

K. Linkwitz / U. Hangleiter (Eds.)
Universität Stuttgart

HIGH PRECISION NAVIGATION 95

Proceedings of the 3rd International Workshop
on High Precision Navigation
University of Stuttgart
April 1995

Organized by
Sonderforschungsbereich 228,
sponsored by
Deutsche Forschungsgemeinschaft (DFG)

Mit 275 Abbildungen.
Dümmerbuch 7843

Contents

1. General Aspects

M. Mehring	
Navigation is the Destination	3
Ph. Hartl	
Satellite Navigation – State and Perspectives	17
K. Linkwitz	
Integration Aspects (Abstract).....	25

2. Advanced Physics for Navigation

S. Appelt, G. Wäckerle, M. Mehring	
Geometric Effects in NMR Gyroscopes	29
E. W. Grafarend	
Satellite-Aided Positioning in Geometry and Gravity Space.....	37
T. Hartmann, M. Soffel	
Contribution to Geodetic Reference Frames: High Precision Nutation of the Earth from Tidal Developments	45
A. Pines	
Berry's Phase: Gauge Kinematics of Spins and Cats (Abstract).....	52
V.S. Schwarze	
Contributions to Geodetic Reference Frames: Definition of Geodetic Observables in Curved Space-Time	53
H.-D. Staiber, S. Appelt, R. Butscher, G. Wäckerle, M. Mehring	
Realization of a Two-Nuclei NMR Gyroscope.....	62
D.S. Theiss	
Post-Newtonian Satellite Orbits, Earth-Fixed Reference Frames and a Relativistic Description of Multipole Moments.....	70
G. Wäckerle, M. Mehring, H. Sorg	
Principles and Operation of the Stuttgart NMR Gyroscope	78

3. GPS: Kinematic Positioning and Attitude Determination

D. Becker, K.H. Thiel	
Determination of Multipath Errors by Means of a GPS Attitude Platform	89

W. Bertiger, T.P. Yunck, K. Gold, J. Guinn, A. Reichert, M. Watkins High Precision and Real Time Tracking of Low Earth Orbiters with GPS: Case Studies with TOPEX/POSEIDON and EUVE	97
C.E. Cohen, D.G. Lawrence, B.S. Pervan, H.S. Cobb, J.D. Powell, B.W. Parkinson High Performance Navigation Using Integrity Beacon Pseudolites	108
M. Cramer An Accuracy Investigation of Airborne Kinematic Attitude Determination with GPS for Sensor Orientation	117
H.-J. Euler GPS Attitude Determination: Utilizing Auxiliary Information to Obtain Improved Results	126
Y. Feng, K. Kubik Real-Time Decimetre-Level GPS Positioning without Ambiguity Resolution	133
A. Mathes Contribution of GPS to Integrated Navigation Systems	138
4. INS/GPS: Modelling and Non-Standard Applications	
J.H. Dambeck Observability and Controllability Analysis for a Strapdown Inertial Navigation System	149
S. Dmitriev, B. Rivkin, S. Shepel, K. Linkwitz A New Simulation Program for Evaluation of the Inertial Geodetic Systems Potential Accuracy	159
M. Feistritzer GPS-INS-Leveling (Abstract)	167
U. Mangold Rate Bias Inertial Navigation System Augmented by DGPS: To what Extent is Vector Gravimetry possible?	169
V. Peshekhonov, V. Vasilyev, V. Zinenko Measuring Vertical Deflection in Ocean Combining GPS, INS and Star Trackers	180
R. Petzoldt Calibration of a Strapdown INS by Measurements in 24 Faces	186

P.K. Plotnikov, V.B. Nikishin, A.A. Skripkin Functioning Algorithms Development of Gyro Aircraft Attitude Control System	194
K.P. Schwarz and M. Wei Modelling INS/GPS for Attitude and Gravity Applications	200
5. Sensor Integration for Airborne and Related Measurements	
M. Bäumker and H.P. Fitzen Kinematic Positioning with Combined Inertial and GPS Measurements	221
H. Brünger, D. Kayser, D. Martens, M. Bitzer, M. Schürmann Sensor Integration for Airborne Meteorological Measurements	232
I. Colomina, J. Talaya, X. Baulies The N.O.S.A. Project and Concept for Sensor Orientation	239
D. Fritsch Airborne DTM-Acquisition: From Field to Finish	247
G.W. Hein, B. Eissfeller, J. Pielmeier Developments in Airborne 'High Precision' Digital Photo Flight Navigation in 'Realtime'	255
Ch. Hug and U. Kälberer Autonomous 3-D Topography Survey with the Airborne Terrain Survey System	265
Ch. Hug The Scanning Laser Altimeter: Results and Evaluation of the 1994 Test Flight Campaign	277
U. Kälberer An Airborne Microwave Altimeter for Topographic Mapping—Campaigns and Results	285
K. Kubik A Motion Compensation System for the INGARA Radar System	293
W. Lechner, P. Lohmann Airborne Photogrammetry Based on Integrated DGPS/INS Navigation	303

