

**Superplasticity
in Advanced Materials
ICSAM-94**

✓ pp. 4950
**Proceedings of the 1994 International Conference on Superplasticity
in Advanced Materials (ICSAM-94) held at the Russian Academy of
Administration in Moscow on May 24-26, 1994**

Editor:

Terence G. Langdon

University of Southern California, Los Angeles

**TRANS TECH PUBLICATIONS
Switzerland - Germany - UK - USA**

Table of Contents

1. Fundamental Aspects of Superplasticity

| | |
|---|----|
| 50-th Anniversary of Russian Investigations on Superplasticity I.I. Novikov | 3 |
| Overview on Superplasticity Research on Small-Grained Materials O.D. Sherby, T.G. Nieh and J. Wadsworth | 13 |
| Cooperative Grain Boundary Sliding and Superplastic Flow Nature V.V. Astanin and O.A. Kaibyshev | 23 |
| Superplasticity at Different Microstructural Scales M.G. Zelin and A.K. Mukherjee | 29 |
| A New Physical Model for Superplastic Flow A.K. Ghosh | 39 |
| Experimental and Numerical Investigations of Superplastic Deformation Mechanisms N. Chandra, K. Murali and H. Garmestani | 47 |
| Grain Boundary Sliding as a Deformation Process in Creep and Superplasticity T.G. Langdon | 53 |
| On the Physical Nature of Optimal Superplastic Flow K.A. Padmanabhan | 59 |
| The Role of Threshold Stresses and Incipient Melting in High Strain Rate Superplasticity T.R. Bieler, R.S. Mishra and A.K. Mukherjee | 65 |
| Superplastic-Like Behaviour of Coarse-Grained Single Phase Aluminium Alloys A.O. Nikiporov, V.S. Levchenko, I.I. Novikov and V.K. Portnoy | 71 |
| Grain Boundary Premelting in Deformed Copper Bicrystals with the same Grain Boundary and Different Tensile Directions F. Inoko and T. Yoshikawa | 77 |
| On the Problem of Grain Boundaries Engineering of Superplastic Materials R.Z. Valiev, O.V. Mishin and R.M. Gayanov | 83 |
| On the Mechanism of Internal Stress Superplasticity E. Sato and K. Kuribayashi | 89 |

| | |
|---|-----|
| On the Experimental Verification of an Atomistic Model for Boundary Sliding Controlled Optimal Superplastic Flow | |
| S.S. Bhattacharya and K.A. Padmanabhan | 95 |
| Grain Boundary Sliding and Accommodation in Aluminium Tricrystal with a „Pore“ | |
| A.V. Sisanbaev, R.Z. Valiev and A.V. Shalimova | 101 |
| Types of Grain Boundary Sliding: Phenomenology and Dislocation Analysis | |
| A.D. Sheikh-Ali and R.Z. Valiev | 107 |
| The Role of Phase Boundary Thermodynamic Properties in Superplasticity of Small-Grained Eutectics | |
| F. Muktepavel | 113 |

2. Superplasticity in Nanocrystalline Materials

| | |
|--|-----|
| Submicrocrystalline and Nanocrystalline Structure Formation in Materials and Search for Outstanding Superplastic Properties | |
| G.A. Salishchev, O.R. Valiakhmetov, V.A. Valitov and S.K. Mukhtarov | 121 |
| Deformation Mechanisms of Positive Exponent Superplasticity in Advanced Aluminum Alloys with Nano or Near-Nano Scale Grained Structures | |
| K. Higashi | 131 |
| Superplastic Sinter-Forging of Nanocrystalline Ceramics | |
| M.J. Mayo and D.C. Hague | 141 |
| Mechanical Characteristics of Nanostructure Zinc | |
| Q. Xia, C.H. Hamilton, K. Recknagle, C.T. Crowe and G.S. Collins | 147 |
| X-Ray Investigations of the Ultrafine-Grained Materials | |
| I.V. Alexandrov, R.K. Islamgaliev, I.F. Gibadullin and R.Z. Valiev | 153 |
| Internal Friction and Superplasticity of Submicrocrystalline Metal | |
| R.R. Mulyukov, H.-E. Schaefer, M. Weller and D.A. Salimonenko | 159 |

