CONTENTS

Preface	v
List of Participants	xvii
Committees	xix
Part A Summer School on Decoherence, Entanglement and Entropy	1
Black Holes and Qubits <i>L. Borsten, M. J. Duff, and W. Rubens</i>	3
Weak Value with Decoherence <i>A. Hosoya</i>	108
Lectures on Matrix Product Representation of States <i>V. Karimipour and M. Asoudeh</i>	117
On a Possible Definition of Entanglement in Antisymmetric States <i>T. Ichikawa, T. Sasaki, and I. Tsutsui</i>	150
Entanglement Measures for Intermediate Separability <i>T. Sasaki, T. Ichikawa, and I. Tsutsui</i>	153
Unruh Effect on Quantum Teleportation and Entanglement: Implications on Black Hole Information <i>K. Shiokawa</i>	163
Systematic Construction of Generalized Bell Inequalities <i>S. Tanimura</i>	192

On 3-Variable Exponential Polynomials and Quantum Algorithms <i>Y. Ohno, Y. Sasaki, and C. Yamazaki</i>	211
Part B Workshop on Matrix Product State Formulation and Density Matrix Renormalization Group Simulations (MPS&DMRG)	225
Application of Density Matrix Renormalization Group Method to Photoinduced Phenomena in Strongly Correlated Electron Systems <i>H. Matsueda</i>	227
Density-Matrix Renormalization Group Method for Tomonaga-Luttinger Liquid <i>T. Hikihara</i>	265
Supersymmetric Valence-Bond Solid Models — Hidden Order and Dynamics <i>K. Totsuka and K. Hasebe</i>	281
Matrix Product States in Quantum Integrable Models <i>H. Katsura and I. Maruyama</i>	302
A Systematic Way to Find and Construct Exact Finite Dimensional Matrix-Product Stationary States <i>Y. Heida and T. Sasamoto</i>	322
