COMPSTAT

Proceedings in
Computational Statistics

12th Symposium held
in Barcelona,
Spain, 1996

Edited by
Albert Prat

With 95 Figures

UNIVERSITÄTSBIBLIOTHEK

Contents

Part I Keynote Papers

Scientific Statistics, Teaching, Learning and the Computer 3
George Box

Trends in the Information Technologies Markets - The Future 11
Angel G. Jordan

Part II Invited Papers

Robust Procedures for Regression Models with ARIMA Errors 27
A.M. Bianco, M. Garcia Ben, E.J. Martinez and V.J. Yohai

Functional Imaging Analysis Software-Computational Olio 39
William F.Eddy,Mark Fitzgerald,Christopher Genovese,
Audris Mockus,Douglas C.Noll

Automatic Modelling of Daily Series of Economic Activity 51
Antoni Espasa, J.Manuel Revuelta and J.Ramón Cancelo

New Methods for Quantitative Analysis of Short-Term
Economic Activity 65
Víctor Gómez and Agustín Maravall

Classification and Computers: Shifting the Focus 77
David J.Hand

Image Processing, Markov Chain Approach 89
Martin Janzura

A Study of E-optimal Designs for Polynominal Regression 101
V.B. Melas

From Fourier to Wavelet Analysis of Time Series 111
Pedro A. Morettin

Profile Methods 123
C. Ritter and D.M.Bates

A New Generation of a Statistical Computing Environment on the Net 135
Swetlana Schmelzer, Thomas Kötter, Sigbert Klinke and Wolfgang Härdle

On Multidimensional Nonparametric Regression 149
Phillipe Vieu, Laurent Pelegrina and Pascal Sarda

Part III Contributed Papers

Parallel Model Selection in Logistic Regression Analysis 163
H. J. Adèr, Joop Kuik and H.A. van Rossum

On a Weighted Principal Component Model to Forecast a Continuous Time Series 169
A.M. Aguilera, F.A. Ocaña and M.J. Valderrama

Exact Iterative Computation of the Multivariate Minimum Volume Ellipsoid Estimator with a Branch and Bound Algorithm 175
José Agulló Candela

Automatic Segmentation by Decision Trees 181
Tomàs Aluja-Banet, Eduard Nafria

Karhunen-Loève and Wavelet Approximations to the Inverse Problem 187
J.M. Angulo and M.D. Ruiz-Medina

Bootstrapping Uncertainty in Image Analysis 193
Graeme Archer and Karen Chan

BASS: Bayesian Analyzer of Event Sequences 199
E. Arjas, H. Mannila, M. Salmenkivi, R. Suramo, H. Toivonen

Assessing Sample Variability in the Visualization Techniques Related to Principal Component Analysis: Bootstrap and Alternative Simulation Methods 205
Frederic Chateau, Ludovic Lebart

A Fast Algorithm for Robust Principal Components Based on Projection Pursuit 211
C. Croux and A. Ruiz-Gazen

Hybrid System: Neural Networks and Genetic Algorithms Applied in Nonlinear Regression and Time Series Forecasting 217
A. Delgado, L. Puigjaner, K. Sanjeevan and I. Solé

Do Parametric Yield Estimates Beat Monte Carlo? 223
Dee Denteneer and Ludolf Meester

Testing Convexity 229
Cheikh A.T. Diack

Zonoid Data Depth:Theory and Computation 235
Rainer Dyckerhoff, Gleb Koshevoy and Karl Mosler

PADOX, A Personal Assistant for Experimental Design 241
Ernest Edmonds, Jesús Lorés, Josep Maria Catot, Georgios Illiadis, Assumpció Folguera

Computing M-estimates 247
Håkan Ekblom and Hans Bruun Nielsen

Survival Analysis with Measurement Error on Covariates 253
Anna Espinal-Berenguer and Albert Satorra

Partial Imputation Method in the EM Algorithm 259
Z. Geng, Ch. Asano, M. Ichimura, F. Tao, K. Wan and M. Kuroda

On the Uses and Costs of Rule-Based Classification 265
Karina Gibert

Small Sequential Designs that Stay Close to a Target 271
Josep Ginebra

Statistical Classification Methods for Protein Fold Class Prediction 277
Janet Grassmann and Lutz Edler

