

# The Structure of the World

*Metaphysics and Representation*

Steven French

OXFORD  
UNIVERSITY PRESS

# Contents

1. Theory Change: From Fresnel's Equations to Group-Theoretic Structure	1
1.1 Introduction	1
1.2 Challenge No. 1: The Pessimistic Meta-Induction (PMI)	2
1.3 Semi-Realism and Property-Oriented Realism	5
1.4 ESR and 'Hidden' Natures	8
1.5 Another Case Study: the Zeeman Effect	14
1.6 Quantum Mechanics and Heuristic Plasticity	15
2. Mixing in the Metaphysics 1: Underdetermination	21
2.1 Introduction	21
2.2 Challenge Number 2: Underdetermination	21
2.3 Breaking the Underdetermination <sub>1</sub> : Appeal to Metaphysics	24
2.4 Breaking the Underdetermination <sub>2</sub> : Appeal to Heuristic Fruitfulness	25
2.5 Breaking the Underdetermination <sub>3</sub> : Appeal to Less Structure	27
2.6 Breaking the Underdetermination <sub>4</sub> : Appeal to the More 'Natural' Formulation	31
2.7 Metaphysical Underdetermination	33
2.8 Breaking the Underdetermination <sub>5</sub> : 'Weak' Discernibility	38
2.9 Breaking the Underdetermination <sub>6</sub> : Non-Individuality and QFT	41
2.10 Don't Break It: Embrace It	42
2.11 Don't Break It: Seek the Commonalities	43
2.12 Concluding Remarks	47
3. Mixing in the Metaphysics 2: Humility	48
3.1 Introduction	48
3.2 The Viking Approach to Metaphysics	49
3.3 The Informing of Metaphysics by Physics	51
3.4 Handling Humility	54
3.5 Gaining Understanding while Reducing Humility	60
3.6 Manifestations of Humility in the Realism Debate	61
4. Scenes from the Lost History of Structuralism	65
4.1 Introduction	65
4.2 The Poincaré Manoeuvre	66
4.3 The Analysis of Matter	68
4.4 Wigner, Weyl, and the Application of Group Theory to Quantum Statistics	74
4.5 Eddington's Subjective Structuralism	79
4.6 Scribbling on the Blank Sheet	81

4.7	The Battle with Braithwaite	83
4.8	Cassirer's Kantianism	87
4.9	From Kant to neo-Kantianism	88
4.10	Space-time, Structures, and Group Theory	90
4.11	Quantum Mechanics, Causality, and Objects	91
4.12	What We Can Take from Cassirer	99
4.13	Conclusion	100
5.	The Presentation of Objects and the Representation of Structure	101
5.1	Introduction: Presentation vs Representation	101
5.2	Modes of Representation: Partial Structures	102
5.3	Modes of Representation: Shared Structure	104
5.4	Modes of Presentation: Group Theory	106
5.5	Spin and Structural Realism	109
5.6	Set Theory as Cleaver	112
5.7	Presentation of Objects and Properties via Shared Structure	113
5.8	Doing Useful Work	115
5.9	Modes of Representation: the Ramsey Sentence	116
5.10	Realism, Reference, and Representation	124
5.11	Models, Mediation, and Transparency	127
5.12	Modes of Representation: Morphisms	130
5.13	Modes of Representation: Structure as Primitive	132
5.14	Conclusion: Presentation and Representation	137
6.	OSR and 'Group Structural Realism'	139
6.1	Introduction	139
6.2	Concern 1: Toppling the Tower of Automorphism	139
6.3	Concern 2: From Group Structure to Dynamical Structure	142
6.4	Concern 3: In Defence of Invariantism	157
7.	The Elimination of Objects	164
7.1	Introduction	164
7.2	Dependence and Elimination: Tables and Particles	164
7.3	Eddington's Two Tables and the Elimination of Everyday Objects	167
7.4	Metaphysical Manoeuvres	171
7.5	Ontic Structural Realism and the Elimination of Particles (as Objects)	177
7.6	Priority and Dependence in OSR	178
7.7	Bringing Back the Bundle	183
7.8	Conclusion	190
8.	Mathematics, 'Physical' Structure, and the Nature of Causation	192
8.1	Introduction	192
8.2	Distinguishing Mathematical from Physical Structure: First Go Round	197
8.3	Structure-Non-Structure from a Structuralist Perspective	200
8.4	Back to the Problem of Collapse	202

8.5	Mathematical Structuralism, its Motivations, and its Methodology	203
8.6	Crossing the Bridge from Mathematical Structuralism to Physical Structuralism: Abstraction and Properties	205
8.7	Causation without a Seat	212
8.8	'Seats' and Structures without Causation	218
8.9	Conclusion	229
9.	Modality, Structures, and Dispositions	231
9.1	Introduction	231
9.2	Humean Structuralism	231
9.3	Doing Away with Dispositions	238
9.4	S&M and Laws	245
9.5	Mumford's Dilemma	248
9.6	Dispositions and Symmetries	249
9.7	Dispositional Structuralism: Causal Structures	252
9.8	Semi-Realism and Sociability	254
9.9	Conclusion	262
10.	The Might of Modal Structuralism	263
10.1	Introduction	263
10.2	Laws, Symmetries, and Primitive Modality	264
10.3	Symmetries and Modality	265
10.4	Laws, Models, and Modality	274
10.5	Modality 'in' the Theory	276
10.6	Representation, Modality, and Structure	277
10.7	Determinables, Determinates, and Fundamentality	279
10.8	Dependence and Determinables: Delineating the Relationship between Structure and Object	288
10.9	Structure, Counterfactuals, and Necessity	290
10.10	Counterlegals and Structuralism	299
10.11	Conclusion	302
11.	Structure, Modality, and Unitary Inequivalence	303
11.1	Introduction	303
11.2	Being a Realist about QFT	303
11.3	Field-Theoretic Structuralism	304
11.4	The Generation of Inequivalent Representations	306
11.5	Option 1: Adopt 'Lagrangian' QFT	308
11.6	Response: AQFT, Inequivalence, and Underdetermination	309
11.7	Option 2: Use the Swiss Army Knife	311
11.8	Case 1: Symmetry Breaking and Structuralism	312
11.9	Case 2: Superselection Sectors and Statistics	315
11.10	Back to Inequivalent Representations	317
11.11	Conclusion	322

12. Shifting to Structures in Biology and Beyond	324
12.1 Introduction	324
12.2 Reductionism and the Asymmetry of Molecular Structure	325
12.3 Shifting to Structuralism in Biology	329
12.4 Laws and the Lack Thereof	330
12.5 Models and Structures in Biology	332
12.6 Identity and Objecthood in Biology	339
12.7 Gene Identity	339
12.8 Gene Pluralism vs the Hierarchical Approach	342
12.9 The General Problem of Biological Individuality	344
12.10 Causation in Biology	346
12.11 The Heterogeneity of Biological Entities	348
12.12 Conclusion	351
12.13 Further Developments	351
<i>Bibliography</i>	353
<i>Index of Names</i>	385
<i>Index of Subjects</i>	390
