<b>Chapter 1: Introduction to Oracle .NET Connectivity .....</b>	<b>1</b>
<b>Making the Transition from SQL Server to Oracle .....</b>	<b>2</b>
<b>Introducing Oracle Connectivity .....</b>	<b>3</b>
<b>Accessing Oracle from Unmanaged Code .....</b>	<b>4</b>
Using OLEDB in Unmanaged Code .....	5
Oracle Provider for OLEDB .....	5
MS OLEDB Provider for Oracle .....	6
Using ODBC in Unmanaged Code .....	6
Oracle ODBC Driver .....	6
Microsoft ODBC for Oracle .....	7
Using OO4O in Unmanaged Code .....	7
<b>Accessing Oracle from Managed Code .....</b>	<b>8</b>
Using OLEDB.NET in Managed Code .....	8
Using ODBC.NET in Managed Code .....	9
Using the Microsoft .NET Managed Provider for Oracle .....	11
<b>Introducing ODP.NET .....</b>	<b>11</b>
Understanding the ODP.NET Architecture .....	12

Understanding the ODP.NET Classes .....	12
Accessing Data using ODP.NET .....	13
Using ODP.NET in ASP.NET Projects .....	13
Considering ODP.NET Performance .....	15
Introducing the Oracle Suite of Products .....	15
Summary .....	17
<b>Chapter 2: ODP.NET: A Functional Overview .....</b>	<b>19</b>
Exploring Oracle Features Accessible in ODP.NET Version 9.....	19
Manipulating XML.....	20
Manipulating LOBs.....	20
Using PL/SQL Associative Array Binding .....	21
Supporting Active Data Objects (ADO.NET) 2.0.....	22
Accessing Oracle Features from ODP.NET Version 10.....	22
Supporting Oracle Grids .....	23
Supporting Multiple Oracle Homes.....	23
Using Floating Point Data Types .....	24
Using Statement Caching .....	24
Supporting Command Cancellation and Timeout .....	25
Retrieving Parameters Programmatically.....	26
Supporting .NET Stored Procedures .....	26
Using Client Identifiers .....	26
Using Database Change Notifications .....	27
Managing Connection Pools .....	28
Optimizing Connection Pools for RAC.....	28
Using a REF Cursor as an IN/OUT Parameter.....	29
Using 64-bit ODP.NET .....	29
Controlling the FetchSize Property .....	29
Configuring ODP.NET .....	30

<b>Accessing Oracle Features from ODP.NET Version 11 .....</b>	<b>30</b>
Enhancing Performance .....	31
Deploying ODP.NET Using xcopy .....	31
Supporting Oracle User Defined Types (UDTs) .....	31
Performing Bulk Copy Operations.....	32
Using Windows Authenticated User Connections Pooling .....	32
Publishing Connection Pool Performance Counters .....	33
Supporting Self-Tuning for Applications.....	34
Using Oracle Streaming AQ .....	34
Supporting Promotable Local Transactions.....	35
Using ODP.NET Security Enhancements.....	37
Running Callbacks for HA Event Notifications .....	38
Starting Up and Shutting Down Databases .....	38
<b>Getting Started.....</b>	<b>39</b>
Installing Oracle Database 11g.....	39
Installing ODAC.NET.....	43
<b>Summary .....</b>	<b>48</b>
<b>Chapter 3: Connecting to Oracle with ODP.NET .....</b>	<b>49</b>
Connecting via TNS.....	49
Understanding the TNSNames.ora file.....	51
Connecting in Other Ways .....	52
Connecting Without TNSNames.ora.....	52
Connecting via EZConnect.....	53
<b>Learning the ODP.NET Connection Parameters .....</b>	<b>54</b>
Connecting with Connection Pooling Activated .....	54
Connecting via Integrated Windows Authentication .....	57
Connecting with Special Privileges .....	58
Using Other Connection String Attributes .....	59

