# Large animals as biomedical models: Ethical, societal, legal and biological aspects

Kristin Hagen, Angelika Schnieke, Felix Thiele (eds)

# Contents

## **Editorial**

Kristin Hagen, Angelika Schnieke and Felix Thiele ..... 6

## **Experimenting on animals: When does their size matter morally?**

Robert Heeger ..... 13

## **Brain-pain: Do animals with higher cognitive capacities feel more pain? Insights for species selection in scientific experiments**

James W. Yeates ..... 24

## **Animals as biomedical models – a legal perspective**

Ralf Müller-Terpitz ..... 47

## **Research involving non-human primates: treatment guidelines and ethical frameworks**

Kirsten Brukamp ..... 57

## **Relevant similarity in the light of biomedical experimentation**

Lara K. Kutschenko ..... 69

## **Does size matter? Considerations of importance for choice of animal species in a transgenic model for Alzheimer's disease**

Lene Vammen Søndergaard and Mette S. Herskin ..... 84

## **The right question and the corresponding animal model in light of the 3 R's**

Brigitte von Rechenberg ..... 100

## **Predictive validity of animal models and the question of size**

Orsolya E. Varga ..... 113

## **The dog – an alternative animal model for haematopoietic malignancies**

Barbara C. Rütgen, Ilse Schwendenwein, Sabine E. Essler and Armin Saalmüller ... 126

## **Transmissible Spongiform Encephalopathy research in the original species and in laboratory mice**

Katy E. Beck ..... 135

## **The use of the rabbit as an animal model for clinical electroencephalogram studies applied to depth of anaesthesia research**

Luis Antunes and Aura Silva ..... 150
