Part I The changing nature of innovation in the food and drink industry

1 Trends in the acquisition of external knowledge for innovation in the food industry	3
<i>M. Acosta, D. Coronado and E. Ferrándiz, University of Cadiz, Spain</i>	
1.1 Introduction	3
1.2 Reasons for open innovation in the food industry	4
1.3 Measuring open innovation in the food industry	6
1.4 Sources and types of data	8
1.5 Results of the open-innovation study	9
1.6 Conclusions	19
1.7 Acknowledgements	20
1.8 References	20
1.9 Appendix: concordance between agri-food technological sectors and International Patent Classification (IPC)	23
2 The tension between traditional innovation strategies and openness: Lindt's controlled open innovation approach	25
<i>V. Lazzarotti and R. Manzini, Cattaneo University – LIUC, Italy</i>	
2.1 Introduction	25
2.2 Literature review	26
2.3 Research method for Lindt case study	28
2.4 Open and closed innovation at Lindt	29

2.5	Lindt's open-innovation approach in practice: the innovation project Noccior	32
2.6	Results of controlled open innovation in the Lindt case	34
2.7	Conclusions	36
2.8	References	36
3	The role of open innovation in the industry convergence between foods and pharmaceuticals	39
	<i>S. Bröring, University of Applied Sciences Osnabrück, Germany and Wageningen University and Research Centre, The Netherlands</i>	
3.1	Introduction	39
3.2	A brief literature review on industry convergence	40
3.3	Convergence-related challenges and the role of open innovation	43
3.4	Evidence for industry convergence between foods and pharmaceuticals	47
3.5	Open innovation in order to cope with convergence in the nutraceuticals and functional foods (NFF) sector	51
3.6	Conclusion	56
3.7	Future trends	58
3.8	References	59
4	Accelerating the innovation cycle through intermediation: the case of Kraft's melt-proof chocolate bars	63
	<i>R. Wielens, NineSigma, Belgium</i>	
4.1	Introduction	63
4.2	From research to search in company innovation	64
4.3	Key capabilities in open innovation	65
4.4	From idea-driven innovation to need-driven innovation	68
4.5	Case study: melt-proof chocolate bars from Kraft	68
4.6	Conclusions	70
4.7	Future trends	71
4.8	References	72
5	The impact of open innovation on innovation performance: the case of Spanish agri-food firms	74
	<i>C. Bayona-Sáez, T. García-Marco and M. Sanchez-García, Universidad Pública de Navarra, Spain and C. Cruz-Càzares, University of Barcelona, Spain</i>	
5.1	Introduction: the agri-food sector and innovation	74
5.2	How innovative are Spanish agri-food firms?	77
5.3	Measuring open innovation in Spanish agri-food firms	80
5.4	The effect of openness on the innovative performance of firms	85
5.5	Conclusions	91
5.6	References	93

Part II Partners and networks for open innovation

6	Partnering with public research centres and private technical and scientific service providers for innovation: the case of Italian rice company, Riso Scotti	97
	<i>V. Lazzarotti and R. Manzini, Cattaneo University – LIUC, Italy</i>	
6.1	Introduction	97
6.2	The role of private technical and scientific service (TSS) providers: advantages and limitations	99
6.3	The role of universities and public research centres: advantages and limitations	100
6.4	Riso Scotti case study	101
6.5	Conclusions and managerial implications	105
6.6	References	107
7	Consumers as part of food and beverage industry innovation	109
	<i>S. E. Kemp, Consultant, UK</i>	
7.1	Introduction	109
7.2	Understanding food and beverage consumers and their world	111
7.3	Consumer-centric company culture for innovation	115
7.4	Consumer-driven innovation process	117
7.5	Consumers as co-creators	127
7.6	Conclusion	132
7.7	Future trends	133
7.8	Sources of further information and advice	134
7.9	References	135
8	Co-creation of value with consumers as an innovation strategy in the food and beverage industry: the case of Molson Coors’ ‘talking can’	139
	<i>M. Garcia Martinez, Kent Business School, University of Kent, UK</i>	
8.1	Introduction	139
8.2	Co-creation of value with consumers	141
8.3	Research design	142
8.4	Molson-Coors Brewing Company UK (MCBC-UK): the need for consumer-driven innovation	142
8.5	The discover style of open innovation	145
8.6	The ‘talking can’: co-creating value with consumers	146
8.7	Discussion	149
8.8	Conclusion	151
8.9	References	151

9 Collaborative product innovation in the food service industry.	
Do too many cooks really spoil the broth?	154
<i>A. I. A. Costa, The Catholic University of Portugal, Portugal</i>	
9.1 Introduction	154
9.2 A review of open-innovation practices in the food industry	156
9.3 Collaborative product innovation (CPI) in the food-service industry: the path of diffusion of sous vide cooking in the US	160
9.4 Conclusions and future trends	170
9.5 References	171
10 Effectiveness of cluster organizations in facilitating open innovation in regional innovation systems: the case of Food Valley in the Netherlands	174
<i>S. W. F. Omta, Wageningen University and Research Centre, The Netherlands and F. T. J. M. Fortuin, Food Valley Organization, The Netherlands and Wageningen University and Research Centre, The Netherlands</i>	
10.1 Introduction	174
10.2 Theoretical background	175
10.3 The Dutch agri-food sector and Food Valley Organization	177
10.4 Conclusions	183
10.5 Future trends	184
10.6 Sources of further information and advice	184
10.7 References	185
10.8 Appendix 1: the four main functions of Food Valley, including fifteen services, activities and information sources	186
10.9 Appendix 2: assessment of small to medium-sized enterprises and large companies of the importance of Food Valley functions	187
10.10 Appendix 3: member company assessment of the importance of Food Valley functions by company type	188
11 The importance of networks for knowledge exchange and innovation in the food industry	189
<i>B. Kühne, V. Lefebvre, C. Cochez and X. Gellynck, Ghent University, Belgium</i>	
11.1 Introduction	189
11.2 Knowledge exchange and innovation and the importance of networks	190
11.3 Network methodology: a case study approach	195
11.4 Results of the three Flemish case studies	198
11.5 Conclusions and future trends	207
11.6 References	208

