

Phase Interaction in Composite Materials

Edited by

S. A. Paipetis and G. C. Papanicolaou

Omega Scientific

Contents

Preface	v
Structural and damage dependence of composite system response G. C. Sih, <i>USA</i>	1
Deformation micromechanics of high modulus fibres and composites R. J. Young, R. J. Day and M. Zakikhani, <i>UK</i>	20
Failure processes in fibrous composites J. G. Morley, <i>UK</i>	29
Interphase layers in polymer composites Yu. S. Lipatov, <i>Ukraine</i>	39
The effect of acidic environments on stressed glass-reinforced plastics P. J. Hogg, <i>UK</i>	50
Chemical and physical design of fibre–matrix interlayers G. Marom, <i>Israel</i>	64
Bone cement—a review of past and present developments J. C. Behiri, <i>UK</i>	72
Property control and identification of composite materials via hemivariational inequalities P. D. Panagiotopoulos, <i>Greece</i>	85
Polymer composites under wear loading K. Friedrich, <i>FRG</i>	92
Influence of different parameters on the compression fatigue of carbon-fibre-reinforced laminates H. C. Goetting and H. W. Bergmann, <i>FRG</i>	107
The role of fibre strength and interactions with the matrix on the strength and failure of uniaxial composites in tension M. G. Bader, <i>UK</i>	125
Influence of the fibre characteristics on the phase interaction in steel-fibre-reinforced cement composites A. Burakiewicz and P. Stroeven, <i>The Netherlands</i>	137
Interfaces in SiC–Al composites R. J. Arsenault, S. Li and P. Jena, <i>USA</i>	146
Interfacial friction in sand–geotextile composites G. A. Athanasopoulos and P. Z. Bousias, <i>Greece</i>	155
On the interface debonding and frictional sliding in composites: the material inclusion problem G. E. Stavroulakis and P. D. Panagiotopoulos, <i>Greece</i>	165
Raman optomechanical studies on fibres, composites and fibre–matrix interfaces C. Galiotis, <i>UK</i>	173

Physicochemical reactions between corroded steel and cement paste J. L. Gallias and J. Grandet, <i>France</i>	185
Interaction phenomena in fibre-reinforced ceramic composites R. Kochendörfer, <i>FRG</i>	194
Evaluation of the bonding of glass cermet to enamel and dentine A. Kakaboura, G. Vougiouklakis and G. C. Papanicolaou, <i>Greece</i>	209
New results in the study of fracture properties of fibres and model composites H. D. Wagner, <i>Israel</i>	217
Deformation and fracture properties of an epoxy modified with CTBN rubber and glass beads Z. Heshan and L. Berglund, <i>Sweden</i>	226
Microstructure–fracture toughness relationship for short-fibre-reinforced polypropylene homopolymer and polypropylene–elastomer blends J. Karger-Kocsis, <i>Hungary</i> K. Friedrich, <i>FRG</i>	234
Dynamic crack propagation behaviour of sandwich plates G. A. Papadopoulos, <i>Greece</i>	244
Zones of yield initiation for the interface crack C. P. Spyropoulos, <i>Greece</i>	253
Fracture of glass-fibre-reinforced cements A. J. Bushby and C. K. L. Davies, <i>UK</i>	262
Investigation of interfacial cracking in hydraulic concrete by a replica procedure E. Ringot, G. Escadeillas and J. P. Ollivier, <i>France</i>	277
Structural loosening approach to the concept of the fracture process zone in cementitious materials P. Stroeven, <i>The Netherlands</i>	287
A cracked composite beam in three-point bending E. E. Gdoutos and D. A. Zacharopoulos, <i>Greece</i>	297
The influence of fibre–matrix interactions in determining the mechanical properties of composites N. L. Hancox, <i>UK</i>	305
Evaluation of the strength of fibre-reinforced aluminium composite material A. Okura and T. Ide, <i>Japan</i>	320
Investigation of the compressive strength of carbon-fibre-reinforced plastics C. Soutis, P. A. Smith and N. A. Fleck, <i>UK</i>	327
The influence of the fibre–matrix interface on the fracture morphology of aramid–epoxy composites under dry and moist conditions I. Verpoest, <i>Belgium</i>	345
Comparison of light-weight mortars formed by perlite and pumice-stone and treated with synthetic resins G. D. Stefanou, <i>Greece</i>	358
The effect of moisture on the creep of asymmetrically reinforced bending beams J. V. Esaiaashvili, B. M. Grigolashvili and I. V. Bibiluri, <i>USSR</i>	365
Elastic swelling stresses in mixtures of clay, water and air T. K. Karalis, <i>Greece</i>	372