W. Söhne and O. Heinze	Precise Positioning with INS and GPS in Land Vehicle and Flight Application	311
K.K. Vorbrich	The Real-Time Positioning with DGPS/IMU for Navigation Applications in Poland	318
6. Analysis and Interpretation of Image Data		
E.D. Dickmanns	Road Vehicle Eyes for High Precision Navigation	329
P. Fua	Surface Reconstruction Using 3-D Meshes and Particle Systems	337
C. Glock, C. Steger	Multi-Resolution Road Extraction from Aerial Images (Abstract)	349
N. Haala	Building Recognition by Combination of Image Data and Height Data	351
J. Kilian	DEM-Matching as Evaluation Method for Laser Scanner Measurements	359
Y. Pan	Texture Segmentation Using Two-Dimensional Causal Autoregressive Model	367
M. Sandler, E.D. Gilles	Processing of Laser Scanner Images for High Precision Navigation on Canals	375
D. Schmidt	Object-Oriented Techniques for Total Integration of Digital Terrain Models in GIS	384
M. Sester	Learning Relations for Image Interpretation	392
P.C. Weckesser	Precise Navigation of a Mobile Robot in Difficult Environmental Conditions	403

7. Vehicle Navigation and Guidance

St. Baten, N. Müller Navigation with an Autonomous Vehicle on Arbitrary Roads	415
P. A. Cross and A.N. Ramjattan A Kalman Filter Model for an Integrated Land Vehicle Navigation System.....	423
E.-N. Dietz, H.-J. Mönckie, F. Schäuble, R. Zimmermann To Realize a Construction Machine Guidance Exemplary with a Road Paver	435
M. Faul, E.D. Gilles DGPS Using the Radio Data System.....	443
O. Glaser, W. Kailbach Airport Movement Control and Management: An Example for Precision Navigation in Aviation Applications	453
M. Hahn Passive Navigation Using Image Sequences.....	464
J. Kusche On Vehicle's Kinematics in 3-Dimensional Space	471
P. Levi, M. Sommerau, Th. Bräunl Remote Vehicle Navigation by Parallel Algorithms	479
D. Reichardt, F. Stein, B. Ulmer VITA II – Active Collision Avoidance in Real Traffic	487
M. Sandler, M. Faul, U. Kabatek, A. Wahl, E.D. Gilles Integrated Navigation on Inland and Coastal Waterways	494
J. Speckels and K. Möhlenkamp Autonomous Aircraft Taxi Guidance Using GNSS Phase Measurement.....	505

8. Applications in Engineering

M. V. Chichinadze, A. P. Sapozhnikov Remote Checking and Control System for Drilling Oil and Gas Wells of Complicated Profile	515
E. Dalhoff, E. Fischer, S. Heim, H.J. Tiziani High Precision Absolute Ranging with Heterodyne Interferometry for Close Range Applications.....	521

E. Fischer, E. Dalhoff, S. Heim, H.J. Tiziani High Precision Absolute Interferometry up to 100 m	530
J. Fritschi Components of a Target Tracking System for Construction Machine Guidance	539
G.W. Hein and B. Riedl A High-Precision Real-Time DGPS Deformation Monitoring System	547
H. Heister, W. Caspary, Chr. Hock, J. Klemm, H. Sternberg KiSS a Hybride Measuring System for Kinematic Surveying	561
Chr. Hock, W. Caspary, H. Heister, J. Klemm, H. Sternberg Architecture and Design of the Kinematic Survey System KiSS	569
U. Hofbauer, E. Dalhoff, E. Fischer, S. Heim, H.J. Tiziani Dual Wavelength Heterodyne Interferometer Based on Coupled Laser Diodes for μm -Resolution	577
H. Janocha, E.L.v. Hintüber, B. Diewald, R. Godding Photogrammetrically Aided Inertial Measurement System for Static and Dynamic Measurement and Calibration of Industrial Robots	586
K. Novak Integrated Sensor System for Terrestrial Photogrammetry (Abstract)	596
I. Popova, Y. Vlasov, A. Semionov, H.M. Braun Precise Gyro Systems for Focal Line Stabilisation	598
List of Authors	609