Checking Whether ODP.NET Is Installed .....	60
Dynamically Building an ODP.NET Connection String.....	61
Using the OracleConnectionStringBuilder Class.....	61
Retrieving Available Oracle Data Sources .....	62
Understanding Transparent Application Failover.....	62
Enabling TAF in Your Application.....	63
Using TAF Callbacks .....	65
Summary .....	67
<b>Chapter 4: Retrieving and Manipulating Data with ODP.NET .....</b>	<b>69</b>
Understanding ODP.NET Data Types.....	69
Creating a Sample Table.....	73
Retrieving Multiple Rows of Data .....	76
Retrieving a Single Value.....	78
Handling NULL Values in ODP.NET.....	79
Retrieving Data into a Dataset.....	80
Using Parameterized Queries .....	81
Updating Data .....	83
Executing a Single INSERT, UPDATE, or DELETE Statement.....	84
Committing Dataset Changes to the Database.....	85
Generating Command Objects.....	88
Handling Master-Detail Relationships .....	90
Creating a Second Table.....	90
Retrieving from Multiple Tables .....	91
Binding a .NET Form to Your Dataset .....	92
Committing Changes to Multiple Tables.....	94
Defining Table Relationships and Constraints in a DataSet .....	95
Manipulating LOBs and BFILES .....	97

Uploading BLOB Data.....	97
Retrieving BLOB Data .....	99
Inserting CLOB/NCLOB Data .....	100
Retrieving CLOB/NCLOB Data .....	101
Creating BFILE Directory Mappings .....	102
Inserting BFILE Data .....	103
Retrieving BFILE Data .....	104
Manipulating RAW Data Types.....	105
Creating Automatically Incrementing Columns .....	108
Executing DDL from ODP.NET .....	109
Discovering Schema in ODP.NET .....	110
Handling ODP.NET Exceptions .....	113
Summary .....	115
<b>Chapter 5: Using PL/SQL and .NET CLR Stored Procedures with ODP.NET.....</b>	<b>117</b>
Understanding the Basics of PL/SQL .....	117
Working with Anonymous PL/SQL Blocks.....	118
Executing an Anonymous PL/SQL Block.....	118
Passing Data into an Anonymous Block .....	119
Returning Data from an Anonymous Block.....	121
Working with PL/SQL Stored Procedures .....	122
Executing a PL/SQL Stored Procedure.....	123
Passing Data into a PL/SQL Stored Procedure .....	124
Retrieving Data from a PL/SQL Stored Procedure .....	126
Executing a PL/SQL Function.....	127
Handling Special IN and OUT Data Types .....	128
Using Associative Arrays .....	128
Passing Associative Arrays to PL/SQL Code .....	129
Retrieving Associative Arrays from PL/SQL Code.....	131

Using VARRAYs .....	134
Using Nested Tables .....	138
Using REF Cursors .....	140
Reading a Result Set from a REF Cursor Using the OracleDataReader .....	141
Reading a Result Set from a REF Cursor Using the OracleDataAdapter .....	142
Retrieving Multiple Active Result Sets.....	144
User Defined Types (UDT) / OBJECT Types.....	146
Handling Custom-Defined PL/SQL Errors.....	151
Creating Your First .NET CLR Stored Procedure .....	152
Deploying a .NET CLR Stored Procedure .....	154
Executing the .NET CLR Stored Procedure .....	157
Summary .....	159
<b>Chapter 6: ODP.NET Globalization .....</b>	<b>161</b>
Storing and Retrieving Double-Byte Data .....	161
Using the OracleGlobalization class.....	165
Setting Attributes at the Client Level.....	165
Setting Attributes at the Session Level.....	166
Setting Attributes at the Thread Level.....	167
Changing the Session Language .....	167
Formatting Calendar Dates .....	168
Displaying Various Date Formats and Languages .....	169
Designating Calendar Systems.....	171
Representing Currencies .....	172
Formatting Numbers.....	176
Dealing with Time Zones .....	176
Sorting and Comparing Strings.....	178
Applying Country-Based Formatting.....	181
Safely Mapping to .NET Data Types.....	183

