<b>Preface to the Second Edition</b> .....	vii
<b>Preface to the First Edition</b> .....	ix
<b>Acknowledgements for the Second Edition</b> .....	xiii
<b>Acknowledgements for the First Edition</b> .....	xv
<b>1. Introduction</b> .....	1
1.1 Introduction.....	1
1.2 The Communication Puzzle.....	4
1.3 Applications of MANETs .....	6
1.4 Challenges.....	8
1.4.1 Scalability .....	8
1.4.2 Quality of Service .....	9
1.4.3 Client-Server Model Shift.....	9
1.4.4 Security .....	10
1.4.5 Interoperation with the Internet.....	10
1.4.6 Energy Conservation .....	11
1.4.7 Node (MH) Cooperation .....	11
1.4.8 Interoperation.....	12
1.5 Book Organization.....	12
1.6 Conclusions and Future Directions .....	16
Homework Questions/Simulation Projects .....	16
References .....	16
<b>2. Routing in Ad hoc Networks</b> .....	18
2.1 Introduction.....	18
2.2 Topology-Based versus Position-Based Approaches.....	19
2.3 Topology-Based Routing Protocols.....	20
2.3.1 Proactive Routing Approach.....	20
2.3.2 Reactive Routing Approach.....	26
2.3.3 Hybrid Routing Approach.....	34
2.3.4 Comparison .....	40
2.4 Position-Based Routing .....	40

2.4.1 Principles and Issues .....	40
2.4.2 Location Services .....	41
2.4.3 Forwarding Strategies .....	47
2.4.4 Comparisons .....	57
2.5 Other Routing Protocols .....	62
2.5.1 Signal Stability Routing .....	62
2.5.2 Power Aware Routing .....	63
2.5.3 Associativity-Based Routing .....	63
2.5.4 QoS Routing .....	64
2.6 Conclusions and Future Directions .....	69
Homework Questions/Simulation Results .....	70
References .....	71
<b>3. Broadcasting, Multicasting and Geocasting .....</b>	<b>74</b>
3.1 Introduction .....	74
3.2 The Broadcast Storm .....	76
3.2.1 Broadcasting in a MANET .....	77
3.2.2 Flooding-Generated Broadcast Storm .....	78
3.2.3 Rebroadcasting Schemes .....	80
3.3 Multicasting .....	90
3.3.1 Issues in Providing Multicast in a MANET .....	91
3.3.2 Multicast Routing Protocols .....	91
3.3.3 Comparison .....	115
3.4 Geocasting .....	116
3.4.1 Geocast Routing Protocols .....	117
3.4.2 Comparison .....	125
3.5 Conclusions and Future Directions .....	125
Homework Questions/Simulation Projects .....	127
References .....	127
<b>4. Wireless LANs .....</b>	<b>130</b>
4.1 Introduction .....	130
4.2 Why Wireless LANs .....	131
4.3 Transmission Techniques .....	132
4.3.1 Wired Networks .....	132
4.3.2 Wireless Networks .....	133
4.4 Medium Access Control Protocol Issues .....	138
4.4.1 Hidden Terminal Problem .....	138
4.4.2 Reliability .....	140
4.4.3 Collision Avoidance .....	141
4.4.4 Congestion Avoidance .....	141
4.4.5 Congestion Control .....	142

