Connection Between Charge Conjugation, Unitarity and Statistics	596

D.V. Ahluwalia, D.J. Ernst	On Kinematical Acausality in Weinberg's Equations for Arbitrary Spin	599
W.E. Baylis	Classical Eigenspinors and the Dirac Equation	603
W.F. Heidenreich	Smooth Massless Limit of Spin-2 Theories	607
J.M. Gracia-Bondía, J.C. Várilly	On the Metaplectic Representation in Quantum Field Theory	611
K. Fujii, N. Ogawa, K. Sato, T. Okazaki, N.M. Chepilko, A.P. Kobushkin	Canonical Quantization in Chiral Soliton Model with a Hidden Local Symmetry	615
P.P. Srivastava, K. Tanaka	Self-Duality Condition in Chern-Simons Higgs Systems	619
M.K. Falbo-Kenkel, F. Mansouri	Exact Results in Two Particle Scattering in 2+1 Dimensional Gravity	623
H.D. Doebner, R. Rączka	On Gauge Dependence of Perturbative Predictions in QCD ...	627
N. Debergh, J. Beckers	On Symmetries Inside Color Superalgebras	638
J. Niederle	$N = 1$ Supergravity as a Non-Linear σ -Model	640
S. Nagamachi, Y. Kobayashi	Hilbert Superspace, Unitary Representation of Lie Supergroup and Supersymmetric Quantum Field Theory	651
A. Verbeure	Phonons as Boson Particles	655

IX. C^* -Algebraic Methods

H.J. Borchers	The Modular Group as Physical Symmetry	660
A. Inoue	Modular Structure of Unbounded Operator Algebras and Wightman Quantum Field Theory	664
G. John, A. Rieckers	C^* -Algebraic Mean-Field Systems and Geometric Quantization	668
T. Gerisch	Quasi Averages For Mean Field Models in Algebraic Quantum Statistical Theory	672

P. Bóna	Generalized Quantum Mechanics and Classical Observables ..	676
A. Rieckers	Gauge Covariant Squeezing of the Vacuum	679
R. Honegger	Quantized Radiation from Collectively Ordered Atoms	683

X. Differential Geometric Methods

J. Kijowski, G. Rudolph	Quantization on the Gauge Orbit Space	688
R. Schimming, E. Mundt	Constant Yang-Mills Potentials	695
S.V. Shabanov	Phase Space Structure in Gauge Theories and Quantum Dynamics	698
W. Drechsler	Quantized Fiber Dynamics for Extended Elementary Objects	703
J.D. Hennig	Conformal Geometry and Spacetime Gauge Theories	708
H.E. Brandt	Differential Geometry of Spacetime Tangent Bundle	715
J.F. Cariñena, J. Fernández-Núñez, E. Martínez	Applications of Sections Along a Map in Classical Mechanics.	719
C. Holm, J.D. Hennig	A Poincaré Gauge Theory on Regge Simplexes	723
E. Binz	A Symplectic Derivation of the Dynamics of any Smoothly Deformable Medium	727

XI. Nonlinear Partial Differential Equations, Dynamical Systems and Neural Networks

E. Brüning	On the Role of Symmetries in PDE-Problems	734
I. Yegorchenko	Second-Order Differential Invariants for the Poincaré, Galilei and Conformal Algebras in Many-Dimensional Spaces	738
D. Schuch	On Complex nonlinear relations for the Wave Mechanical Description of the Dynamics and Energetics of Conservative and Dissipative Systems	742
T.L. Gill, W.W. Zachary	Gradient Structure of Global Attractors for Dissipative Nonlinear Nonautonomous Partial Differential Equations	748

H.J. Schellnhuber, H. Urbschat	Linearizing a Nonlinear Paradigm: Universal Description of KAM-Tori and Cantori	752
J. Hoppe	Integrable Systems Related to Membranes	756
E.T. Abou-El-Dahab, J.S.R. Chisholm, J. McEwan	A Complex Formulation of Hamiltonian (or Birkhoffian) The- ory	758
H. Yuanshi	Bifurcation of Periodic Systems of Singularly Perturbed Dy- namic Systems	762
F.V. Kusmartsev, F.E. Schunck	Stability of Real Stars and Catastrophe Theory	766
R. Quadt	Generalized Coarse-Graining and Irreversibility in Classical Dynamical Systems	770
J. Messer	Equilibrium Statistical Mechanics of Terrestrial Ecosystems .	775
K.E. Kürten	Combinatorial Group-Theoretical Approach in High-Order Neural Networks	779
F. Pasemann	Geometry of Feed-Forward Networks	784
List of Participants		791