Summary .....	185
<b>Chapter 7: Transactions with ODP.NET .....</b>	<b>187</b>
Understanding Transactions and the OracleTransaction Class .....	187
Executing Your First Transaction.....	189
Executing Stored Procedures in a Transaction.....	191
Performing Partial Rollbacks .....	192
Working with Distributed Transactions.....	194
Creating a Second Database Instance.....	195
Executing Implicit Distributed Transactions .....	198
Executing Explicit Distributed Transactions .....	201
Executing Promotable Transactions .....	202
Summary .....	203
<b>Chapter 8: Oracle Database Change Notifications with ODP.NET.....</b>	<b>205</b>
Understanding Database Change Notification .....	205
Registering for Query-Based Change Notifications .....	206
Registering for Object-Based Change Notifications .....	211
Grouping Multiple Notification Requests .....	212
Removing a Registration.....	213
Retrieving Change Notification Information .....	214
Choosing to Poll .....	216
Considering Typical Usage Scenarios.....	217
Thinking About Performance .....	221
Summary .....	222
<b>Chapter 9: Using Oracle Database Streams Advanced Queuing with ODP.NET... </b>	<b>223</b>
Understanding the Basics of AQ .....	224
Creating a Single-Consumer Queue.....	224
Setting Up a Single-Consumer Queue .....	224

Enqueuing and Dequeuing a Single Message .....	226
Enqueuing and Dequeuing Multiple Messages.....	230
<b>Creating a Multiple-Consumer Queue.....</b>	<b>232</b>
Defining Recipients at the Queue Level.....	233
Defining Recipients at the Message Level.....	237
<b>Enqueuing and Dequeuing Various Data Types in AQ.....</b>	<b>238</b>
Using UDT Data Types .....	238
Using XML Data Types.....	244
<b>Waiting for Incoming Messages .....</b>	<b>246</b>
Dequeuing Messages Synchronously (Blocking).....	247
Dequeuing Messages Asynchronously (Nonblocking).....	248
<b>Understanding the Useful OracleAQMessage Properties.....</b>	<b>250</b>
<b>Summary .....</b>	<b>251</b>
<b>Chapter 10: Oracle XML Support.....</b>	<b>253</b>
<b>Accessing Native XML Data (XMLTYPE).....</b>	<b>254</b>
Creating an XMLTYPE Column .....	254
Receiving XMLTYPE Data with XMLReader .....	255
Receiving XMLTYPE Data with OracleXMLType.....	257
Receiving XMLTYPE Data as a String .....	259
<b>Passing XML Data to and from PL/SQL Stored Procedures .....</b>	<b>260</b>
<b>Validating Against XML Schema .....</b>	<b>262</b>
<b>Using XSLT to Transform XML Data.....</b>	<b>266</b>
<b>Retrieving Relational Data as XML.....</b>	<b>269</b>
Using the XMLCommandType property .....	269
Using the Dataset.GetXML Method.....	272
Using the DBMS_XMLGEN.GETXML Stored Procedure .....	273
<b>Manipulating Relational Data as XML.....</b>	<b>274</b>
Inserting Relational Data Using XML .....	274

Updating Relational Data Using XML .....	278
Deleting Relational Data Using XML .....	280
Using XQuery to Query Data.....	282
Summary .....	284
<b>Chapter 11: ODP.NET Security Features.....</b>	<b>287</b>
Securing Your .NET Applications .....	287
Authenticating Data .....	289
Implementing Username/Password Authentication .....	289
Implementing Proxy Authentication.....	289
Implementing ClientId-Based Username/Password Authentication .....	290
Implementing Windows Authentication.....	291
Understanding Code Access Security .....	291
Using Code Groups .....	292
Using Permission Sets.....	293
Resolving Permissions in .NET .....	294
Seeing CAS in Action .....	295
Configuring CAS Policies .....	297
Configuring CAS Policies via the GUI .....	297
Configuring CAS Policies Programmatically .....	301
Requesting Permissions .....	301
Requesting Permissions Declaratively .....	301
Requesting Permissions Imperatively .....	304
Ensuring That an Assembly Can Never Access Oracle .....	305
Refusing Permissions Declaratively at the Assembly Level .....	306
Denying Permissions Declaratively at the Method Level.....	307
Denying Permissions Imperatively at the Method Level.....	308
Using CAS with ASP.NET Applications .....	308
Implementing Best Practices.....	313

