Introduction	xxvii
■ Chapter 1: Office 365: Moving to the Cloud	1
Office 365: The New Cloud Challenge	1
Customer Segments	2
Ready Design Custom Cupcakes IT Requirements.....	7
Strategic Overview	7
On-Premises and Cloud Resource Requirements.....	8
More Ready Design Cup Cakes (RDCC) IT Issues.....	9
RDCC Cloud Solution	17
Cloud Requirements	17
Migration Cost and Approaches.....	18
The Big Decision: On-Premises or Cloud Solutions?	20
Next Steps for RDCC	22
Summary	22
Next Steps	23
■ Chapter 2: Using Office 365 and Windows Intune	25
A Day in the Life of an Office 365 User.....	25
Where to Start with Office365? A Hands-On Tutorial.....	26
Logging into Office 365	27
Accessing Outlook–WebApp.....	30

SkyDrive Pro—Overview	32
Document Collaboration	33
Office 365 Yammer Configuration.....	35
Public Web Site.....	36
Office 365 Team Site.....	39
Office 365 and Windows Azure Active Directory Security.....	39
Office 365 Desktop Tools	40
Using Lync	44
Data Loss Prevention.....	46
Device Configuration	47
Windows Intune.....	48
MEC Summary.....	50
User Setup and Configuration	50
Workstation: Setup Guide	51
Workstation: Creating a New Outlook Profile.....	55
Workstation: Desktop Setup Configuration.....	57
SkyDrive Pro: Configuration.....	59
SkyDrive Pro: Planning for Personal and Team Site Document Storage.....	61
SkyDrive Pro: Team Site Caution.....	65
SkyDrive: Configuration Changes	67
SkyDrive Pro: Support for Office 2010 Users.....	67
SkyDrive: Checking Storage Allocation.....	68
Smartphone: Configuration.....	70
Lync: Skype Configuration	73
Lync: Linking Microsoft Account to Skype	75
Lync: Using Skype to Call Lync	77
Lync: Troubleshooting	79
Lync: Firewall Port Configuration.....	81
Reference Links	81
Next Steps.....	82

■ Chapter 3: Office 365 Planning and Purchase	83
Office 365 Subscription Plans	84
Planning and Purchase Chapter Structure	86
Pre-deployment.....	87
Step 1: Purchase Your Subscription(s)	89
Step 2: Choose Your Sign-On Method	91
Step 3: Collect Your Information	93
Step 4: Define Your Migration Plan and Schedule	95
Step 5: Microsoft Account and Organizational Account.....	101
Step 6: SkyDrive and SkyDrive Pro	102
Step 7: Windows Intune	103
Deployment	103
Step 1: Verify Your Environment.....	105
Step 2: Add Domain Name Service (DNS) Information.....	105
Step 3: Configure Lync.....	107
Step 4: Initial User Load.....	109
Step 5: Pilot/Test Group	110
Step 6: Inform Your Users	111
Step 7: Train Your Users.....	112
Step 8: E-mail Migration—Moving Historical E-mail (Migration) Options	112
Step 9: Set Up Workstations	113
Step 10: Configure External Devices	114
Step 11: Cutover	114
Post-deployment	114
Step 1: Hosted SharePoint Domain Name	115
Step 2: Hosted SharePoint Initial Configuration.....	115
Step 3: Hosted SharePoint Planning	115
Step 4: Hosted SharePoint Personal Sites	116
Step 5: Office 365 Hosted Web Site	116

Step 6: Exchange Online Protection.....	117
Step 7: Data Loss Prevention.....	117
Step 8: Compliance: eDiscovery, Search Center	117
Step 9: Cleanup	117
Summary.....	117
Reference Links	117
Next Steps.....	118
■ Chapter 4: Setup and Migration Guide.....	121
Configuring Office 365	125
Step 1: Validate Your Domain(s) to Microsoft.....	125
Step 2: Add Additional Domain Name Service (DNS) Information.....	133
Step 3: Configure Lync.....	137
Step 4: Install PowerShell.....	139
Step 5: Load Users and Assign Licenses	141
Step 6: Migrate E-mail	143
Step 7: Set Mail Flow.....	148
Step 8: Configure Desktop and Mobile devices	151
Step 9: Configure External Devices	153
Step 10: Cleanup	153
Final Check List.....	154
DNS Trouble Shooting.....	154
Onboarding Users	155
Bulk Loading Users through DirSync	156
Manually Bulk-Loading Users.....	157
Onboarding E-mail	162
PST Mail Migration to Office 365.....	162
Third Party tool – Migration Wiz	166
Office 365 Migration Tool.....	167

