Authors	xxv

SECTION I *Engineering Fundamentals of Bioprocessing*

I	Frontiers of Bioprocessing	3
1.1	Defining Bioprocessing	3
1.1.1	Biotechnology Connection of Bioprocessing	4
1.1.2	History of Bioprocessing	6
1.2	Current and Emerging Trends in Bioprocess Engineering	7
1.2.1	Bioinformatics	8
1.2.2	Tissue Engineering	14
1.2.3	Eugenics and Cloning	15
1.2.4	Genomics	16
1.2.5	Genetically Modified System	17
1.2.6	DNA Microchips	18
1.3	Materials Advances	19
1.4	Nanoscale Advances	20
1.5	Bioprocessing for Chemical and Biologic Product Manufacturing	21
1.5.1	Alcoholic Beverage	23
1.5.2	Biofuel	24
1.5.3	Metabolic Manufacturing of Chemicals and Drugs	25
1.5.4	Recombinant Manufacturing of Drugs	25
1.6	Economic Predictions and Careers in Bioprocess Engineering	26
1.7	Skills Needed for Future Bioprocess Engineers	27
	Appendix IA: Time Line of Biotechnology Development	28
2	Introduction to Molecular Biology	45
2.1	Introduction	45
2.2	Building Blocks of Life: DNA, RNA, and Proteins	45
2.3	DNA Replication	48
2.4	Transcription	49
2.5	Translation	50
2.6	Genes	53
2.7	Mutations	54

CONTENTS

2.8	Chromosome	56
2.9	DNA Cloning	59
3	Introduction to Biochemistry	63
3.1	Introduction	63
3.2	DNA Structure	63
3.3	RNA Structure	66
3.4	Protein Structure and Function	67
3.4.1	Amino Acids	67
3.4.2	Peptide	71
3.4.3	Helix Structure	73
3.4.4	Motif	74
3.4.5	Other Proteins	77
3.5	Carbohydrates	78
3.6	Lipids, Fats, and Steroids	84
3.7	Basic Metabolic Pathways	91
3.7.1	Glycolysis and the Citric Acid Cycle	91
3.7.2	Photosynthesis	93
3.7.3	Nitrogen Cycle	94
4	Introduction to Cellular Biology and Microbiology	97
4.1	Introduction	97
4.2	General Cell Structure	97
4.3	Eukaryotes, Prokaryotes, Archaea, and Viruses	100
4.3.1	Eukaryotes	100
4.3.2	Prokaryotes	102
4.3.3	Archaea	106
4.3.4	Viruses	109
4.4	Intracellular Organelles	112
4.5	Cellular Transport	114
4.6	Intracellular Signal Transduction	116
5	Reaction Stoichiometry, Thermodynamics, and Kinetics	121
5.1	Introduction	121
5.2	Mass and Energy Balances	121
5.3	Fundamentals of Chemical Reactions	123
5.4	Basic Mass Transfer: Diffusion and Convection	127
5.5	Basic Fluid Dynamics	129
5.6	Basic Thermodynamics	132
5.7	Basic Reaction Kinetics	133

6	Kinetics of Enzymes and Cell Growth	145
6.1	Introduction	145
6.2	Basic Michaelis–Menten Kinetics	145
6.2.1	Quasi-Steady-State Approximation	149
6.2.2	Determination of Constants	151
6.3	Michaelis–Menten Kinetics with Inhibition	151
6.4	pH and Transport Limitations	160
6.5	Other Enzyme Kinetics	161
6.6	Prokaryotic and Eukaryotic Growth Models	162
6.7	Advanced Prokaryotic and Eukaryotic Growth Models	167
7	Data Management	177
7.1	Introduction	177
7.2	Good Laboratory Practices	178
7.2.1	Overview	178
7.2.2	Elements of GLP	179
7.3	Electronic Data Handling	184
7.3.1	Background	184
7.3.2	CRF 21 Part II: Electronic Records	185
7.4	Data Errors	188
7.4.1	Absolute and Relative Errors	188
7.4.2	Systematic and Random Errors	188
7.5	Statistical Analysis	190
7.6	Data Conclusions	191
7.7	Flow Diagrams	193