3. Superplasticity in Metals

| | |
|--|-----|
| Rheological Behaviour of „Two-Phase“ Superplastic Materials | |
| M. Suery, J.J. Blandin and R. Dendievel | 167 |
| Cavitation in Superplastic Metals | |
| N. Ridley and Z.C. Wang | 177 |

| | |
|--|-----|
| An Optimised Manufacturing Route for Superplastic 7475 Sheet | |
| G.J. Mahon, D. Warrington, R.G. Butler and R. Grimes | 187 |
| Thermo Mechanical Processing and Superplastic Deformation of Complex Aluminum Alloys by Torsion Testing | |
| H.J. McQueen, W. Blum and Q. Zhu | 193 |
| Grain Structure and Texture Aspects of Superplasticity in Ferrite Austenite Corrosion Resistant Steel | |
| A.A. Alalykin, G.Y. Glebova and E.B. Kachanov | 201 |
| The Temperature and the Grains of Ti-6Al-4V Alloy on the Uniaxial and Biaxial Deformations for Superplasticity | |
| K. Sato, T. Nishimura and Y. Kimura | 207 |
| A Study on Post-SPF Mechanical Characteristics of Ti-6Al-4V Alloy | |
| C. Wang and G. Hou | 213 |
| Influence of Microcrystalline Structure and Superplastic Deformation in the Constructional Strength of Aluminium Alloys | |
| M.Kh. Rabinovich and M.V. Markushev | 219 |
| Impurity Segregation during Superplastic Deformation of Al-Mg-Mn Alloys | |
| J.S. Vetrano, C.A. Lavender and S.M. Bruemmer | 225 |
| Grain Structure and Microtexture Evolution during Superplastic Forming of a High Strength Al-Zn-Mg-Cu Alloy | |
| D.J. Chakrabarti and J. Liu | 231 |
| Peculiarities of Dynamic Grain Growth during SPD in Alloys with Matrix and Microduplex Structures | |
| M.Kh. Rabinovich and V.G. Trifonov | 237 |
| Influence of Superplastic Strain-Heat Treatment on the Mechanical Behaviour of Aluminium-Lithium Alloy 1420 | |
| M.Kh. Rabinovich, M.V. Markushev and M.Yu. Murashkin | 243 |
| Effect of Storage at Room Temperature after Hot Rolling on SP Properties of Al-2.9%Cu-2.0%Li-0.1%Zr Alloy | |
| D.N. Sergeeva, A.O. Nikiforov, I.I. Novikov and V.S. Levchenko | 249 |
| Improvement of Superplastic Properties of an Al-Cu-Li-Mg-Zr Alloy by a Modified Thermomechanical Processing | |
| I.G. Moon, J.W. Park and J.E. Yoo | 255 |
| Superplasticity of Commercial Al-Cu-Mg-Mn Alloy A19 | |
| V.S. Levchenko, O.V. Solovjeva, V.K. Portnoy and Yu.V. Shevnuik | 261 |
| The Characteristics of SP for Commercial Alloys in Supplied State | |
| B. Bai, Y. Wang, L. Yang and N. Chen | 267 |

