Contents

Fluorine in Context

Chapter 1 Fluoride in the Context of the Environment	3
<i>María Gabriela García and Laura Borgnino</i>	
1.1 Fluoride in the Environment and Health Implications	3
1.2 Natural Sources of Fluoride	4
1.2.1 F-Bearing Minerals	5
1.2.2 Volcanic Sources	7
1.2.3 Geothermal Sources	7
1.2.4 Seawater	8
1.2.5 Natural and Anthropogenic Sources in the Atmosphere	8
1.3 Controls on Fluoride Mobilization	8
1.3.1 Adsorption	9
1.3.2 Precipitation	11
1.3.3 Dissolution and Desorption	12
1.4 Fluoride in Natural Waters	13
1.4.1 Speciation of Fluoride in Natural Waters	13
1.4.2 Concentration and Speciation of Fluoride in Natural Environments	13
Summary Points	16
Key Facts	17
Key Features of Weathering	17
Key Terms	17
References	18

Chapter 2 Fluoride Intake in the Context of Dental Fluorosis	22
<i>Aline de Lima Leite, Camila Peres Buzalaf, and Marília Afonso Rabelo Buzalaf</i>	
2.1 Introduction	22
2.2 Too Much or Too Little?	23
2.3 Critical Period for Fluorosis Development	24
2.4 Sources of Fluoride Intake	26
2.4.1 Fluoride in Drinking Water	26
2.4.2 Fluoridated Dentifrices	27
2.4.3 Infant Formulas	29
2.4.4 Fluoride Supplements	31
Summary Points	32
Key Facts	32
Dictionary of Terms	32
References	33

Chemistry and Biochemistry

Chapter 3 The Chemistry of Fluorine	41
<i>Brenda Lorena Fina and Alfredo Rigalli</i>	
3.1 History	41
3.2 Fluorine as an Element	41
3.3 Fluorine in Nature	42
3.4 Fluorine and Fluoride	43
3.5 Fluorine in Medicine and Health	43
3.6 Fluorine Compounds in Bones and Teeth	44
3.7 Reaction of Fluorine with Multivalent Metallic Cations	45
3.8 Reaction of Fluorine and its Relation to Storage and Measurement	46
3.9 Fluoride Compounds for Use in Medicine	47
3.10 Fluoride Compounds and Industrial Uses that Affect Health	49
3.11 Miscellaneous Chemical Compounds Containing Fluorine	51
Summary Points	51
Key Facts of the Chemistry of Fluorine	52
Definitions of Words and Terms	52
List of Abbreviations	53
References	53

Chapter 4 Fluoride Metabolism	54
<i>Camila Peres Buzalaf, Aline de Lima Leite, and Marília Afonso Rabelo Buzalaf</i>	
4.1 Introduction to Fluoride Metabolism	54
4.2 General Aspects of Fluoride Metabolism	55
4.3 Fluoride Absorption	57
4.4 Fluoride Distribution	59
4.4.1 Plasma Fluoride	59
4.4.2 Fluoride in Soft Tissues	59
4.4.3 Fluoride in Specialized Body Fluids	60
4.4.4 Fluoride in Mineralized Tissues	60
4.5 Kidney Excretion	61
4.6 Modulators of Fluoride Metabolism and Their Implications	63
4.6.1 Acid-Base Disturbances	63
4.6.2 Physical Activity, Circadian Rhythm and Hormones	63
4.6.3 Nutritional Status	64
4.6.4 Diet Composition	64
4.6.5 Renal Impairment	64
4.6.6 Genetic Predisposition	65
4.7 Conclusion	65
Summary Points	66
Definitions and Explanation of Key Terms	66
List of Abbreviations	67
References	68

Analysis

Chapter 5 Fluorine Determination in Milk, Tea and Water by High-Resolution, High-Temperature Molecular Absorption Spectrometry	75
<i>Suleyman Akman, Bernhard Welz, Nil Ozbek, and Éderson R. Pereira</i>	
5.1 Introduction	75
5.2 Methods for the Determination of Fluorine/Fluoride	76
5.3 Atomic Absorption Spectrometry	77
5.3.1 Line Source Atomic Absorption Spectrometers	77
5.3.2 High-Resolution Continuum-Source Atomic Absorption Spectrometers	78
5.3.3 Interferences	79