Preventing SQL Injection Attacks .....	313
Preventing Nonpersistent Cross-Site Scripting Attacks .....	314
Summary .....	315
<b>Chapter 12: ODP.NET Performance .....</b>	<b>317</b>
Measuring Performance .....	317
Enabling the Performance Counters.....	318
Measuring Performance Programmatically.....	320
Speeding Up Connections with Connection Pooling .....	321
Performing Faster Floating Point Arithmetic.....	323
Executing Statements Faster.....	325
Batching Your SQL Statements Together For Execution.....	325
Using Statement Caching .....	328
REF Cursors and Multiple Active Resultsets (MARs) .....	331
Passing Parameters More Efficiently.....	331
Using Bind Arrays to Pass Parameters in Bulk.....	331
Using PL/SQL Associative Arrays.....	334
Managing LOBs More Efficiently.....	337
Enabling the LOB Cache .....	337
Setting the InitialLOBFetchSize Property.....	340
Retrieving Data More Efficiently .....	341
Changing the FetchSize Property .....	341
Using the Client Result Cache .....	343
Importing Data More Efficiently .....	346
Applying Optimization Best Practices .....	348
Using Stored Procedures Whenever Possible.....	349
Using the Right Data Access Object .....	349
Summary .....	349

<b>Chapter 13: Design Patterns and Considerations in Using ODP.NET.....</b>	<b>351</b>
Programming to an Interface Instead of an Implementation .....	352
Using the Data Access Object.....	353
Using Microsoft's Enterprise Library .....	354
Creating Oracle.NET .....	355
Creating the ODP.NET DAO Class.....	355
Modifying the DBProviderMapping Class .....	361
Modifying the DatabaseConfigurationView Class .....	362
Compiling the New DAAB .....	364
Using the ODP.NET DAO .....	364
Editing the Application Configuration File .....	364
Accessing Data via the DAAB .....	366
Reading Multiple Rows into a Dataset.....	366
Updating Multiple Rows from a Dataset.....	367
Reading Data Using a DataReader.....	368
Considering Best Practices.....	369
Planning for Multiple Data Sources .....	369
Keeping Provider-Specific Code Within the Data Tier .....	369
Outputting Business Objects, Not Datasets .....	370
Deciding How to Map Data Source Structures to Business Objects.....	370
Deciding How to Manage Data Source Settings.....	370
Summary .....	370
<b>Chapter 14: ODT.NET Tool Basics.....</b>	<b>373</b>
Installing ODT.NET .....	373
Managing the Database Schema .....	374
Managing Users, Roles, and Object Privileges .....	377
Editing and Debugging PL/SQL Code .....	380
Creating a PL/SQL Procedure .....	380

Creating a PL/SQL Package .....	383
Debugging PL/SQL stored procedures.....	385
Managing Oracle SQL Scripts .....	391
Managing Advanced Queues .....	394
Importing Tables and Data from External Data Sources.....	396
Summary .....	399
<b>Chapter 15: Building Data-Driven Applications with ODT.NET .....</b>	<b>401</b>
Designing Queries Visually .....	401
Generating Strongly Typed DataSet Objects.....	404
Generating UDT Classes .....	413
Designing a UDT Object Visually.....	413
Creating the UDT Object Table Visually .....	414
Creating the OVERSEAS_JOBS Table.....	415
Generating the UDT Classes .....	417
Using the UDT in Your Project.....	420
Generating ASP.NET Code .....	423
Summary .....	427
<b>Index .....</b>	<b>429</b>
