Editors

Printed Biomaterials

Novel Processing and Modeling Techniques
for Medicine and Surgery

 Springer

Contents

1 Surgical Cutting Simulation and Topology Refinement of Bio-Tissues and Bio-Object.....	1
Shiyong Lin, Yuan-Shin Lee, and Roger J. Narayan	
2 Heterogeneous Deformable Modeling of Bio-Tissues and Haptic Force Rendering for Bio-Object Modeling	19
Shiyong Lin, Yuan-Shin Lee, and Roger J. Narayan	
3 Computer-Aided Process Planning for the Layered Fabrication of Porous Scaffold Matrices	39
Binil Starly	
4 Cell Source for Tissue and Organ Printing	57
Tao Xu, Yuyu Yuan, and James J. Yoo	
5 Direct-Writing of Biomedica for Drug Delivery and Tissue Regeneration.....	71
Salil Desai and Benjamin Harrison	
6 Precision Extruding Deposition for Freeform Fabrication of PCL and PCL-HA Tissue Scaffolds	91
L. Shor, E.D. Yildirim, S. Güçeri, and W. Sun	
7 The Role of Technology in the Maxillofacial Prosthetic Setting	111
Betsy K. Davis, DMS, MS and Randy Emert	
Index.....	121