5.4 Molecular Absorption Spectrometry	82
5.4.1 Determination of Fluorine by MAS Using LS AAS Equipment	84
5.4.2 Determination of Fluorine by MAS using HR-CS AAS Equipment	85
5.5 Conclusion	89
Summary Points	89
Key Facts	90
Key Facts of Atomic Absorption Spectrometry	90
Key Facts of High-Resolution Continuum-Source Atomic Absorption Spectrometry	90
Key Facts of Molecular Absorption Spectrometry	91
Definitions of Words and Terms	91
List of Abbreviations	92
References	92
Chapter 6 Blood, Plasma and Bone Fluoride Measurement	96
<i>Maela Lupo and Alfredo Rigalli</i>	
6.1 Methodologies for Fluoride Measurement	96
6.2 Electrode Description	98
6.3 Isothermal Distillation	99
6.4 Different Chemical Forms in Which Fluoride Can Be Found in Biological Samples	101
6.5 Blood Fluorine Concentration	103
6.5.1 Blood Fluoride Concentration after NaF Intake	104
6.5.2 Blood Fluorine Concentration after Monofluorophosphate Intake	104
6.5.3 Variables That Influence Plasma Fluoride Levels	106
6.6 Bone Fluorine Content	107
Summary Points	108
Key Facts of Fluoride Measurement	109
Definitions of Words and Terms	109
List of Abbreviations	110
References	111
Function and Effects	
Chapter 7 Fluoride Accumulation in Crops and Vegetables: Indian Perspectives	117
<i>Srimanta Gupta and Dali Mondal</i>	
7.1 Introduction	117
7.2 Fluoride in Soil	120

7.2.1	Mobility of Fluoride in Soil Solution	121
7.2.2	Pathways of Fluoride Uptake by Plants	121
7.2.3	Factors Affecting Plant Uptake of Fluoride	121
7.3	Fluoride Accumulations in Crops and Vegetables	122
7.3.1	Indian Scenerio	124
7.4	Fluoride Accumulations in Crops and Vegetables of Birbhum District, West Bengal – A Case Study	128
7.4.1	Fluoride in Irrigation Water	128
7.4.2	Fluoride in Irrigated Soil	128
7.4.3	Fluoride in the Harvested Crops and Vegetables of the Study Area	130
7.4.4	Quantitative Estimation of Fluoride in the Food Chain	132
7.4.5	Salient Outcomes of the Case Study	134
	Summary Points	134
	Key Facts of Fluoride Accumulation in Crops/Vegetables	135
	Definitions and Explanations of Key Terms	135
	List of Abbreviations	136
	References	137
Chapter 8	Fluoride Levels in Herbal and Tea Infusions	140
	<i>Ebru Emekli-Alturfan, Ayşen Yarat, and Serap Akyuz</i>	
8.1	Tea	140
8.1.1	Composition of Tea	141
8.1.2	The Quality of Black Tea	142
8.1.3	Fluoride in Tea Plant	143
8.2	Fluoride Content in Tea Commodities, and Herbal Infusions	144
8.2.1	Fluoride Content in Black Tea	144
8.2.2	Effects of Manufactued Forms of Black Tea on Fluoride Concentrations	146
8.2.3	Fluoride Levels in Herbal Infusions	148
8.3	Fluorosis and Tea Drinking	148
8.3.1	Case Reports	148
8.3.2	Epidemiological Reports	149
8.3.3	Animal Studies	149
8.4	Conclusion	150
	Summary Points	150
	Key Facts of Tea	150
	Key Facts of Fluoride Content of Black Tea	151
	Definitions of Words and Terms	151
	References	152

