# Quantum Systems in Chemistry and Physics

Progress in Methods and Applications

# Contents

<b>PTCP Aim and Scope</b> .....	v
<b>Preface</b> .....	vii
<b>Part I Fundamental Theory</b>	
<b>1 The Relativistic Kepler Problem and Gödel's Paradox</b> .....	3
Erkki J. Brändas	
<b>2 The Dirac Electron: Spin, <i>Zitterbewegung</i>, the Compton Wavelength, and the Kinetic Foundation of Rest Mass</b> .....	23
Jean Maruani	
<b>3 Molecular Parity Violation and Chirality: The Asymmetry of Life and the Symmetry Violations in Physics</b> .....	47
Martin Quack	
<b>Part II Molecular Processes</b>	
<b>4 Application of Density Matrix Methods to Ultrafast Processes</b> .....	79
Y.L. Niu, C.K. Lin, C.Y. Zhu, H. Mineo, S.D. Chao, Y. Fujimura, M. Hayashi, and Sheng H. Lin	
<b>5 Quantum Master Equation Study of Electromagnetically Induced Transparency in Dipole-Coupled Dimer Models</b> .....	109
Takuya Minami and Masayoshi Nakano	
<b>6 Laser-Induced Electronic and Nuclear Coherent Motions in Chiral Aromatic Molecules</b> .....	121
Manabu Kanno, Hirohiko Kono, Sheng H. Lin, and Yuichi Fujimura	

- 7 Simulation of Nuclear Dynamics of C<sub>60</sub>: From Vibrational Excitation by Near-IR Femtosecond Laser Pulses to Subsequent Nanosecond Rearrangement and Fragmentation** ..... 149  
N. Niitsu, M. Kikuchi, H. Ikeda, K. Yamazaki, M. Kanno, H. Kono, K. Mitsuke, M. Toda, K. Nakai, and S. Irle
- 8 Systematics and Prediction in Franck-Condon Factors** ..... 179  
Ray Hefferlin, Jonathan Sackett, and Jeremy Tatum
- 9 Electron Momentum Distribution and Atomic Collisions** ..... 193  
Takeshi Mukoyama
- 10 Ab Initio Path Integral Molecular Dynamics Simulations of F<sub>2</sub>H<sup>-</sup> and F<sub>2</sub>H<sub>3</sub><sup>+</sup>** ..... 207  
K. Suzuki, H. Ishibashi, K. Yagi, M. Shiga, and M. Tachikawa
- 11 Relativistic Energy Approach to Cooperative Electron- $\gamma$ -Nuclear Processes: NEET Effect** ..... 217  
Olga Yu. Khetselius
- 12 Advanced Relativistic Energy Approach to Radiative Decay Processes in Multielectron Atoms and Multicharged Ions** ..... 231  
Alexander V. Glushkov

### Part III Molecular Structure

- 13 Solving the Schrödinger Equation for the Hydrogen Molecular Ion in a Magnetic Field Using the Free-Complement Method** ..... 255  
Atsushi Ishikawa, Hiroyuki Nakashima, and Hiroshi Nakatsuji
- 14 Description of Core-Ionized and Core-Excited States by Density Functional Theory and Time-Dependent Density Functional Theory** ..... 275  
Yutaka Imamura and Hiromi Nakai
- 15 Intermolecular Potentials of the Carbon Tetrachloride and Trifluoromethane Dimers Calculated with Density Functional Theory** ..... 309  
Arvin Huang-Te Li, Sheng D. Chao, and Yio-Wha Shau
- 16 Ab initio Study of the Potential Energy Surface and Stability of the Li<sub>2</sub><sup>+</sup>(X<sup>2</sup> $\Sigma_g^+$ ) Alkali Dimer in Interaction with a Xenon Atom** ..... 321  
S. Saidi, C. Ghanmi, F. Hassen, and H. Berriche

- 17 Validation of Quantum Chemical Calculations for Sulfonamide Geometrical Parameters** ..... 331  
Akifumi Oda, Yu Takano, and Ohgi Takahashi
- 18 Approximate Spin Projection for Geometry Optimization of Biradical Systems: Case Studies of Through-Space and Through-Bond Systems** ..... 345  
N. Yasuda, Y. Kitagawa, H. Hatake, T. Saito, Y. Kataoka, T. Matsui, T. Kawakami, S. Yamanaka, M. Okumura, and K. Yamaguchi

