
Belal E. Baaquie

The Theoretical Foundations of Quantum Mechanics

 Springer

Contents

| | | |
|----------|---|----|
| 1 | Synopsis | 1 |
| 2 | The Quantum Entity and Quantum Mechanics | 5 |
| 2.1 | What Is a Classical Entity? | 5 |
| 2.2 | The Entity in Quantum Mechanics..... | 8 |
| 2.3 | Describing an Indeterminate Quantum Entity | 10 |
| 2.4 | The Copenhagen Quantum Postulate | 12 |
| 2.5 | Five Pillars of Quantum Mechanics..... | 14 |
| 2.6 | Degree of Freedom Space \mathcal{F} | 15 |
| 2.7 | State Space $\mathcal{V}(\mathcal{F})$ | 15 |
| 2.8 | Operators $\mathcal{O}(\mathcal{F})$ | 16 |
| 2.9 | The Schrödinger Equation for State $\psi(t, \mathcal{F})$ | 17 |
| 2.10 | Indeterminate Quantum Paths | 18 |
| 2.11 | The Process of Measurement..... | 20 |
| 2.12 | Summary: Quantum Entity | 22 |
| 3 | Quantum Mechanics: Empirical and Trans-empirical | 25 |
| 3.1 | <i>Real Versus Exist</i> | 26 |
| 3.2 | Empirical, Trans-empirical, and Indeterminate..... | 27 |
| 3.3 | Quantum Mechanics and the Trans-empirical | 29 |
| 3.4 | Quantum Degree of Freedom \mathcal{F} Is Trans-empirical..... | 31 |
| 3.5 | The Quantum State ψ : Transition | 33 |
| 3.6 | Trans-empirical Domain and Laws of Physics | 35 |
| 3.7 | Quantum Superposition: Trans-empirical Paths..... | 36 |
| 3.8 | Trans-empirical Interpretation of Two-Slit Experiment..... | 42 |
| 3.9 | The Trans-empirical Quantum Principle..... | 43 |
| 3.10 | Does the Quantum State $\psi(t, \mathcal{F})$ “Exist”? | 44 |
| 3.11 | Summary | 46 |
| 4 | Degree of Freedom \mathcal{F}; State Space \mathcal{V} | 49 |
| 4.1 | Dirac’s Formulation of the Quantum State | 50 |
| 4.2 | State Space and Experiment | 50 |
| 4.3 | Quantum Degree of Freedom \mathcal{F} | 52 |
| 4.4 | Binary Degree of Freedom and State Space | 53 |
| 4.5 | Degree of Freedom $\mathcal{F}_{(2N+1)}$: State Space $\mathcal{V}_{(2N+1)}$ | 57 |

| | | |
|----------|---|------------|
| 4.6 | Continuous Degree of Freedom | 59 |
| 4.7 | Basis States for State Space | 62 |
| 4.8 | Unitary Transformation: Momentum Basis..... | 63 |
| 4.9 | State Space \mathcal{V} | 66 |
| 4.10 | Hilbert Space | 68 |
| 4.11 | Summary | 69 |
| 5 | Operators | 71 |
| 5.1 | Operators: Trans-empirical to Empirical..... | 72 |
| 5.2 | Hermitian Operators | 73 |
| 5.3 | Eigenstates: Projection Operators | 75 |
| 5.4 | Operators and Quantum Numbers..... | 78 |
| 5.5 | Periodic Degree of Freedom..... | 80 |
| 5.6 | Position and Momentum Operators \hat{x} and \hat{p} | 82 |
| 5.7 | Heisenberg Commutation Equation | 85 |
| 5.8 | Expectation Value of Operators | 87 |
| 5.9 | The Schrödinger Equation | 88 |
| 5.10 | Heisenberg Operator Formulation..... | 89 |
| 5.11 | Summary | 90 |
| 6 | Density Matrix: Entangled States | 93 |
| 6.1 | Tensor Product | 94 |
| 6.2 | The Outer Product | 95 |
| 6.3 | Partial Trace for Outer Products..... | 97 |
| 6.4 | Density Matrix ρ | 98 |
| 6.5 | The Schmidt Decomposition | 100 |
| 6.6 | Reduced Density Matrix | 102 |
| 6.7 | Separable Quantum Systems | 104 |
| 6.8 | Entangled Quantum States | 105 |
| 6.9 | A Pair of Entangled Spins | 107 |
| 6.10 | Quantum Entropys | 108 |
| 6.11 | Pure and Mixed Density Matrix | 111 |
| 6.12 | Summary | 113 |
| 7 | Quantum Indeterminacy | 115 |
| 7.1 | The EPR Paradox | 116 |
| 7.2 | The Bell-CHSH Operator..... | 119 |
| 7.3 | Classical Probability: Objective Reality | 121 |
| 7.4 | The Bell Inequality | 123 |
| 7.5 | The Bell Inequality Non-violation | 125 |
| 7.6 | Bell Inequality Violation: Entangled States | 128 |
| 7.7 | The Bell-Kochen-Specker Inequality | 131 |
| 7.8 | Commuting and Non-commuting Operators | 135 |
| 7.9 | Quantum Probability | 136 |
| 7.10 | A Metaphor..... | 141 |
| 7.11 | Summary | 142 |