Outlook Manual Configuration	171
Step1: Run the PowerShell command to retrieve the ExchangeGuid	171
Step 2: Configuration of Outlook	171
Reference Links	178
Next steps	178
■Chapter 5: SharePoint Administration Guide	179
SharePoint Administration Chapter Structure	179
Introduction to Office 365 SharePoint	180
What is SharePoint?	181
What is SharePoint Not?	182
SharePoint Definitions	182
SharePoint Planning, Governance, and Initial Setup.....	184
Governance.....	185
SharePoint Administrators.....	186
Site Collection Administrator Permissions.....	188
Building Your SharePoint Structure	189
Design Your Site and Security Structure.....	189
Initial Site Collection: Top-Level Site.....	190
Gear Icon Options	190
Site Settings	191
Site Contents	194
Create the Site Structure Defined Above	195
Site Settings: Navigation	197
SharePoint Permissions and Groups	201
Permissions Basics and Groups	202
Permissions Inheritance	203
The Two Sides of Permissions: Sites and Groups	203
Permissions: Site Permissions	204
Permissions: People and Groups	212
Set Top Level Permissions to Read Only.....	218

Set Document Library Permissions	219
Set a Document’s Permissions.....	223
Setting Permissions for Your Company Example.....	226
Stop Inheriting Permissions.....	227
Check Company Permissions	229
Site Editing	231
Edit Your Site Page	231
Add an App	234
Edit Links: Edit the Top link Bar	236
Edit Links: Edit the Quick Links Bar	236
Create a Project Site.....	236
Step 1: Sign On to Your SharePoint Site	237
Step 2: Navigate to “Parent” of Where You Want to Create Your Project Site	237
Step 3: Create a Project Subsite	237
Step 4: Alter Your Site	239
Step 5: Save Your Project Site Template	240
Step 6: Clean Up Your Site and Add Apps as Appropriate	241
Step 7: Set Permissions.....	242
Step 8: Using Your Project Site	243
SharePoint Admin Center	250
SharePoint Admin Center.....	251
SharePoint Admin Center Site Collections Ribbon.....	253
SharePoint Admin Center Menus.....	262
Site Collection Settings: Site Collection Features.....	265
Site Settings: Site Features	268
Additional Administrator Concepts and Tools	272
Document Sets	272
Document Versioning.....	272
Workflows.....	272
Apps for SharePoint.....	272

SharePoint Designer 2013	273
PowerShell for SharePoint Online.....	273
Initial SharePoint Setup	273
Reference Links	274
Next Steps	275
■Chapter 6: Web Site Setup and Configuration.....	277
Office 365 Public Web Site	280
How Do You Make an Office 365 Web Site Visible?	281
Quick Tour of SharePoint Administration	282
Office 365 Integrated Web Editor	285
Getting Started on the Public Web Site.....	285
Page: Page History.....	289
Using the Site Control.....	290
Build Your Public Web Site in Eight Steps	290
Step 1: Collect the Content and Images for the Home and About Pages	291
Step 2: Browse to the Default Site and Select - Sign In	291
Step 3: Select Home Page and Edit to Change to Edit Controls.....	292
Step 4: Select Home Page, Then Configure Using the Site Controls	293
Step 5: Select the Footer Control and Create Your Footer	294
Step 6: Select “Edit Properties” in Site Control to Add Your Keywords.....	294
Step 7: Add Content	295
Step 8: Save the Web Site and Make It Public.	296
Adding PayPal Online Shopping	296
Adding PayPal HTML Code to an Existing Page.....	301
Installation of SharePoint Designer	306
Public Web Site and Domain Name Configuration.....	309
Step 1: Create the Public Web Site	310
Step 2: Validate the www Domain (or the Subdomain)	310
Step 3: Change the Domain to SharePoint Intent	311
Step 4: Change the Web Site Internal Name.....	311

Step 5: Look Up the DNS Name for the Web Site.....	312
Step 6: Update the DNS Information.....	313
Step 7: Make the Web Site Online.....	314
Last Thoughts—Office 365 Public Web Sites	316
Reference Links	317
Next Steps.....	318
■ Chapter 7: Office 365 – Windows Intune Administration Guide	319
Intune versus System Center	320
Windows Intune Purchase Process	322
Step 1: Purchasing Intune.....	322
Step 2 Linking Windows Intune to Office 365.....	323
Configuration of Windows Intune Administration Center.....	324
Windows Intune Policy Management.....	325
Step 1: Add Administrator Notification.....	326
Step 2: Configure Auto Updates.....	328
Step 3: Configure Agent Policies.....	332
Step 4: Configure Mobile Policies.....	338
Step 5: Configure Mobile Device DNS Enrollment	342
Step 6: Configure Firewall Policies	345
Step 7: Configure Intune Center Policies	346
Step 8: Deploy Users.....	348
Step 9: Linking users	349
Downloading Software from the Administration Center.....	351
Accessing Windows Intune as a User.....	354
Making a Bootable USB.....	356
Preparing the USB Memory Stick	358
Unpacking the ISO Software.....	358
Setting the UBS Memory Stick to be Bootable	359