#### **Part IV Molecular Properties**

- 19 DFT Calculations of the Heterojunction Effect for Precious Metal Cluster Catalysts** ..... 363  
M. Okumura, K. Sakata, K. Tada, S. Yamada, K. Okazaki, Y. Kitagawa, T. Kawakami, and S. Yamanaka
- 20 Luminescence Wavelengths and Energy Level Structure of Dinuclear Copper Complexes and Related Metal Complexes** ..... 377  
T. Ishii, M. Kenmotsu, K. Tsuge, G. Sakane, Y. Sasaki, M. Yamashita, and B.K. Breedlove
- 21 Valence XPS, IR, and Solution <sup>13</sup>C NMR Spectral Analysis of Representative Polymers by Quantum Chemical Calculations** ..... 393  
Kazunaka Endo, Tomonori Ida, Shingo Simada, and Joseph Vincent Ortiz

#### **Part V Condensed Matter**

- 22 Quantum Decoherence at the Femtosecond Level in Liquids and Solids Observed by Neutron Compton Scattering** .... 407  
Erik B. Karlsson
- 23 Variational Path Integral Molecular Dynamics Study of Small Para-Hydrogen Clusters** ..... 427  
Shinichi Miura
- 24 Origin of Antiferromagnetism in Molecular and Periodic Systems in the Original Kohn–Sham Local Density Approximation** . 437  
Kimichika Fukushima
- 25 Calculation of Magnetic Properties and Spectroscopic Parameters of Manganese Clusters with Density Functional Theory** ..... 449  
K. Kanda, S. Yamanaka, T. Saito, Y. Kitagawa, T. Kawakami, M. Okumura, and K. Yamaguchi

<b>26</b>	<b>Density Functional Study of Manganese Complexes: Protonation Effects on Geometry and Magnetism</b> .....	461
	S. Yamanaka, K. Kanda, T. Saito, Y. Kitagawa, T. Kawakami, M. Ehara, M. Okumura, H. Nakamura, and K. Yamaguchi	
<b>27</b>	<b>Depth Profile Assignments of nm and <math>\mu\text{m}</math> Orders by Quantum Chemical Calculations for Chitosan Films Modified by <math>\text{Kr}^+</math> Beam Bombardment</b> .....	475
	K. Endo, H. Shinomiya, T. Ida, S. Shimada, K. Takahashi, Y. Suzuki, and H. Yajima	
<b>Part VI Biosystems</b>		
<b>28</b>	<b>Color Tuning in Human Cone Visual Pigments: The Role of the Protein Environment</b> .....	489
	Jun-ya Hasegawa, Kazuhiro J. Fujimoto, and Hiroshi Nakatsuji	
<b>29</b>	<b>Free Energy of Cell-Penetrating Peptide through Lipid Bilayer Membrane: Coarse-Grained Model Simulation</b> .....	503
	S. Kawamoto, M. Takasu, T. Miyakawa, R. Morikawa, T. Oda, H. Saito, S. Futaki, H. Nagao, and W. Shinoda	
<b>30</b>	<b>Density Functional Study of the Origin of the Strongly Delocalized Electronic Structure of the <math>\text{Cu}_A</math> Site in Cytochrome <i>c</i> Oxidase</b> .....	513
	Yu Takano, Orio Okuyama, Yasuteru Shigeta, and Haruki Nakamura	
<b>31</b>	<b>The Potentials of the Atoms around <math>\text{Mg}^{2+}</math> in the H-ras GTP and GDP Complexes</b> .....	525
	T. Miyakawa, R. Morikawa, M. Takasu, K. Sugimori, K. Kawaguchi, H. Saito, and H. Nagao	
<b>32</b>	<b>Molecular Dynamics Study of Glutathione S-Transferase: Structure and Binding Character of Glutathione</b> .....	545
	Y. Omae, H. Saito, H. Takagi, M. Nishimura, M. Iwayama, K. Kawaguchi, and H. Nagao	
<b>33</b>	<b>Designing the Binding Surface of Proteins to Construct Nano-fibers</b> .....	555
	Y. Komatsu, H. Yamada, S. Kawamoto, M. Fukuda, T. Miyakawa, R. Morikawa, M. Takasu, S. Akanuma, and A. Yamagishi	
	<b>Index</b> .....	569