4.4.6 Energy Efficiency .....	142
4.4.7 Other MAC Issues .....	143
4.5 The IEEE 802.11 Standard for Wireless LANs .....	143
4.5.1 Network Architecture .....	146
4.5.2 The Physical Layer .....	147
4.5.3 The MAC Layer .....	159
4.5.4 Security .....	169
4.5.5 The IEEE 802.11e MAC Protocol .....	174
4.5.6 A Glimpse on Past and Present IEEE 802.11 Efforts .....	178
4.6 Enhancements to IEEE 802.11 MAC .....	178
4.6.1 Power Control .....	180
4.6.2 Spatial Reusability .....	184
4.6.3 QoS Provisioning .....	189
4.7 Conclusions and Future Directions .....	191
Homework Questions/Simulation Projects .....	192
References .....	193
<b>5. Wireless PANs .....</b>	<b>196</b>
5.1 Introduction .....	196
5.2 Why Wireless PANs .....	197
5.3 The Bluetooth Technology .....	198
5.3.1 History and Applications .....	199
5.3.2 Technical Overview .....	200
5.3.3 The Bluetooth Specifications .....	206
5.3.4 Piconet Synchronization and Bluetooth Clocks .....	209
5.3.5 Master-Slave Switch .....	210
5.3.6 Bluetooth Security .....	211
5.4 Enhancements to Bluetooth .....	217
5.4.1 Bluetooth Interference Issues .....	217
5.4.2 Intra and Inter Piconet Scheduling .....	223
5.4.3 Bridge Selection .....	234
5.4.4 Traffic Engineering .....	236
5.4.5 QoS and Dynamic Slot Assignment .....	239
5.4.6 Scatternet Formation .....	241
5.5 The IEEE 802.15 Working Group for WPANs .....	243
5.5.1 The IEEE 802.15.3 .....	244
5.5.2 The IEEE 802.15.4 .....	246
5.6 Comparison between WPAN Systems .....	251
5.6.1 Range .....	252
5.6.2 Data Rate .....	252
5.6.3 Support for Voice .....	252
5.6.4 Power Management .....	253

5.6.5 Comparison and Summary of Results.....	253
5.7 Conclusion and Future Directions.....	254
Homework Questions/Simulation Projects .....	255
References.....	255
<b>6. Wireless Mesh Networks .....</b>	<b>259</b>
6.1 Introduction.....	259
6.2 Network Architecture.....	261
6.3 Challenging Technologies.....	264
6.3.1 MR Deployment.....	264
6.3.2 IGW Deployment.....	265
6.3.3 Channel Assignment .....	266
6.4 Other Issues.....	269
Homework Questions/Simulation Projects .....	269
References.....	269
<b>7. Directional Antenna Systems .....</b>	<b>270</b>
7.1 Introduction.....	270
7.2 Antenna Concepts .....	272
7.2.1 Gain.....	273
7.2.2 Radiation Pattern.....	274
7.2.3 Beam Width .....	275
7.3 Evolution of Directional Antenna Systems.....	275
7.3.1 Sectorized Antenna Systems .....	275
7.3.2 Diversity Antenna Systems .....	275
7.3.3 Smart Antenna Systems .....	276
7.4 Advantages of Using Directional Antennas .....	279
7.5 Directional Antennas for Ad Hoc Networks .....	280
7.5.1 Antenna Models .....	281
7.6 Protocol Issues on the Use of Directional Antennas .....	284
7.6.1 Directional Neighborhood.....	284
7.6.2 New Types of Hidden Terminal Problems.....	286
7.6.3 Deafness.....	289
7.7 Broadcasting .....	291
7.7.1 Broadcasting Protocols .....	292
7.8 Medium Access Control .....	297
7.8.1 Single Channel .....	298
7.8.2 Multi-Channel .....	308
7.8.3 Other Protocols .....	310
7.9 Routing .....	312
7.9.1 Protocols .....	312
7.10 Conclusions and Future Directions .....	315

