CONTENTS

Preface 1

Splines on S^2 for Small Latitudes
A. Arteaga Iriarte, L. Hernández Encinas, and J. Muñoz Masqué 3

The Algebraic Multilevel Iteration Methods - Theory and Applications
O. Axelsson and M. Neytcheva 13

The Algebraic Analysis of Incomplete Factorization Preconditionings
R. Beauwens 25

Numerical Computation of Incompressible Flows
C.-H. Bruneau 35

Some Applications of the Euclidean Algorithm
A. Bultheel and M. Van Barel 45

Best Approximation in Reproducing Kernel Hilbert Spaces
D.W. Byun and S. Saitoh 55

Chebyshev Spectral Solution of the Burgers Equation with High Wavenumbers
H. Dang-Vu and C. Delcarte 63

Padé Approximation and Numerical Inversion of the Laplace Transform
P. González-Vera and R. Orive 73

On a Class of Singularly Perturbed Boundary Value Problems for which an Adaptive Mesh Technique is Necessary
P.W. Hemker and G.I. Shishkin 83

Some Robust Methods for Nonlinear Parameter Estimation
D. Hermey and G.A. Watson 93

Interpolation of Function Spaces and the Convergence Rate Estimates for the Finite Difference Schemes
B.S. Jovanovi 103

Real Zeros of Holomorphic Functions with Parameters
J. Kajiwara 113

Optimal Partitioning in Univariate and Multivariate Approximation
G. Meinardus 123

Asymptotic Behavior of Blow-Up Solutions of the Nonlinear Schrödinger Equation with Critical Power Nonlinearity
H. Nawa 133

Approximation by Univariate and Bivariate Splines
G. Nürnberger 143

Parallelizable PCG Methods for the Cray Y-MP and the TMC CM-2
T.C. Oppe, W.H. Holter, and I.M. Navon 155

Stability of Finite Difference Formulas for Linear Parabolic Equations
O. Østerby 165

Nonlinear Splines in Convex and S-Convex Interpolation
J.W. Schmidt 177

A Family of Four-Step Exponential Fitted Predictor-Corrector Methods for the Numerical Integration of the Schrödinger Equation
T.E. Simos and G.V. Mitsou 187