SECTION II *Handbook of Bioprocessing*

8	Elements of Bioprocessing	203
8.1	Introduction	203
8.2	Upstream Processing	203
8.2.1	Preparation and Storage of Solutions	204
8.2.2	Sterilization of Input Materials	205
8.2.3	Inoculum Preparation	206
8.2.4	Cleaning-in-Place	207
8.3	Bioreactor	207
8.3.1	Bioreactor Types	207
8.3.2	Unit Procedures	208

CONTENTS

8.4	Downstream Processing	212
8.4.1	Biomass Removal	213
8.4.2	Homogenization/Cell Disruption	214
8.4.3	Concentration	214
8.4.4	Phase Separation	215
8.4.5	Product Separation and Purification	217
8.4.6	Viral Inactivation	220
8.4.7	Protein Solubilization and Refolding	220
8.4.8	Final Product Processing	221
8.4.9	Waste Treatment: Reduction and Recycling	222
9	Genetically Modified Organisms	225
9.1	Introduction	225
9.2	Cell Line Characterization	226
9.3	Characterization of Cell and Virus Banks	226
9.3.1	Cell Banks	227
9.3.2	Cell Line Selection	229
9.4	Cell Line Construction	233
9.4.1	Endogenous Proteins Expression	233
9.5	Designing GMCs	237
9.5.1	Gene Construct	237
9.6	Vector	240
9.7	Host Systems	243
9.8	Expression System in <i>E. coli</i>	244
9.9	Configuration of Efficient Expression Vectors	245
9.10	Protein Production	247
9.10.1	Strategies for Production	248
9.10.2	Production by Secretion	249
9.10.3	Intracellular Production	250
9.10.4	Initial Recovery Methods	253
9.11	Genetic Manipulations to Improve Yield	253
9.11.1	Gene Fusion	253
10	Manufacturing Overview	261
10.1	Introduction	261
10.2	Cell Culture Expression Systems	263
10.2.1	Bacterial Systems	265
10.2.2	Yeast Systems	267
10.2.3	Insect Cells	267
10.2.4	Mammalian Cells	268
10.3	Transgenic Animals	268
10.4	Cell Lines and Characterization	269

10.5	Media	270
10.6	Culture Growth	270
10.7	Extraction, Isolation, and Purification	271
10.8	Capture	272
10.9	Purification	273
10.10	Impurity Removal	276
10.11	Validation	276
10.12	Intermediate Purification	277
10.13	Polishing	277
10.14	Formulation	278
10.15	Process Overview	282
	10.15.1 Process Maturity	282
	10.15.2 Process Optimization	285
10.16	Tech Transfer and Documentation	285
10.17	Validation	287
10.18	Scale Up	288
	10.18.1 Specific Scale-Up Issues	288
	10.18.2 Cost Calculations	288
10.19	Specific Economy Issues	295
10.20	Process Materials	299
10.21	Environment Control	300
	10.21.1 NIH Guidelines for Handling DNA Material	300
	10.21.2 Biosafety Levels	303
10.22	Good Manufacturing Controls of Active Pharmaceutical Ingredients	306
10.23	Manufacturing Systems and Layout	306
10.24	Cleaning Procedures	311
10.25	Processing and Filling	311
10.26	Laboratory Testing	313
10.27	Laboratory Controls	318
10.28	Documentation	320
10.29	Technical Package	320
10.30	Outsourcing in Biotech Manufacturing	321
10.31	Issues to Discuss	322
II	Disposable Bioprocessing Systems	327
11.1	Introduction	327
	11.1.1 Evolution of the Bioprocessing Industry	329
	11.1.2 Lines of Disposable Systems	333
11.2	Safety of Disposable Systems	336
	11.2.1 Polymers and Additives	337
	11.2.2 Material Selection	339
	11.2.3 Testing	341

