Introduction xix

Chapter 1. An Impossibility Theorem on Beliefs in Games 1
Adam Brandenburger and H. Jerome Keisler

1 Introduction 2
2 The Existence Problem for Complete Belief Models 5
3 Belief Models 6
4 Complete Belief Models 8
5 Impossibility Results 10
6 Assumption in Modal Logic 13
7 Impossibility Results in Modal Form 15
8 Strategic Belief Models 19
9 Weakly Complete and Semi-Complete Models 21
10 Positively and Topologically Complete Models 24
11 Other Models in Game Theory 27
References 29

Chapter 2. Hierarchies of Beliefs and Common Knowledge 31
Adam Brandenburger and Eddie Dekel

1 Introduction 31
2 Construction of Types 33
3 Relationship to the Standard Model of Differential Information 36
References 40

Chapter 3. Rationalizability and Correlated Equilibria **43**
Adam Brandenburger and Eddie Dekel

1 Introduction 43
2 Correlated Rationalizability and A Posteriori Equilibria . . . 46
3 Independent Rationalizability and Conditionally Independent A Posteriori Equilibria 51
4 Objective Solution Concepts 54
References 56

Chapter 4. Intrinsic Correlation in Games **59**
Adam Brandenburger and Amanda Friedenberg

1 Introduction 60
2 Intrinsic vs. Extrinsic Correlation 62
3 Comparison 63
4 Organization of the Chapter 66
5 Type Structures 66
6 The Main Result 69
7 Comparison Contd. 73
8 Formal Presentation 76
9 CI and SUFF Formalized 77
10 RCBR Formalized 79
11 Main Result Formalized 80
12 Conclusion 87
Appendices 88
References 110

Chapter 5. Epistemic Conditions for Nash Equilibrium **113**
Robert Aumann and Adam Brandenburger

1 Introduction 113
2 Interactive Belief Systems 117
3 An Illustration 120
4 Formal Statements and Proofs of the Results 121
5 Tightness of the Results 124
6 General (Infinite) Belief Systems 128
7 Discussion 129
References 135

Chapter 6. Lexicographic Probabilities and Choice Under Uncertainty **137**
Lawrence Blume, Adam Brandenburger, and Eddie Dekel

1 Introduction 138
2 Subjective Expected Utility on Finite State Spaces 140
3 Lexicographic Probability Systems and Non-Archimedean SEU Theory 142
4 Admissibility and Conditional Probabilities 145
5 Lexicographic Conditional Probability Systems 147
6 A "Numerical" Representation for Non-Archimedean SEU 150
7 Stochastic Independence and Product Measures 152
Appendix 154
References 159

Chapter 7. Admissibility in Games **161**
Adam Brandenburger, Amanda Friedenberg, and H. Jerome Keisler

1 Introduction 162
2 Heuristic Treatment 163
3 SAS's and the IA Set 176
4 Lexicographic Probability Systems 177
5 Assumption 178
6 Properties of Assumption 180
7 Type Structures 181
8 Characterization of RCAR 185
9 Characterization of RmAR in a Complete Structure 187
10 A Negative Result 190
11 Discussion 190
Appendices 192
References 210

Chapter 8. Self-Admissible Sets **213**
Adam Brandenburger and Amanda Friedenberg

1 Introduction 213
2 Preview 216
3 Self-Admissible Sets 217
4 Applications 220

5 Strategic-Form Properties of SAS's 224
6 Extensive-Form Properties of SAS's 225
7 Perfect-Information Games 229
8 Discussion 235
Appendix 240
References 247
