Contents

Invited Papers

- On Building a Planning Tool Box, *J. Hertzberg* 3
 Five Years of Tractable Planning, *C. Bäckström* 19

Search Spaces

- Passive and Active Decision Postponement in Plan Generation, *D. Joslin* and
M.E. Pollack 37
 Selectively Delaying Linking Commitments in Partial-Order Planners, *R.S. de Silva* 49
 Universal Classical Planner: An Algorithm for Unifying State-Space and Plan-Space
 Planning, *S. Kambhampati* and *B. Srivastava* 61

Incremental Planning and Execution

- Incremental Planning, *P. Jonsson* and *C. Bäckström* 79
 Incremental Abstraction Planning for Limited-Time Situations, *R. Washington* and
B. Hayes-Roth 91
 User-Guided Interleaving of Planning and Execution, *P. Stone* and *M. Veloso* 103

Search Control

- Learning Search Control Rules for Plan-Space Planners: Factors Affecting the Per-
 formance, *Yong Qu* and *S. Kambhampati* 115
 Hybrid Learning of Search Control for Partial-Order Planning, *T.A. Estlin* and
R.J. Mooney 129
 Using Temporal Logic to Control Search in a Forward Chaining Planner, *F. Bacchus*
 and *F. Kabanza* 141

Probabilistic Planning

- Planning under Uncertainty: Structural Assumptions and Computational Leverage,
C. Boutilier, *T. Dean* and *S. Hanks* 157
 The Footprint Principle for Heuristics for Probabilistic Planners, *J. Blythe* 173
 Generating Optimal Policies for High-Level Plans with Conditional Branches and
 Loops, *Shieu-Hong Lin* and *T. Dean* 187

Abstraction, Hierarchisation and Compiling

- A Framework for Automatic Abstraction, *A. Unruh*, *R. Washington* and
P. Rosenbloom 203
 Hierarchisation of the Search Space in Temporal Planning, *F. Garcia* and *P. Laborie* 217
 Planning Speed-up via Domain Model Compilation, *T.L. McCluskey* and
J.M. Porteous 233

Architectures

O-Plan: A Situated Planning Agent, <i>B. Drabble</i> and <i>A. Tate</i>	247
Formalizing the PRODIGY Planning Algorithm, <i>E. Fink</i> and <i>M. Veloso</i>	261
An Interactive Planning Architecture, <i>A. Perini</i> and <i>F. Ricci</i>	273

Practical and Algorithmic Complexities

Why Real-World Planning is Difficult: A Tale of Two Applications, <i>S. Chien</i> , <i>R. Hill Jr.</i> , <i>XueMei Wang</i> , <i>T. Estlin</i> , <i>K. Fayyad</i> and <i>H. Mortenson</i>	287
Computational Complexity of Manufacturing Process Planning, <i>T. Kis</i> and <i>J. Váncza</i>	299
Tractable Planning for an Assembly Line, <i>I. Klein</i> , <i>P. Jonsson</i> and <i>C. Bäckström</i>	313

Situations and States

Situated Control Rules as Approximate Plans: A PAC-Based Theory, <i>Qiang Yang</i> and <i>P.W.L. Fong</i>	327
DDL.1: A Formal Description of a Constraint Representation Language for Physical Domains, <i>A. Cesta</i> and <i>A. Oddi</i>	341
Constructing Action Graphs for Planning, <i>C. Pain-Barre</i> and <i>C. Schwind</i>	353

Seeing and Learning

The Multimission VICAR Planner: A Fielded Planning System for Scientific Data Analysis, <i>S.A. Chien</i> and <i>H.B. Mortensen</i>	371
Learning to Guide a Robot via Perceptions, <i>A. Rieger</i>	383
An Explanation-Based Approach to Improve Retrieval in Case-Based Planning, <i>L. Ihrig</i> and <i>S. Kambhampati</i>	395
Author Index	407