CONTENTS

11.2.4	Partnering with Vendors	342
11.2.5	Responsibility of Sponsors	342
11.3	Regulatory Matters	343
11.3.1	United States and Canada	343
11.3.2	Europe	343
11.4	Risk Assessment	344
11.5	Disposable Containers	349
11.5.1	Proprietary Bag Suppliers	349
11.5.2	Generic Bag Suppliers	349
11.6	Tank Liners	351
11.6.1	2D Fluid Containers	352
11.6.2	2D Powder Bags	352
11.6.3	3D Bags	352
11.6.4	Transportation Container	353
11.6.5	Summary	353
11.7	Mixing Systems	354
11.7.1	Types of Mixing	355
11.7.2	Summary	357
11.8	Disposable Bioreactors	358
11.8.1	Cellexus Bioreactor	365
11.8.2	CELL-Tainer Cell Culture System	365
11.8.3	Wave-Mixed Bioreactors	366
11.8.4	Stirred Single-Use Bioreactors	368
11.8.5	Orbitally Shaken Single-Use Bioreactors	370
11.8.6	Bioreactor Selection	371
11.9	Disposable Connectors and Transfers	375
11.9.1	Tubing	376
11.9.2	Fittings and Accessories	378
11.9.3	Pumps	379
11.9.4	Aseptic Coupling	381
11.9.5	Aseptic Connectors	381
11.9.6	Welding	382
11.9.7	Aseptic Transfer Systems	383
11.9.8	Tube Sealers	384
11.9.9	Sampling	384
11.9.10	Conclusion	385
11.10	Disposable Control and Monitoring Systems	385
11.10.1	Sampling Systems	387
11.10.2	Optical Sensors	388
11.10.3	Biomass Sensors	391
11.10.4	Electrochemical Sensors	392
11.10.5	Pressure Sensors	393
11.10.6	Conclusions	394

11.11	Downstream Processing	395
11.11.1	Case of Monoclonal Antibodies, a GE Report	396
11.11.2	Membrane Chromatography	399
11.11.3	Virus Removal	401
11.11.4	Buffers	405
11.11.5	Fluid Management	407
11.11.6	Bioseparation	408
11.11.7	Depth Filtration	408
11.11.8	Filtration	408
11.11.9	Integrated Systems	409
11.12	Filtration	411
11.12.1	Dead-End Filtration	411
11.12.2	Cross-Flow Filtration	412
11.12.3	Filtration Media	412
11.12.4	Polymer Membranes	414
11.12.5	MF Cross-Flow	418
11.12.6	Conclusion	420
12	Upstream Processing	423
12.1	Introduction	423
12.2	Bioreactors	424
12.3	Batch Culture	426
12.4	Continuous Culture	427
12.5	Fed-Batch Culture	427
12.6	Perfusion Culture	428
12.7	Suspension Culture	429
12.8	Microcarrier Support	430
12.9	Roller Bottle Culture System	432
12.10	Spinner Flask Culture	433
12.11	Other Scale-Up Options	433
12.12	Wave Bioreactor	433
12.13	Cell Cube Technology	435
12.14	Rotary Culture System	435
12.15	Media	437
12.16	Scaling and Production Costs	437
12.17	Problem Resolution in Fusion Protein Expression	439
13	Downstream Processing	443
13.1	Introduction	443
13.2	Capture	445

CONTENTS

13.2.1	Intermediate Purification	446
13.2.2	Polishing	446
13.3	System Suitability	446
13.4	Downstream Processing Systems	447
13.4.1	Buffers and Solvents	447
13.4.2	Sample Preparation	447
13.4.3	Protein Folding	450
13.4.4	Filtration	455
13.4.5	Precipitation	458
13.4.6	Expanded Bed Adsorption System	460
13.4.7	Virus Inactivation and Removal	468
13.5	Process Flow	470
14	Purification	475
14.1	Introduction	475
14.2	Protein Properties	475
14.3	Affinity Chromatography	476
14.4	Immobilized Metal AC	481
14.5	Anion Exchange Chromatography	482
14.6	Cation Exchange Chromatography	485
14.7	Size Exclusion Chromatography	486
14.8	Reversed Phase Chromatography	492
14.9	Hydroxyapatite Chromatography	493
14.10	Hydrophobic Interaction Chromatography	495
14.11	Scale Up and Optimization	496
15	Manufacturing Systems	501
15.1	Bacterial Expression Systems	501
15.2	Genetically Modified Bacteria	502
15.2.1	Promoters	503
15.2.2	Terminators	503
15.2.3	Ribosome Binding Sites	504
15.2.4	Fusion Proteins and Tags	505
15.2.5	Fusion and Tagged Protein Cleavage Systems	508
15.2.6	Selection Pressure	510
15.2.7	Process Optimization	510
15.2.8	Downstream Processing	512
15.3	Mammalian Cells Manufacturing Systems	516
15.3.1	Genetically Modified Cell Lines	516
15.3.2	Monoclonal Antibodies Production	519
15.3.3	Upstream Process Optimization	519
15.3.4	Downstream Process Optimization	523