Chapter 9 Bioavailability of Fluoride: Factors and Mechanisms Involved	155
<i>René A. Rocha, Dinoraz Vélez, and Vicenta Devesa</i>	
9.1 Concept of Bioavailability and Models for its evaluation	155
9.2 Fluoride Bioavailability Studies	156
9.2.1 <i>In Vivo</i> Bioavailability Studies	156
9.2.2 <i>In Vitro</i> Bioavailability Studies	158
9.3 Factors that Affect the Bioavailability of Fluoride	159
9.3.1 Components of the Diet that Modulate the Bioavailability of Fluoride	159
9.3.2 Nondietary Factors that Modulate the Bioavailability of Fluoride	162
9.4 Intestinal Transport Mechanisms for Fluoride	164
Summary Points	168
Key Facts	168
Key Features of Fluoride Chemistry	168
Key Features of Cellular Transport	168
Definitions of Words and Terms	169
List of Abbreviations	169
References	169
Chapter 10 Fluoride in Saliva and its Impact on Health	173
<i>Serap Akyuz, Aysen Yarat, Ebru Emekli Alturfan, and Sarp Kaya</i>	
10.1 Saliva	173
10.2 Fluoride	174
10.3 Fluoride in Saliva	176
10.4 Effects of Fluoride on Health	177
10.4.1 Toxic Effects	177
10.4.2 Dental Caries	178
10.4.3 Bone Effects	179
10.4.4 Cancer	180
10.4.5 Reproductive Effects	180
10.4.6 Renal Effects	180
10.4.7 Endocrine Effects	181
10.4.8 Gastrointestinal Effects	181
10.4.9 Neurological Effects	181
10.4.10 Birth Defects	181
10.5 Conclusions	182
Summary Points	182
Key Facts of Dental Caries	182
Definitions of Words and Terms	182
Abbreviations	183
References	183

Chapter 11 Teeth–Saliva Migration of Fluoride Ions and Health Implications	186
<i>Biljana M. Kalićanin, Dragan S. Velimirović, and Aleksandra N. Pavlović</i>	
11.1 Physiological and Biochemical Properties of Fluorine	186
11.2 Teeth Structure	187
11.3 Fluorine in Saliva and Dental Tissue	189
11.4 The Cariostatic Effect of Fluoride from the Glass Ionomer Fillings – An <i>In Vitro</i> Study	190
11.5 Health Effects of Fluorides	194
Summary Points	196
Key Facts of the Mechanism of Fluoride Effects in Bone Tissue	196
Definitions of Words and Terms	197
List of Abbreviations	198
References	198
Chapter 12 Effect of Fluoride on Bone Metabolism, Structure and Remodeling	200
<i>Brenda Lorena Fina and Alfredo Rigalli</i>	
12.1 Bone Tissue	200
12.2 Effects of Fluoride on Bone Formation and Repair	202
12.3 Relationship between Bone, Inflammation, Reactive Oxygen Species and Fluoride	207
12.4 Other Alternatives for the Administration of Fluoride with Minimal Adverse Effects	209
Summary Points	210
Key Facts of Fluoride on Bone Repair	211
Definitions of Words and Terms	211
List of Abbreviations	212
References	213
Chapter 13 Fluoride and Dietary Calcium on Bone	217
<i>Dianjun Sun, Cheng Wang, Wei Zhang, and Lijun Zhao</i>	
13.1 Dietary Calcium, Fluoride and Fluorosis	219
13.2 Cellular Ca ²⁺ , Fluoride and Bone Metabolism	221
13.2.1 Cellular Ca ²⁺ and Bone Metabolism	221
13.2.2 Cellular Ca ²⁺ , Fluoride and Bone Metabolism	222
13.3 Calcitropic Hormone and Fluoride and Bone Metabolism	223
13.3.1 Parathyroid Hormone	223
13.3.2 Calcitonin	224
13.3.3 1, 25-Dihydroxy-vitamin D ₃	224
13.3.4 Glucocorticoid	225
13.3.5 Sex Hormone	226