Seismic behaviour of exterior beam–column joints of conventional or fibre-reinforced concrete	380
A. G. Tsonos, I. A. Tegos and G. G. Penelis, <i>Greece</i>	
An inverse scattering problem for an ellipsoidal inclusion with an interphase in an acoustic field	390
G. Dassios, S. A. Paipetis and A. Pournaras, <i>Greece</i>	
A fibre–resin micromechanics analysis of the delamination front in a double cantilever beam specimen	396
J. H. Crews, Jr, K. N. Shivakumar and I. S. Raju, <i>USA</i>	
Characterization of aramid fibres and examination of aramid–epoxy interfaces using laser Raman spectroscopy	406
H. Jahankhani and C. Galiotis, <i>UK</i>	
Strain dependences of the Raman spectra of carbon fibres and residual strain mapping in composites	417
N. Melanitis, C. Galiotis and D. N. Batchelder, <i>UK</i>	
Dynamic wetting in composite preparation: a model study	428
J. J. Elmendorp and F. During, <i>The Netherlands</i>	
Theories of the bending and static buckling of laminated anisotropic rectangular plates: a survey	439
N. G. Tsvualis and V. J. Papazoglou, <i>Greece</i>	
Fracture behaviour of pitch-based carbon-fibre composites with toughened epoxy resin systems	447
S. Murakami, O. Watanabe, M. Miyazaki, H. Inoue, A. Murakami and T. Yoshiki, <i>Japan</i>	
Phase interaction in steel fibre concrete under biaxial stress conditions	453
I. A. Tegos, <i>Greece</i>	
Hydroxyapatite-fibre-reinforced bone cement	460
A. Murakami, M. Murakami, T. Yoshiki, <i>Japan</i>	
J. Behiri and W. Bonfield, <i>UK</i>	
Bending of a plate containing a rigid inclusion	467
E. E. Gdoutos, M. G. Katsarou and M. A. Kattis, <i>Greece</i>	
Failure of a plate containing a crack and a circular inclusion	476
G. Papakaliatakis and E. E. Gdoutos, <i>Greece</i>	
Dielectric study of polyurethane block copolymers	483
L. Apekis, C. Christodoulides, P. Pissis, G. Spathis, E. Kontou and V. Kefalas, <i>Greece</i>	
Kevlar–polyurethane composites: a new incorporation technique	489
A. V. Konstantinidou, H. J. Petsalas and A. G. Andreopoulos, <i>Greece</i>	
Crosslinked polyethylene reinforced with aramid fibres	496
H. J. Petsalas and A. G. Andreopoulos, <i>Greece</i>	
Estimation of the temperature coefficients of the interfacial energies in Al_2O_3 –liquid metal systems	504
P. Nikolopoulos and G. Angelopoulos, <i>Greece</i>	
Interaction of cavities in the matrix with debonding along a circular inclusion	510
G. Tsamasphyros and E. E. Theotokoglou, <i>Greece</i>	
Mechanical properties of polystyrene–polyurethane blends	520
J. Milios, V. Kefalas and G. Spathis, <i>Greece</i>	

Further developments in the analytical modelling of interfaces	524
S. A. Paipetis, V. Kostopoulos and K. Vlattas, <i>Greece</i>	
Forming techniques applied to carbon-fibre-reinforced thermoplastics	536
S. A. Paipetis, S. Pantelakis, G. C. Papanicolaou, G. Pissinou, <i>Greece</i> V. Schulze, <i>FRG</i>	
Acoustic emission monitoring during fatigue tests of thermosetting carbon-fibre-reinforced laminates	542
Z. Marioli-Riga and S. A. Paipetis, <i>Greece</i>	
The off-axis four-point bending method for the estimation of the interlaminar shear strength of fibre-reinforced composites	551
E. Sideridis, <i>Greece</i> J. N. Ashton and R. Kitching, <i>UK</i>	
A partly debonded rigid circular fibre inclusion in an infinite matrix	566
E. E. Gdoutos and M. A. Kattis, <i>Greece</i>	
Studies of the warpage of woven-glass-epoxy laminates	574
D. Karalekas, I. M. Daniel and J. T. Gotro, <i>USA</i>	
Equivalence of environmental and strain rate parameters in the characterization of graphite-epoxy composite	585
G. Peimanidis, I. M. Daniel and G. Yaniv, <i>USA</i>	
Abstracts	593