Homework Questions/Simulation Projects .....	316
References.....	316
<b>8. Cognitive Radio and Networks.....</b>	<b>318</b>
8.1 Introduction.....	318
8.2 Cognitive Radio and Networks .....	319
8.3 Spectrum Access Models.....	320
8.4 Cognitive Radio Technologies and Challenges .....	323
8.5 The IEEE 802.22 Standard.....	325
8.5.1 TV Band and PUs .....	325
8.5.2 Applications of IEEE 802.22 .....	326
8.5.3 Reference Architecture .....	326
8.5.4 The IEEE 802.22 Physical (PHY) Layer .....	327
8.5.5 The IEEE 802.22 Medium Access Control (MAC) Layer ...	333
8.5.6 Spectrum Management Model .....	342
8.5.7 Spectrum Sensing.....	346
8.6 Other Activities .....	356
8.6.1 IEEE 802.22.1 and IEEE 802.22.2.....	356
8.6.2 IEEE SCC 41 .....	356
8.6.3 IEEE 802.11af.....	357
8.7 Conclusions and Future Directions .....	357
Homework Questions/Simulation Projects .....	358
References.....	358
<b>9. TCP over Ad Hoc Networks.....</b>	<b>360</b>
9.1 Introduction.....	360
9.2 TCP Protocol Overview .....	361
9.2.1 Designed and Fine-Tuned to Wired Networks.....	362
9.2.2 TCP Basics.....	362
9.2.3 TCP Header Format .....	364
9.2.4 Congestion Control .....	367
9.2.5 Round-Trip Time Estimation .....	369
9.3 TCP and MANETs.....	370
9.3.1 Effects of Partitions on TCP .....	372
9.3.2 Impact of Lower Layers on TCP.....	375
9.4 Solutions for TCP over Ad Hoc.....	388
9.4.1 Mobility-Related .....	389
9.4.2 Fairness-Related.....	395
9.5 Conclusions and Future Directions .....	401
Homework Questions/Simulation Projects .....	403
References. ....	404

<b>10. Applications of Sensor Networks</b> .....	406
10.1 Introduction.....	406
10.2 Applications of WSNs .....	408
10.3 DARPA Efforts towards Wireless Sensor Networks .....	410
10.4 Body Area Network .....	411
10.5 Habitat Monitoring.....	412
10.6 The Grand Duck Island Monitoring Network.....	413
10.6.1 Architecture.....	413
10.6.2 A Remote Ecological Micro-Sensor Network.....	414
10.6.3 Environmental Monitoring.....	415
10.6.4 Environmental Observation and Forecasting System.....	416
10.6.5 Drinking Water Quality .....	417
10.6.6 Disaster Relief Management.....	417
10.6.7 Soil Moisture Monitoring.....	418
10.7 Health Care Monitoring .....	418
10.8 Building, Bridge, and Structural Monitoring .....	419
10.9 Smart Energy and Home/Office and Industrial Assembly .....	420
Lines Applications	
10.10 Greenhouse Monitoring .....	421
10.11 Unusual Applications of WSNs .....	422
10.12 Conclusions and Future Directions .....	423
Homework Questions/Simulation Projects .....	424
References.....	424
<b>11. Sensor Networks Design Considerations</b> .....	427
11.1 Introduction.....	427
11.2 Empirical Energy Consumption.....	429
11.3 Sensing and Communication Range .....	431
11.4 Design Issues .....	434
11.4.1 Challenges.....	436
11.5 Localization Scheme.....	440
11.6 Clustering of SNs.....	442
11.6.1 Architecture of WSNs.....	444
11.6.2 Network Lifetime.....	445
11.6.3 Physical Layer.....	447
11.7 MAC Layer .....	447
11.7.1 Design Issues .....	449
11.7.2 MAC Protocols .....	450
11.7.3The Sensor-MAC.....	450
11.8 The Self-Organizing MAC for WSNs and the Eaves-drop-.....	452
And-Register Protocol	
11.8.1 SMACS .....	453

11.8.2 EAR .....	452
11.8.3 The STEM.....	458
11.8.4 Link Layer.....	459
11.9 Routing Layer .....	459
11.9.1 Directed Diffusion .....	461
11.9.2 Sequential Assignment Routing (SAR) .....	462
11.9.3 Minimum Cost Forwarding Algorithm .....	463
11.9.4 Coherent and Non-Coherent Processing .....	464
11.9.5 Energy Aware Routing.....	464
11.9.6 Hierarchical Routing.....	465
11.9.7 Cluster Based Routing Protocol (CBRP) .....	465
11.9.8 Low-Energy Adaptive Clustering Hierarchy (LEACH) ..	466
11.9.9 Threshold-sensitive Energy Efficient (TEEN) .....	468
11.9.10 Adaptive Periodic TEEN (APTEEN) .....	470
11.9.11 SPIN-based Adaptive Routing .....	472
11.9.12 Power-Efficient Gathering in Sensor Information .....	
Systems (PEGASIS)	474
11.9.13 Small Minimum Energy Communication Network .....	
(MECN)	475
11.9.14 Routing in Fixed-size Clusters .....	476
11.10 Flat versus Hierarchical .....	478
11.11 Operation-Based Protocols .....	479
11.12 Location-Based Routing .....	484
11.13 High-Level Application Layer Support .....	484
11.13.1 Distributed Query Processing .....	484
11.13.2 In-Network Processing.....	486
11.13.3 Data Aggregation.....	489
11.13.4 Mobile SNs and BSs .....	491
11.14 Conclusions and Future Directions .....	492
Homework Questions/Simulation Projects .....	492
References.....	494
<b>12. Sensor Networks in Controlled Environment and Actuators .....</b>	<b>502</b>
12.1 Introduction.....	502
12.2 Regularly Placed Sensors.....	504
12.3 Design Issues .....	508
12.4 Network Issues.....	510
12.5 RF ID as a Passive Sensor .....	511
12.6 Conclusions and Future Directions .....	511
Homework Questions/Simulation Projects .....	512
References.....	514