Software Key Registration.....	359
Step 1: Retrieve the Key	359
Step 2: Assign an Intune License to the User	361
Step 3: Install the Key on the Local System	362
Reference Links	362
Next steps	363
■ Chapter 8: Office 365 Administration Guide Enterprise.....	365
Preparing to Administrate Office 365	368
Final Check List	368
Common Office 365 Administration Tasks.....	369
Office 365 Administration Center	371
Administrator Roles	372
Domains.....	375
Adding, Deleting and Restoring Users	377
Users: Renaming (no exchange mailbox).....	385
Adding/Changing Licenses	387
Security Groups	388
Bulk License Assignments.....	390
Delegated Administrators	391
Yammer	392
Exchange Administration Center	393
Exchange Administration Roles	394
Default User Role Defined.....	396
Conference Room: Configuration	399
Conference Room: PowerShell Modification.....	401
Changing a User's Name / Changing an Email Address	401
Adding an Alias Email Address to a User	403
Changing a User Email Account Primary Domain.....	404
Adding Shared Mailbox.....	406
Adding a Distribution Group.....	408
Using Alias to Send/Receive from Email.....	410

Smartphone Management from Exchange	415
Troubleshooting: Autodiscover	416
Lync Administration	418
Setting up Lync Federation	419
Configuration for Conferencing Add-on	419
Using PowerShell	420
PowerShell: Using the Standard Header	422
Reference Links	427
Next Steps	427
■Chapter 9: Office 365 Compliance and Data Loss Prevention.....	429
Overview of Office 365 Compliance and Discovery.....	429
Compliance Settings.....	430
Data Governance Concepts	431
Setting Up Office 365 Compliance, Discovery, and Retention Policy	440
Compliance Setup.....	441
Discovery Site Setup	442
Retention Policy Setup.....	442
Compliance Example	442
Step 1: Select the Compliance Policy	443
Step 2: Define the Users Who Will Manage the Compliance Roles	446
Step 3: Enable Encryption	447
Step 4: Enable Audit (Optional)	449
Step 5: Test the Compliance Policy with Tool Tips	449
Step 6: Enforce the Compliance Policy.....	450
Discovery Site Example.....	451
Step 1: Define the Business Policy for Search.....	451
Step 2: Enable Auditing.....	451
Step 3: Identify Who Will Perform the Discovery and Review Functions	452
Step 4: Enabling In-Place Hold (or Legal Hold) for Immutability.....	453
Step 5: Compliance and Discovery: Using the eDiscovery Search Tool	454

Step 6: Case-Creation Process	455
Step 7: Building the Search Query.....	456
Step 8: Review the Information	459
Step 9: Export the Data for Review in Outlook.....	462
Retention Example	464
Step 1: Determining the Retention Policy—Four Questions.....	466
Step 2: Create a New Test Policy	467
Step 3: Modify the Test Policy.....	469
Discovery Search Using Advance Query Strings (AQS).....	477
Sample AQS Query for Financial Review	477
Creating and Exporting Discovery Mailboxes.....	477
Creating and Accessing Discovery Mailboxes	477
Exporting Information from Discovery Mailboxes.....	478
Reference Links	480
Next Steps.....	481
■ Chapter 10: Office 365 Exchange Online Protection Administration Guide	483
How EOP Works.....	484
Getting Started with EOP: Hybrid or Standalone	487
Best Practices for EOP Management.....	487
Steps to Set Up EOP for the First Time	487
Modification of Spam Processing.....	497
Malware Filter Changes.....	500
Connection Filter	501
Outbound Spam Policy.....	510
Sending E-mail from a Device to Office 365	511
Preparing Office 365 to Act as an SMTP Relay	512
Configuring the Device to Send to Office 365.....	515
Reference Links	542
Next Steps.....	542

Chapter 11: Office 365 DirSync, ADFS, Single Sign On and Exchange Federation	545
No Integration.....	546
Directory Sync with local AD to Office 365.....	546
Federate AD to Office 365.....	548
Federate Exchange to Office 365.....	548
Next Steps	548
Steps to Implement AD Sync, Single Sign On and Exchange Federation	549
Step 1: Verify Active Directory – Exchange Server Status.....	549
Step 2: Installation of the 3.5 .NET Framework and 4.0 .NET Framework.....	551
Step 3: Create the Admin Accounts	552
Step 4: Clean Up Active Directory	552
Step 5: Optional - Extended Active Directory	553
Step 6: Install Directory Synchronization.....	554
Step 7: Installation of the Directory Sync Tool	562
Step 8: Verify Active Directory	564
Installing Active Directory Federation Services.....	565
Step 1: Install Active Directory Federation Services.....	565
Step 2: Adding Federation Proxy servers.....	580
Step 3: Federation - Exchange 2010 Integration	585
Step 4: Mail Flow – Decide on how mail will route	589
Step 5: Compliance – What is your email and document retention policy	591
Step 6: Federation – Implementing Exchange Server (2010)	593
Step 7: Post Federation Testing	609
Change the MX records	609
Troubleshooting.....	610
Active Directory Readiness Check.....	610
DirSync: Installation error – Missing Online service Sign in.....	618
DirSync: Required Active Directory User fields.....	619
DirSync: Adding email Proxy Addresses	620
DirSync: Using PowerShell Licensing Scripts.....	622
ADFS – Remote Connectivity Analyzer	623

ADFS: Database Error	623
ADFS: Hybrid Federation Certificate Problems	626
ADFS: Single Sign On (SSO) User experience	627
Reference Links	628
Next steps	630
■ Glossary.....	631
Index.....	637
