

GEOMATERIALS UNDER THE MICROSCOPE

A COLOUR GUIDE

*building stone, roofing slate, aggregate,
concrete, mortar, plaster, bricks,
ceramics, and bituminous mixtures*

Jeremy P. Ingham

BSc (Hons), MSc, DipRMS, CEng, MInstNDT, EurGeol, CGeol, CSci, FGS, FRGS, MIAQP

CONTENTS

Preface	5	Chapter 4	
Acknowledgements	5	Aggregates	61
Author profile	5	Introduction	61
Abbreviations	6	Petrographic examination and complementary techniques	61
		Aggregate type	61
Chapter 1		Aggregate grading, shape, and surface texture	64
Introduction	7	Soundness, impurities, and undesirable constituents of aggregates	66
Overview of geomaterials and petrography	7	Potential alkali-reactivity of aggregate for concrete	69
Petrographic techniques	10	Matching aggregates for conservation	74
Sampling and sample preparation	14		
		Chapter 5	
Chapter 2		Concrete	75
Building stone	21	Introduction	75
Introduction	21	Assessment of concrete structures	75
Testing building stone	22	Petrographic examination and complementary techniques	76
Petrographic examination and complementary techniques	24	Investigating the composition and quality of concrete	76
Stone from igneous rocks	24	Examining deteriorated and damaged concrete	96
Stone from sedimentary rocks	32		
Stone from metamorphic rocks	44	Chapter 6	
Petrography of stone defects and decay	47	Concrete products	121
		Introduction	121
Chapter 3		Petrographic examination	122
Roofing slate	51	Architectural cast stone	122
Introduction	51	Aircrete products	124
Testing roofing slates	51	Calcium silicate units	124
Petrographic examination and complementary techniques	52	Asbestos cement products	126
Properties of roofing slates	52		
Weathering and deterioration of roofing slate	56		
Interpretation of slate test results	58		

Chapter 7		Chapter 10	
Floor finishes	129	Bituminous mixtures	171
Introduction	129	Introduction	171
Petrographic examination	130	Petrographic examination	172
Floor screed	130	Examples of bituminous mixtures	172
Terrazzo	132		
Synthetic resin floor covering	133	Appendix A	175
		Suppliers of petrographic equipment, training, and literature	175
Chapter 8		Appendix B	176
Mortar, plaster, and render	137	Staining techniques for geomaterials petrography	176
Overview	137	Etching and staining techniques for cement minerals and slags	178
Gypsum-based	139		
Lime-based	143	References and further reading	180
Portland cement-based	152		
Specialist mortars	159	Index	189
Chapter 9			
Bricks, terracotta, and other ceramics	163		
Introduction	163		
Petrographic examination and complementary techniques	163		
Clay brick	164		
Terracotta	166		
Ceramic tile	168		
Architectural glass	170