| | | |
|-----------|---|-----|
| 8 | Quantum Superposition | 145 |
| 8.1 | Superposing State Vectors | 146 |
| 8.2 | Probability and Probability Amplitudes | 148 |
| 8.3 | Empirical and Trans-Empirical Paths | 150 |
| 8.4 | Successive Slits | 153 |
| 8.5 | The Mach–Zehnder Interferometer | 154 |
| 8.6 | Determinate Empirical Paths: No Interference | 156 |
| 8.7 | Indeterminate Trans-Empirical Paths: Interference | 157 |
| 8.8 | Quantum Eraser | 159 |
| 8.9 | Erasing Interference | 160 |
| 8.10 | Restoring Interference | 162 |
| 8.11 | Partial Quantum Eraser | 165 |
| 8.12 | Summary | 169 |
| 9 | Quantum Theory of Measurement | 171 |
| 9.1 | Measurement: Trans-Empirical to Empirical | 173 |
| 9.2 | Position Projection Operator | 174 |
| 9.3 | Repeated Observations in Quantum Mechanics | 176 |
| 9.4 | Expectation Value of Projection Operators | 177 |
| 9.5 | The Experimental Device | 181 |
| 9.6 | The Process of Measurement | 183 |
| 9.7 | Mixed Density Matrix ρ_M | 185 |
| 9.8 | Reduced Density Matrix ρ_R | 187 |
| 9.9 | Preparation of a Quantum State | 192 |
| 9.10 | The Heisenberg Uncertainty Principle | 195 |
| 9.11 | Theories of Quantum Measurement | 201 |
| 9.12 | Summary | 202 |
| 10 | The Stern–Gerlach Experiment | 205 |
| 10.1 | The Experiment | 205 |
| 10.2 | Classical and Quantum Predictions | 207 |
| 10.3 | The Stern–Gerlach Hamiltonian | 208 |
| 10.4 | Electron’s Time Evolution | 211 |
| 10.5 | Entanglement of Spin and Device | 214 |
| 10.6 | Summary of Spin Measurement | 215 |
| 10.7 | Irreversibility and Collapse of State Vector | 217 |
| 10.8 | Interpretation of Spin Measurement | 218 |
| 10.9 | Summary | 219 |
| 11 | The Feynman Path Integral | 221 |
| 11.1 | Probability Amplitude and Time Evolution | 221 |
| 11.2 | Evolution Kernel | 223 |
| 11.3 | Superposition of Trans-Empirical Paths | 226 |
| 11.4 | The Dirac–Feynman Formula | 227 |
| 11.5 | The Lagrangian | 229 |
| 11.6 | The Feynman Path Integral | 231 |

| | | |
|-----------|---|------------|
| 11.7 | Path Integral for Evolution Kernel | 234 |
| 11.8 | Composition Rule for Probability Amplitudes | 239 |
| 11.9 | Trans-Empirical Paths and Path Integral | 241 |
| 11.10 | State Vector and Trans-Empirical Paths | 243 |
| 11.11 | Path Integral Quantization: Action | 244 |
| 11.12 | Hamiltonian from Lagrangian | 245 |
| 11.13 | Summary | 248 |
| 12 | Conclusions | 251 |
| 12.1 | Three Formulations of Quantum Mechanics | 252 |
| 12.2 | Interpretations of Quantum Mechanics | 253 |
| | Glossary of Terms | 257 |
| | List of Symbols | 259 |
| | References | 263 |
| | Index | 265 |