Restoration of Blurred Images when Blur is Incompletely Specified 283
Alison J.Gray and Karen P.-S. Chan

Loglinear Random Effect Models for Capture-Recapture Assessment of Completeness of Registration 289
D. Gregori, L. Di Consiglio and P. Peruzzo

Estimation of First Contact Distribution Functions for Spatial Patterns in S-PLUS 295
Martin B. Hansen

Barcharts and Class Characterization with Taxonomic Qualitative Variables 301
Georges Hebrail and Jane-Elise Tanzy

Prediction of Failure Events when No Failures have Occurred 307
Stephen P. Jones

Generalising Regression and Discriminant Analysis: Catastrophe Models for Plasma Confinement and Threshold Data 313
O.J.W.F. Kardaun, A. Kus, H- and L-mode Database Working Group

Parallel Strategies for Estimating the Parameters of a Modified Regression Model on a SIMD Array Processor 319
Erricos J. Kontoghiorghes, Maurice Clint and Elias Dinenis

Stochastic Algorithms in Estimating Regression Models 325
Ivan Krivý and Josef Tvrdík

Generalized Nonlinear Models 331
Peter W. Lane

The Use of Statistical Methods for Operational and Strategic Forecasting in European Industry 337
R. Lewandowski, I. Solé, J.M.Catot and J.Lorés

Bayesian Analysis for Likelihood-Based Nonparametric Regression 343
A. Linka, J.Picek and P.Volf

Calculating the Exact Characteristics of Truncated Sequential Probability Ratio Tests Using Mathematica 349
James Lynn

How to Find Suitable Parametric Models Using Genetic Algorithms. Application to Feedforward Neural Networks 355
M. Mangeas and C. Muller

Some Computational Aspects of Exact Maximum Likelihood Estimation of Time Series Models 361
José Alberto Mauricio

Estimation After Model Building: A First Step 367
Alan J. Miller

Logistic Classification Trees 373
Francesco Mola, Jan Klaschka, Roberta Siciliano

Computing High Breakdown Point Estimators for Planned Experiments and for Models with Qualitative Factors 379
Christine H.Müller

Posterior Simulation for Feed Forward Neural Network Models 385
Peter Müller and David Rios Insua

Bivariate Survival Data Under Censoring: Simulation Procedure for Group Sequential Boundaries 391
Sergio R. Muñoz, Shrikant I. Bangdiwala and Pranab K. Sen

The Wavelet Transform in Multivariate Data Analysis 397
F.Murtagh, A.Aussem and O.J.W.F.Kardaun

"Replication-free" Optimal Designs in Regression Analysis 403
Dieter A.M.K.Rasch

STEPS Towards Statistics 411
Edwin J. Redfern

File Grafting: a Data Sets Communication Tool 417
Roser Rius, Ramon Nonell and Tomàs Aluja-Banet

Projections on Convex Cones with Applications in Statistics 423
Egmar Rödel

Partial Correlation Coefficient Comparison in Graphical Gaussian Models 429
A. Roverato

The Robustness of Cross-over Designs to Error Mis-specification 435
K.G. Russell, J.E. Bost, S.M. Lewis and A.M. Dean

ISODEPTH: a Program for Depth Contours 441
J. Ruts and P.J.Rousseeuw

Non Parametric Control Charts for Sequential Process 447
Germana Scepi and Antonio Acconcia

An Iterative Projection Algorithm and Some Simulation Results 453
Michael G. Schimek

Computational Asymptotics 459
G.U.H. Seeber

An Algorithm for Detecting the Number of Knots in Non Linear Principal Component Analysis 465
Gerarda Tessitore and Simona Balbi

Generation and Investigation of Multivariate Distributions Having Fixed Discrete Marginals 471
E.-M. Tiit and E. Käärik

A Simulation Framework for Re-estimation of Parameters in a Population Model for Application to a Particular Locality 477
Verena M. Trenkel, David A. Elston and Stephen T. Buckland

A Semi-Fuzzy Partition Algorithm 483
Rosanna Verde and Domenica Matranga

Estimation in Two - Sample Nonproportional Hazards Models in Clinical Trials by an Algorithmic Method 489
Filia Vonta

How to Obtain Efficient Exact Designs from Optimal Approximate Designs 495
Adalbert Wilhelm

Papers Classified by Topics 501
