Mariana Reyes Pérez

A specification technique for the conceptual design of manufacturing systems

A specification technique for the conceptual design of manufacturing systems

Table of contents

Page

1 Introduction 1
1.1 Problem statement 1
1.2 Objective 3
1.3 Approach 4

2 Problem analysis 5
2.1 Definition of terminologies 5
2.2 Principles of product design 8
2.2.1 Product development 9
2.2.1.1 VDI Guideline 2206 (VDI 2206) 10
2.2.1.2 Product's principle solution 11
2.2.2 Manufacturing system development 14
2.2.2.1 V-Model for the production system 14
2.2.2.2 GRAI integrated methodology (GIM) 15
2.2.2.3 Axiomatic Design 18
2.2.2.4 Systematic for the planning and implementation of complex production systems 20
2.2.2.5 Systematic for the process sequence planning and the resources planning 22
2.2.2.6 A description model for the production system *planning* 24
2.2.2.7 Manufacturing system's principle solution 25
2.3 Problem definition 27
2.4 Requirements 31

3 State of the Art 35
3.1 Specification techniques 35
3.1.1 GRAPES 35
3.1.2 Integrative specification of the product's and production system's conceptions 39
3.1.3 SysML 43

3.1.4 Manufacturing process model ... 46
3.1.5 REFA's symbology to depict flexible manufacturing systems ... 49
3.1.6 Process mapping ... 50
3.1.7 Value Stream Mapping ... 53
3.1.8 Assembly priority chart ... 54
3.1.9 VDI-Guideline 2860 ... 56
3.1.10 VDI/VDE Guideline 3682 ... 58
3.1.11 IDEF ... 60
3.2 Need for action ... 65

4 A specification technique for the conceptual design of manufacturing systems ... 69
4.1 Basic idea – A specification based on a coherent system of cross-linked partial models ... 69
4.2 Principle approach of the conceptual design of manufacturing systems ... 71
4.3 Constructs, pictograms and relationships ... 73
4.3.1 Basic constructs ... 74
4.3.2 Pictograms ... 77
4.3.3 Relationships ... 83
4.4 Partial models ... 84
4.4.1 Requirements ... 84
4.4.2 Process sequence ... 85
4.4.3 Resources ... 86
4.4.4 Shape ... 88
4.5 Specification of the partial models' cross-linking ... 88
4.6 Modelling rules ... 91
4.6.1 Basic rules ... 92
4.6.2 Modelling special cases ... 96
4.7 Data Model ... 102
4.8 Evaluation of the specification against the requirements ... 107

5 Application example ... 111

6 Summary and Outlook ... 117

7 Bibliography ... 121

Curriculum vitae ... 127