15.4	Yeast Cell Expression System	526
15.4.1	Cell Substrates	528
15.4.2	Cell Cultures	530
15.4.3	Batch Culture	530
15.4.4	Fed-Batch Culture	531
15.4.5	Perfusion Culture	531
15.4.6	Cell Immobilization Strategies	532
15.4.7	Media	532
15.4.8	Downstream Processing	535
15.5	Insect Cells Systems	537
15.5.1	Transient Expression Systems	538
15.5.2	Continuous Expression Systems	538
15.5.3	Baculovirus Expression Systems	539
15.5.4	Process Optimization	540
15.5.5	Downstream Processing	542
15.6	Transgenic Animal Systems	543
15.6.1	Downstream Processing	545
16	Quality Consideration	549
16.1	Introduction	549
16.2	Management Responsibilities	551
16.2.1	Provide Leadership	551
16.2.2	Build Your Quality System to Meet Requirements	552
16.2.3	Establish Policies, Objectives, and Plans	553
16.2.4	Review the System	553
16.3	Resources	555
16.3.1	General Arrangements	555
16.3.2	Develop Personnel	555
16.3.3	Facilities and Equipment	556
16.3.4	Control Outsourced Operations	556
16.4	Manufacturing Operations	556
16.4.1	Design and Develop Product and Processes	557
16.4.2	Monitor Packaging and Labeling Processes	557
16.4.3	Examine Inputs	558
16.4.4	Perform and Monitor Operations	559
16.4.5	Address Nonconformities	561
16.5	Evaluation Activities	562
16.5.1	Analyze Data for Trends	562
16.5.2	Conduct Internal Audits	563
16.5.3	Risk Assessment	563
16.5.4	Corrective Action	563
16.5.5	Preventive Action	564
16.5.6	Promote Improvement	564
16.5.7	Conclusion	564

CONTENTS

16.6	QA Systems	565
16.7	Validation Master Plan	566
16.8	Raw materials	569
16.9	Column life	569
16.10	Process	571
	16.10.1 Parameters and Responses	571
	16.10.2 Robustness	572
16.11	Virus Validation	576
	16.11.1 Cell Substrates and Animals	576
	16.11.2 Unprocessed Bulk	576
	16.11.3 Virus Inactivation and Removal	577
16.12	Testing of Product	579
	16.12.1 Analytical Method Validation	579
	16.12.2 QC Systems	580
16.13	In-Process Control	580
	16.13.1 Parameters	582
	16.13.2 Total Protein	584
	16.13.3 Specifications	585
	16.13.4 Identity	586
	16.13.5 Biological Activity	588
	16.13.6 Purity	588
	16.13.7 Endotoxins	589
	16.13.8 Nucleic Acids	589
	16.13.9 Host Cell Proteins	590
	16.13.10 Viruses	591
	16.13.11 Prions	592
	16.13.12 Proteolytic Enzymes	593
	16.13.13 Lipids	593
	16.13.14 Microbial Agents	593
	16.13.15 Raw Materials	594
	16.13.16 Des-Amido Forms	595
	16.13.17 Oxidized Forms	595
	16.13.18 Carbamylated Forms	595
	16.13.19 Aggregates	595
	16.13.20 Scrambled Forms	596
	16.13.21 Cleaved Forms	596
	16.13.22 Glycosylated Forms	596
	16.13.23 Quantity	597
16.14	Regulatory Affairs	609
	16.14.1 United States Food and Drug Administration	609