| | |
|---|-----|
| The Characteristics of Received Alloys under Superplastic Compression | |
| Y. Zubin and Z. Jinyun | 273 |
| Development of Superplasticity in 5083 Aluminum with Additions of Mn and Zr | |
| C.A. Lavender, J.S. Vetrano, M.T. Smith, S.M. Bruemmer and C.H. Hamilton | 279 |
| A Study on the Elevated Temperature Tensile Superplastic Flow Behaviour of a New Canadian Al-Mg-Mn Alloy, its Room Temperature Formability and Texture Profile | |
| K. Swaminathan, A. Nandy and D.R. Kumar | 287 |
| Superplastic Deformation and Diffusion Bonding of the Low Deformation Temperature Titanium Alloy SP700 | |
| A. Wisbey, B. Geary, D.P. Davies and C.M. Ward-Close | 293 |
| Effect of Hydrogen on Superplasticity of Titanium Alloys | |
| J.V. Sirina, I.L. Fedotov, V.K. Portnoy, A.A. Ilyin and A.M. Mamonov | 299 |
| Methods of Structure Preparing of Superalloy for Disc Turbin Applications for Superplastic Deformation | |
| S.V. Ovsepyan, B.S. Lomberg, A.A. Alalyikin, D.E. Gerasimon and A.A. Gromova | 305 |
| Superplasticity of γ/γ'-α Eutectic Superalloys in the System Ni-Mo-Al | |
| O.A. Lolodtsova, E.V. Monastirskaa and E.I. Razuvaev | 311 |
| Superplastic Deformation and Microstructural Change during High Temperature Deformation of High Carbon-Chromium Tool Steels | |
| K. Miyahara, J. Mo, K. Noda and Y. Sasaki | 317 |
| m-δ Relations of a Large Grained Beta Titanium Alloy during Superplastic Deformation | |
| S. Zhou, J. Cai and D. Lin | 323 |
| Peculiarities of Technological Route to Produce SP Sheets of AMg4 (Analog of 5083) Alloy | |
| V.I. Polkin, A.O. Nikiforov and I.I. Novikov | 329 |
| Structure Instability and Superplasticity in Metals | |
| E.E. Z asimchuk and Yu.G. Gordienko | 333 |
| Calculation of Superplastic Temperatures in Two-Phase Titanium Alloys | |
| H.L. Ping | 339 |

| | |
|---|-----|
| Grain Structure and Superplasticity of High Strength Al-Zn-Mg-Cu Alloys with Different Minor Additions | |
| I.N. Fridlyander, O.G. Senatorova, N.A. Ryazanova and A.O. Nikiforov | 345 |
| Superplastic Behaviour of Fine-Grained IN-718 Superalloy | |
| L. Ceschini, G.P. Cammarota, G.L. Garagnani, F. Persiani and A. Afrikantov | 351 |
| 4. Superplasticity in Ceramics | |
| Superplasticity and Superplastic Forming of Ceramics | |
| T.G. Nieh and J. Wadsworth | 359 |
| Superplasticity of Ceramics with Glass Phase | |
| T. Sakuma and Y.-I. Yoshizawa | 369 |
| An Analysis of Cavity Growth and Shrinkage in Fine Grained Materials | |
| D.M. Owen and A.H. Chokshi | 379 |
| The Grain Growth during Superplastic Flow in Alumina-Base Ceramics | |
| K. Okada, P. Thavorniti and T. Sakuma | 385 |
| Role of Microstructural Change of Mechanical Property during Superplastic Deformation of Zirconia | |
| B.N. Kim, T. Kinoshita, S. Wakayama, M. Kawahara and M.J. Mayo | 391 |
| The Phenomenon of Structural Superplasticity in Oxygen Ceramics | |
| N.G. Zaripov, O.M. Kolnogorov and L.V. Petrova | 397 |
| Superplasticity in Alumina-Zirconia Composites with Submicronic Grain Sizes | |
| O. Flacher, J.J. Blandin and M. Suery | 403 |
| Transmission Electron Microscopy Analysis of Grain Boundary Behavior in Superplastic Doped Aluminas | |
| S. Lartigue-Korinek, C. Carry, F. Dupau and L. Priester | 409 |
| Selective Doping of 3Y-TZP with CuO for Near Net Shape Forming | |
| J.R. Seidensticker and M.J. Mayo | 415 |
| Deformation Behavior of a Superplastic 2 mol% Yttria Stabilized Zirconia in Tension and Compression | |
| J.A. Hines and A.H. Chokshi | 421 |
| Mechanical Properties of Joined Alumina Polycrystals Using Superplastic Ceramics as an Insert | |
| Y. Motohashi, K. Jyumonji and T. Sakuma | 427 |