13.4	Effects of Fluoride on the Signal Transduction Pathways of Bone Metabolism	227
13.4.1	OPG/RANKL/RANK System is a Great Breakthrough in the Field of Bone in Recent Years	227
13.4.2	PI3K/Akt Signaling Pathway Plays Important Roles in Both Cell Proliferation and Differentiation of Osteoblasts or Osteoclasts	227
13.4.3	Activated MAP Kinase Pathway Plays an Important Role in the Regulation of Cell Cycle in Osteoblasts	228
	Summary Points	229
	Key Facts of Endemic Fluorosis	229
	Definitions of Words and Terms	230
	List of Abbreviations	232
	References	232
Chapter 14	Sodium Fluoride and PET Bone Scans	236
	<i>Gholam R. Berenji, Yuxin Li, Roberto Gonzalez-Odriozola, and Anurada Thenkondar</i>	
14.1	Diagnostic Imaging Using Radionuclides	236
14.1.1	Radionuclide and Radiotracer	236
14.1.2	Radionuclide Production	237
14.1.3	Imaging Methods	238
14.1.4	Commonly Used Radionuclide in PET Imaging	242
14.2	Fluoride as an Imaging Radionuclide	243
14.2.1	Production and Kinetics	243
14.2.2	Toxicity and Radiation Safety	243
14.2.3	Differences between MDP Bone Scan and ¹⁸ F Fluoride PET Bone Scan	245
14.2.4	Application and Indications	245
	Summary Points	250
	Key Facts of PET Bone Scans	250
	Definitions	251
	Abbreviations	251
	References	251
Chapter 15	Fluoride-Induced Oxidative Damage in Hippocampal Cells	255
	<i>Iwona Inkielewicz-Stepniak and Narcyz Knap</i>	
15.1	A Few Words about Fluoride	255
15.2	Oxidative Stress	255

15.2.1	Why is the Central Nervous System so Highly Susceptibility to Oxidative Damage?	257
15.3	Fluoride and the Central Nervous System (CNS)	258
15.4	Hippocampus	260
15.4.1	Fluoride and the Hippocampus – <i>In Vivo</i> Study	260
15.4.2	Fluoride and Oxidative Injury in Hippocampal Cells – <i>In Vitro</i> Study	262
	Summary Points	265
	Key Facts of the Hippocampus	266
	Definitions and Explanation of Key Terms	266
	Abbreviations	267
	References	268
Chapter 16	Fluoride-Induced Oxidative Stress in the Liver	271
	<i>Seyed Fazel Nabavi, Maria Daglia, Antoni Sureda, and Seyed Mohammad Nabavi</i>	
16.1	Introduction	271
16.2	Fluorine Applications	274
16.3	Fluoride Accumulation	276
16.4	Fluoride Toxicity	277
16.4.1	Molecular Mechanism of Fluoride-Induced Toxicity	278
16.4.2	Fluoride-Induced Hepatotoxicity	281
	Summary Points	284
	Key Facts	284
	Key Features of Fluoride Toxicity	284
	Key Features of Fluoride-Induced Hepatotoxicity	285
	Definitions of Words and Terms	285
	Abbreviations	285
	References	286
Chapter 17	Effect of Fluoride on the Sensitivity and Secretion of Insulin	292
	<i>Mercedes Lombarte, Alfredo Rigalli, Fernando Yamamoto Chiba, and Doris Hissako Sumida</i>	
17.1	Diabetes Mellitus	293
17.2	Fluoride Metabolism	293
17.3	Fluoride and Glucose Homeostasis	294
17.3.1	Effect of Fluoride on Glycogen and Glucose Metabolism	294
17.3.2	Inhibition of the Secretion of Insulin	295
17.3.3	Fluoride-Induced Insulin Resistance	297

Summary Points	301
Key Facts of Insulin Resistance	301
Definitions of Words and Terms	302
List of Abbreviations	303
References	303
Chapter 18 Preventing Fluoride Toxicity with Selenium	308
<i>Swaran J. S. Flora and Megha Mittal</i>	
18.1 Introduction	308
18.2 Selenium: An Essential Component of an Antioxidant System	309
18.3 Effect of Selenium on Apoptosis and Cell Death	313
18.4 Selenium as an Anticarcinogenic Agent	314
18.5 Protective Effects of Selenium on Organ Damage	317
18.6 Neurological Manifestations	317
18.7 Renal System	319
18.8 Cardiovascular System	319
18.9 Interaction with Vitamin E and Essential Elements	320
18.10 Efficacy of Nanosized Selenium	321
18.11 Conclusion	321
Summary Points	321
Key Facts	322
Definition and Explanation of Key Terms	322
List of Abbreviations	323
References	324
Chapter 19 Fluoride and Effects on Caspases	327
<i>Jundong Wang and Ruiyan Niu</i>	
19.1 Introduction	327
19.2 Caspase Family	329
19.3 Apoptotic Caspases Activation	330
19.4 Effects on Caspases	331
19.5 Conclusions	332
Summary Points	332
Definition of Words and Terms	333
List of Abbreviations	333
References	334
Subject Index	337
