

Adaptive Multiresolution Discontinuous Galerkin Schemes for Conservation Laws

Von der Fakultät für Mathematik, Informatik und
Naturwissenschaften der RWTH Aachen University zur Erlangung des
akademischen Grades eines Doktors der Naturwissenschaften
genehmigte Dissertation

vorgelegt von

Diplom-Mathematiker
Roland Schäfer

aus Frankfurt a. M.

Berichter: apl. Prof. Siegfried Müller
Univ.-Prof. Sebastian Noelle

Tag der mündlichen Prüfung: 18. März 2011

Contents

1	Introduction	1
2	The reference DG scheme	5
2.1	Derivation of the scheme	5
2.2	Convergence of DG scheme in the mean	7
2.3	Limiting	8
2.4	Notation	12
2.5	Runge-Kutta time discretization	13
2.6	Convergence of DG scheme	17
2.7	Properties of the DG scheme in the mean	17
2.7.1	Boundedness of the DG scheme in the mean	18
2.7.2	l^1 -stability of the DG scheme in the mean	21
2.8	Properties of the DG scheme with Runge-Kutta time stepping	23
2.9	Numerical tests: Empirical order of convergence	25
2.9.1	Test case 1: Linear transport	26
2.9.2	Test case 2: Nonlinear conservation law with smooth solution	28
2.9.3	Test case 3: Non-convex conservation law with discontinuous solution	31
3	Error analysis: Framework for adaptive schemes	37
3.1	A class of adaptive schemes	37
3.2	Assumption on the adaptive scheme	38
3.3	Boundedness of adaptive schemes	39
3.4	Error bound for the perturbation error	41
3.5	Error bound with Runge-Kutta time stepping	43
4	The h-adaptive scheme	45
4.1	Multiresolution analysis	45
4.1.1	Grid hierarchy	46
4.1.2	Multiresolution sequence	47
4.1.3	Construction of bases	47
4.1.4	Cancellation property	49
4.1.5	Multiscale transformation	49
4.1.6	Thresholding and approximation	50
4.1.7	Adaptive grid	53
4.2	Alpert's orthogonal multiwavelet basis	55
4.3	Evolution equations for multiscale coefficients	59
4.4	Adaptive multiresolution DG scheme	63

4.5	Error analysis	65
4.6	Prediction and limiting	66
4.6.1	Prediction strategy	67
4.6.2	Projection of mean values from coarse to fine scales	72
4.6.3	Limiting strategy	73
4.6.4	Reliability of limiting	77
4.6.5	Reliability of evolution	78
4.7	Runge-Kutta time stepping	81
5	Numerical tests	85
5.1	Test case 4: Burgers' equation	86
5.2	Test case 5: Burgers' equation with source term	97
5.3	Test case 6: Non-convex flux function	105
6	Modifications to the adaptive scheme	115
6.1	Error analysis	115
6.2	Modification 1: Quadrature	116
6.2.1	Motivation	116
6.2.2	Description	116
6.2.3	Error analysis	117
6.2.4	Numerical tests	120
6.3	Modification 2: Hybrid flux computation	126
6.3.1	Motivation	126
6.3.2	Description	126
6.3.3	Error analysis	126
6.3.4	Numerical tests	128
6.4	Modification 3: p -adaptivity	141
6.4.1	Motivation	141
6.4.2	Description of the p -adaptive scheme	141
6.4.3	Reconstruction	142
6.4.4	Numerical tests	143
6.4.5	Alternative approach: different number of vanishing moments	147
6.5	Discussion	149
7	Conclusion	151
	Bibliography	155