Part III Establishing and managing open-innovation partnerships and networks

12	Managing open-innovation communities: the development of an open-innovation community scorecard	215
	<i>I. Blohm, University of St. Gallen, Switzerland, J. M. Leimeister, Kassel University, Germany and H. Krcmar, Technische Universität München, Germany</i>	
12.1	Introduction	215
12.2	Introduction to open-innovation communities and their management	217
12.3	Development of an open-innovation community scorecard	219
12.4	Implementation of the open-innovation scorecard	228
12.5	Conclusion and future trends	229
12.6	References	230
12.7	Appendix 1: data sources of success measures	232
12.8	Appendix 2: member survey	234
13	The evolution of partnering in open innovation: from transactions to communities	235
	<i>K. G. McFarthing, Innovation Fixer Ltd, UK</i>	
13.1	Introduction	235
13.2	Identifying and securing partners	236
13.3	Building and structuring relationships	239
13.4	Ecosystems	243
13.5	Human factors	246
13.6	Building a community	249
13.7	Conclusion	251
13.8	Acknowledgements	252
13.9	References	252
14	Managing co-innovation partnerships: the case of Unilever and its preferred flavour suppliers	254
	<i>M. Tepic and S. W. F. Omta, Wageningen University and Research Centre, The Netherlands, F. T. J. M. Fortuin, Food Valley Organization, The Netherlands and Wageningen University and Research Centre, The Netherlands and A. Saris, Wageningen University and Research Centre, The Netherlands</i>	
14.1	Introduction	254
14.2	Co-innovation	256
14.3	The co-innovation partnership between Unilever and flavour suppliers	260
14.4	Implementation and development of the Flavour Operating Framework partnership	262
14.5	Conclusion	268
14.6	Future trends	272
14.7	References	272

15	Managing asymmetric relationships in open innovation: lessons from multinational companies and SMEs	276
	<i>D. Oughton, University of Cambridge, UK and L. Mortara and T. Minshall, IfM Centre for Technology Management, UK</i>	
15.1	Introduction: the importance of large and small company partnerships in the food industry	276
15.2	The difficulties of open innovation	278
15.3	Culture, complexity and communication problems	281
15.4	The importance for companies of focusing on risk, reward and balance	283
15.5	Overcoming obstacles to achieve successful company partnerships	284
15.6	Collaborations between companies: case studies	287
15.7	Conclusion	289
15.8	Acknowledgements	291
15.9	References	292
16	Challenges faced by multinational food and beverage corporations when forming strategic external networks for open innovation	294
	<i>L. Tolhurst and J. Brown, Oakland Innovation, UK</i>	
16.1	Introduction	294
16.2	Strategic external networks for open innovation	295
16.3	Research methodology	298
16.4	Findings	299
16.5	Discussion	304
16.6	Future trends	305
16.7	Conclusions and recommendations	305
16.8	References	310
Part IV Open innovation tools, process and managerial frameworks		
17	The ‘want find get manage’ (WFGM) framework for open-innovation management and its use by Mars, Incorporated	315
	<i>M. Garcia Martinez, Kent Business School, University of Kent, UK</i>	
17.1	Introduction	315
17.2	History of open innovation at Mars, Incorporated	317
17.3	Mars’ open-innovation model	317
17.4	The open-innovation framework: ‘want find get manage’	322
17.5	Conclusions	329
17.6	References	330
18	Crowdsourcing: the potential of online communities as a tool for data analysis	332
	<i>M. Garcia Martinez and B. Walton, Kent Business School, University of Kent, UK</i>	
18.1	Introduction	332
18.2	Predictive modelling competitions	333

18.3	Design and management of predictive modelling competitions .	335
18.4	Case study: Kaggle	338
18.5	Conclusions	340
18.6	References	340
19	The role of information systems in innovative food and beverage organizations	343
	<i>J. G. Caudill, University of Tennessee, USA</i>	
19.1	Introduction	343
19.2	The role of technology in innovation	344
19.3	Innovative technologies in agriculture and food production ...	345
19.4	Technology's support of innovation	347
19.5	Free tools for innovation	352
19.6	Future trends	353
19.7	Conclusion	353
19.8	Sources of further information and advice	354
19.9	References	354
20	Effective organizational and managerial frameworks to support open innovation: overview and the case of Heinz	356
	<i>V. Lazzarotti and R. Manzini, Cattaneo University – LIUC, Italy</i>	
20.1	Introduction	356
20.2	The need for organizational and management tools to support open innovation	357
20.3	Case study: Heinz's strategy, business and organization	360
20.4	Conclusions and managerial implications	366
20.5	References	367
21	Innovating with brains: the psychology of open innovation	369
	<i>B. A. Sabel, University of Magdeburg Medical School, Germany and Institute of Automation, China, K. Sabel, Consulting-Berlin, Germany and J. T. Preston, TEM Capital and Continuum Energy Technologies, USA</i>	
21.1	Introduction	369
21.2	Innovation is all about psychology	370
21.3	Phases of innovation	371
21.4	The influence of soft factors on the success of innovation	373
21.5	The psychology of the innovation team	380
21.6	The innovative environment of academia	382
21.7	Start-ups and small to medium-sized enterprises (SMEs): open innovation by default	385
21.8	Predicting innovation success: the 'Preston' equation	385
21.9	Future trends	386
21.10	References	387