| | |
|--|-----|
| Theoretical Investigation of the Microstructural Evolution of Superplastic Ceramics | |
| V.N. Chuvil'deev, V.N. Perevezentsev and O.E. Pirozhnikova | 433 |
| The Mechanical Characteristics of a Ductile Zirconia Containing 2.5% Yttria | |
| Y. Ma, O.T. Sørensen and T.G. Langdon | 439 |
| Hot Plastic Deformation of $YBa_2Cu_3O_{7-x}$ Ceramics | |
| M.F. Imayev, R.O. Kaibyshev, F.F. Musin and M.R. Shagiev | 445 |
| | |
| 5. Superplasticity in Intermetallics | |
| | |
| Structure and Superplasticity of Intermetallics | |
| R.M. Imayev, G.A. Salishchev, V.M. Imayev, N.K. Gabdullin and M.R. Shagiev | 453 |
| Superplastic Deformation of a Two Phase Titanium Aluminide Based Alloy | |
| D. Jobart, J.J. Blandin, A. Varloteaux and M. Suery | 465 |
| Superplasticity in Ingot-Processed Iron Carbide | |
| W.-J. Kim and O.D. Sherby | 471 |
| The Microstructure Evolution during Superplastic Deformation in Hot-Rolled Fe_3Al Intermetallic Compound | |
| D. Lin, M. Chen, A. Shan, W. Liang, L. Lu and X.Zhao | 477 |
| High Strain Rate Superplasticity in an Ultrafine Grained α-Ti/Ti₂Co Alloy | |
| G. Frommeyer, H. Hofmann and W. Herzog | 483 |
| Superplasticity in Fe_3Al Based Alloy | |
| A. Shan, M. Chen, D. Lin and D. Li | 489 |
| A Preliminary Study on Superplasticity of Ti-14Al-21Nb Alloy | |
| Y. Zhang, J. Ma, X. Li and C. Cao | 495 |
| | |
| 6. Superplasticity in Metal Matrix Composites | |
| | |
| Processing and Development of Superplastic Metal Matrix Composites | |
| M. Mabuchi, J. Koike, H. Iwasaki, K. Higashi and T.G. Langdon | 503 |
| Superplastic Deformation of SiC Whisker Reinforced 2324 Aluminum Alloy Composites | |
| M. Kon, M. Sugamata and J. Kaneko | 513 |

| | |
|--|-----|
| Processing and High Temperature Characteristics of Al-Li/SiCp Composites | |
| M.J. Tan, L.H. Koh, Y. Murakoshi and T. Sano | 519 |
| Superplasticity of the Metal Matrix Composite PM2014 Al-20%Al₂O₃ | |
| R. Kaibyshev, V. Kazkyhanov, E. Evangelista and J. Stobrawa | 525 |
| The Influence of Reinforced Elements on Deformation Behavior of the Aluminum Alloy | |
| R. Kaibyshev, V. Kazykhanov, V. Astanin and E. Evangelista | 531 |
| Cavitation in Superplastic Metal Matrix Composites Containing Si₃N₄ Particulates | |
| H. Iwasaki, M. Mabuchi, K. Higashi and T.G. Langdon | 537 |
| Superplastic-Like Behavior of a Hyper-Peritectic Al-10wt%Ti Alloy at High Strain-Rates | |
| D.-W. Kum and H.-S. Kim | 543 |
| Superplasticity of Fine TiC and TiN Dispersed Ti-6Al-4V Alloy Composites | |
| M. Kobayashi, S. Ochiai, K. Funami, C. Ouchi and S. Suzuki | 549 |
| Superplasticity in IM SiC_p / 2024 Composite | |
| Y. Wang, Z. Wei and B. Zhang | 555 |
| | |
| 7. Rheology, Mechanics and Fundamentals of Superplastic Processing | |
| | |
| New Method for Evaluation of Superplastic Characteristics Using the R-Type Specimen | |
| Y. Takayama, N. Furushiro, T. Tozawa and H. Kato | 561 |
| Finite Element Modeling of Superplastic Forming | |
| R.S. Sadeghi and Z.S. Pursell | 571 |
| Design and Analysis of 3-D Superplastic Forming Processes | |
| N. Chandra, S.C. Rama and J. Rama | 577 |
| Anisotropy and Transient Effects in Superplastic Deformation | |
| K. Zhang, M.K. Khraisheh, A.E. Bayoumi, C.H. Hamilton and H.M. Zbib | 583 |
| Superplastic Forming Simulation of Three Dimensional Diffusion Bonded Components by the Finite Element Method | |
| J. Bonet, P. Bhargava and R.D. Wood | 589 |
