De-Shuang Huang Phalguni Gupta
Ling Wang Michael Gromiha (Eds.)

Emerging Intelligent Computing Technology and Applications

9th International Conference, ICIC 2013
Nanning, China, July 28-31, 2013
Proceedings

Springer

Table of Contents

Neural Networks

A Hybrid Approach for Large Scale Causality Discovery 1
Zhifeng Hao, Jinlong Huang, Ruichu Cai, and Wen Wen

Fast Wavelet Transform Based on Spiking Neural Network for Visual Images 7
Zhenmin Zhang, Qingxiang Wu, Zhiqiang Zhuo, Xiaowei Wang, and Liuping Huang

Further Analysis on Stability for a Class of Neural Networks with Variable Delays and Impulses 13
Chang-bo Yang, Xing-wei Zhou, and Tao Wang

A New Result of Periodic Oscillations for a Six-Neuron BAM Neural Network Model 19
Chunhua Feng and Yuanhua Lin

A Self-Organized Fuzzy Neural Network Approach for Rule Generation of Fuzzy Logic Systems 25
Juan C. Figueroa-García, Cynthia Ochoa-Rey, and Jose Avellaneda-González

Systems Biology and Computational Biology

Scoring Protein-Protein Interactions Using the Width of Gene Ontology Terms and the Information Content of Common Ancestors 31
Guangyu Cui and Kyungsook Han

Database of Protein-Nucleic Acid Binding Pairs at Atomic and Residue Levels 37
Byungkyu Park, Hyungchan Kim, Sangmin Lee, and Kyungsook Han

Computational Genomics and Proteomics

Assessment of Protein-Graph Remodeling via Conformational Graph Entropy 43
Sheng-Lung Peng and Yu-Wei Tsay

Knowledge Discovery and Data Mining

A Novel Feature Selection Technique for SAGE Data Classification 49
Seeja K.R.

Chinese Sentiment Classification Based on the Sentiment Drop Point ... 55
Zhifeng Hao, Jie Cheng, Ruichu Cai, Wen Wen, and Lijuan Wang

Evolutionary Learning and Genetic Algorithms

Multi-objectivization and Surrogate Modelling for Neural Network Hyper-parameters Tuning 61
Martin Pilát and Roman Neruda

Machine Learning Theory and Methods

Automated Model Selection and Parameter Estimation of Log-Normal Mixtures via BYY Harmony Learning 67
Yifan Zhou, Zhijie Ren, and Jinwen Ma

Biomedical Informatics Theory and Methods

A Simple but Robust Complex Disease Classification Method Using Virtual Sample Template 73
Shu-Lin Wang, Yaping Fang, and Jianwen Fang

Biweight Midcorrelation-Based Gene Differential Coexpression Analysis and Its Application to Type II Diabetes 81
Lin Yuan, Wen Sha, Zhan-Li Sun, and Chun-Hou Zheng

Particle Swarm Optimization and Niche Technology

A Hybrid Gene Selection and Classification Approach for Microarray Data Based on Clustering and PSO 88
Shanxiu Yang, Fei Han, and Jian Guan

Unsupervised and Reinforcement Learning

Manifold Learner Ensemble 94
Peng Zhang, Chunbo Fan, Yuanyuan Ren, and Nina Zhang

Intelligent Computing in Bioinformatics

Two Improved Artificial Bee Colony Algorithms Inspired by Grenade Explosion Method 100
Chaoqun Zhang, Jianguo Zheng, and Yongquan Zhou

3D Protein Structure Prediction with Local Adjust Tabu Search Algorithm 106
Xiaoli Lin and Fengli Zhou

An Effective Parameter Estimation Approach for the Inference of Gene Networks 112
Yu-Ting Hsiao and Wei-Po Lee

Intelligent Computing in Finance/Banking

Credit Scoring Based on Kernel Matching Pursuit 118
Jianwu Li, Haizhou Wei, Chunyan Kong, Xin Hou, and Hong Li

Intelligent Computing in Petri Nets/Transportation Systems

Vehicle Queue Length Measurement Based on a Modified Local Variance and LBP 123
Qin Chai, Cheng Cheng, Chunmei Liu, and Hongzhong Chen

Intelligent Computing in Signal Processing

Applying SBL and Non-Linear Dynamics Features for Detecting Deception from Speech Signal 129
Yan Zhou

Intelligent Computing in Pattern Recognition

Face Recognition Based on Random Weights Network and Quasi Singular Value Decomposition 136
Zhenghua Zhou, Jianwei Zhao, and Feilong Cao

Learning KPCA for Face Recognition 142
Wangli Hao, Jianwu Li, and Xiao Zhang

Intelligent Computing in Image Processing

GPU Implementation of Spiking Neural Networks for Edge Detection ... 147
Zhiqiang Zhuo, Qingxiang Wu, Zhenmin Zhang, Gongrong Zhang, and Liuping Huang

Detecting and Recognizing LED Dot Matrix Text in Natural Scene Images 153
Wahyono and Kang-Hyun Jo

Intelligent Computing in Robotics

An Adaptive Controller Using Wavelet Network for Five-Bar Manipulators with Deadzone Inputs 159
Tien Dung Le and Hee-Jun Kang

Robot Geometric Parameter Identification with Extended Kalman Filtering Algorithm 165
Hoai-Nhan Nguyen, Jian Zhou, Hee-Jun Kang, and Young-Shick Ro

Intelligent Computing in Computer Vision

Improving Classification Accuracy Using Gene Ontology Information ... 171
Ying Shen and Lin Zhang

A Novel Combination Feature HOG-LSS for Pedestrian Detection 177
Shihong Yao, Tao Wang, Weiming Shen, and Yanwen Chong

Special Session on Biometrics System and Security for Intelligent Computing

Segmentation of Slap Fingerprint Images 182
Kamlesh Tiwari, Joyeeta Mandal, and Phalguni Gupta

Multimodal Personal Authentication System Fusing Palmprint and Knuckleprint 188
Aditya Nigam and Phalguni Gupta

Special Session on Bio-inspired Computing and Applications

An Adaptive Comprehensive Learning Bacterial Foraging Optimization for Function Optimization 194
Lijing Tan, Hong Wang, Xiaoheng Liang, and Kangnan Xing

A Multi-objective Particle Swarm Optimization Based on Decomposition 200
Yanmin Liu and Ben Niu

Consensus of Sample-Balanced Classifiers for Identifying Ligand-Binding Residue by Co-evolutionary Physicochemical Characteristics of Amino Acids 206
Peng Chen

Computer Human Interaction using Multiple Visual Cues and Intelligent Computing

A Meta-heuristic Optimization Approach for Image Retrieval Using Relevance Feedback and a Gaussian Firefly Algorithm 213
T. Kanimozhi and K. Latha

Special Session on Protein and Gene Bioinformatics: Analysis, Algorithms and Applications

An Integrated Method for Functional Analysis of Microbial Communities by Gene Ontology Based on 16S rRNA Gene 219
Suping Deng and Kai Yang

Possible miRNA Coregulation of Target Genes in Brain Regions by Both Differential miRNA Expression and miRNA-Targeting-Specific Promoter Methylation 225
Y-h. Taguchi

Clustering and Assembling Large Transcriptome Datasets by EasyCluster2 231
Vitoantonio Bevilacqua, Nicola Pietroleonardo, Ely Ignazio Giannino, Fabio Stroppa, Graziano Pesole, and Ernesto Picardi

Author Index 237