<b>13. Security in Ad Hoc and Sensor Networks</b> .....	515
13.1 Introduction.....	515
13.2 Distributed Systems Security.....	516
13.3 Security in Ad Hoc and Sensor Networks.....	517
13.3.1 Security Requirements.....	518
13.3.2 Security Solutions Constraints.....	519
13.3.3 Challenges.....	520
13.3.4 Authentication.....	522
13.4 Key Management.....	523
13.4.1 Conceptual Background.....	523
13.4.2 Diffie-Hellman Key Agreement.....	525
13.4.3 N-Party Diffie-Hellman Key Agreement.....	526
13.4.4 The Ingemarsson Protocol.....	529
13.4.5 The Burmester and Desmedt Protocol.....	531
13.4.6 The Hypercube Protocol.....	532
13.4.7 The Octopus Protocol.....	534
13.4.8 The CLIQUES Protocol Suite.....	537
13.4.9 The Tree-based Generalized Diffie-Hellman Protocol....	542
13.5 Secure Routing.....	543
13.5.1 Problems with Existing Ad Hoc Routing Protocols.....	544
13.5.2 Detect and Isolate Misbehaving Nodes.....	548
13.5.3 Information Leaking on Network Topology.....	548
13.5.4 Concealing Network Topology.....	549
13.5.5 Secure Routing Protocol.....	559
13.5.6 The Wormhole Attack.....	566
13.6 Cooperation in MANETs.....	567
13.6.1 CONFIDANT.....	568
13.6.2 Token-Based.....	569
13.7 Wireless Sensor Networks.....	570
13.7.1 WSN Security.....	571
13.7.2 Key Distribution and Management.....	572
13.8 Intrusion Detection Systems.....	577
13.8.1 Overview.....	577
13.8.2 Unsuitability of Current IDS Techniques.....	578
13.8.3 An IDS Architecture for Ad Hoc and Sensor Networks..	578
13.8.4 Anomaly Detection.....	582
13.9 Conclusions and Future Directions.....	583
Homework Questions/Simulation Projects.....	584
References.....	584

<b>14. Integrating MANETs, WLANs, and Cellular Networks .....</b>	<b>587</b>
14.1 Introduction.....	587
14.2 Ingredients of a Heterogeneous Architecture.....	589
14.2.1 Mobile User Stations.....	590
14.2.2 Base Station and Access Point. ....	591
14.2.3 Core IP Network (CN) .....	591
14.2.4 Possible Communication Scenarios .....	592
14.2.5 Design Factors .....	593
14.3 Protocol Stack. ....	594
14.3.1 The Physical Layer.....	595
14.3.2 The Data Link Layer.....	596
14.3.3 The Network Layer .....	598
14.3.4 Transport Layer.....	607
14.3.5 Application Layer .....	609
14.3.6 Mobility and Connection Management.....	609
14.4 Comparison of the Integrated Architectures .....	613
14.5 Conclusions and Future Directions .....	616
Homework Questions/Simulation Projects .....	617
References.....	618
 <b>Index .....</b>	 <b>621</b>
 <b>About the Authors .....</b>	 <b>635</b>
