

STABILITY IN PROBABILITY

Editor of the Volume

JOLANTA K. MISIEWICZ

Faculty of Mathematics and Information Science, Warsaw University of Technology

WARSZAWA 2010

CONTENTS

List of international seminars on stability problems for stochastic models	9
XXVIII International Seminar on Stability Problems for Stochastic Models	10
List of participants	11–12
K. BINKOWSKI and A. KOZEK, Models for option pricing based on empirical characteristic function of returns	13–26
R. A. KOROLEV and V. E. BENING, On the power of an asymptotically optimal test for the case of Laplace distribution	27–38
T. J. KOZUBOWSKI, Geometric infinite divisibility, stability, and self-similarity: an overview	39–65
R. M. ŁOCHOWSKI, Truncated variation, upward truncated variation and downward truncated variation of Brownian motion with drift—their mean value and their applications	67–78
G. MAZURKIEWICZ, On the infinite divisibility of scale mixtures of symmetric α -stable distributions, $\alpha \in (0, 1]$	79–82
J. P. NOLAN, Metrics for multivariate stable distributions	83–102
J. OLEJNIK, On Paszkiewicz-type criterion for a.e. continuity of processes in L^p -spaces	103–110
E. OMEY and J. SEGERS, Generalised regular variation of arbitrary order	111–137
A. PASZKIEWICZ and J. OLEJNIK, Reinsurance—a new approach	139–151
J. ROSIŃSKI and J. L. SINCLAIR, Generalized tempered stable processes	153–170
M. SEWERYN, Almost sure limit theorems for dependent random variables	171–178
K. SZAJOWSKI, Optimal stopping of a 2-vector risk process	179–191
W. SZATZSCHNEIDER and T. KWIATKOWSKA, Principal-Agent approach to environmental improvements policies	193–201
D. SZYNAL, Goodness-of-fit tests derived from characterizations of continuous distributions	203–223
S. TAKENAKA, Stable random fields and geometry	225–241
Z. VOLKOVICH, D. TOLEDANO-KITAI and R. AVROS, On analytical properties of generalized convolutions	243–274
O. YANUSHKEVICHIENE, Asymptotic rate of convergence in the degenerate U-statistics of second order	275–284
