Workshop Proceedings

First European Workshop on Global Engineering Networking

organized by GLENnet e.V.

February 26–27, 1996
C-Lab and Heinz Nixdorf Institut
Paderborn, Germany

TOC

UB/TIB Hannover 89
118 858 793

Workshop Program

Opening and Introduction

R. Mackay, CEC DG III
Information Society and EU Policy

U. Rethfeld, GLENnet e.V.
GEN Vision and Major Concepts 1

H.D.Peemöller, get consulting
End-User View on GEN 7

A: Industrial Requirements and Benefits

Chair: P. Kesteloot, WTCM

P. Kesteloot, WTCM
GEN Engineering in Practice 17

V. Salminen, FIMET
External and Internal Resource and Network Management of Process Plant Realization 23

H. Meerkamm, University of Erlangen-Nürnberg
Design for X - the Interferences between Product and Process - a Potential for Engineering Network 29

B: Electronic Publishing for Engineering

Chair: I. Faux, SNI-Cambridge 43

S. Lewandowski, CADBAS
Digital Catalogues for Mechanical CAD 47

S. Napier, Technical Indexes
Catalogues and Standarts in Electronic Form - The Options 53

H. Birkhofer, TH Darmstadt
Providing Supplier Information on the Datahighway - Virtual Marketplaces and Product Catalogues 57

C: Human Aspects of Teleengineering and Networking

Chair: T. Frank, HNI 65

R. Keil-Slawik, HNI
Design of User - Interfaces for Teleengineering Applications

V. Sandoval, Ecole Centrale Paris
Some Human Aspects of Teleengineering and Networking 67

J. Wagner, FhG-IAO
Human and Organizational Aspects of Teleengineering 73

D: Business Strategies and Models
Chair: A. Sauer, SNI 79

P. Thorne, Cambashi
Market Analysis as a Basis for Business Models 81

H.G. Thonemann, SNI
The GEN Business Model 89

G.R. Koch, ESI
The Global Software Enterprise 97

E: Architecture, Networks, Services and Applications
Chair: F. Rammig, University of Paderborn 103

L. Seifert, HNI
The GEN Basic Toolkit 105

B. Neumann, University of Hamburg
Towards Standardized Knowledge Representation for Engineering Applications

K.D. Lewke, Orga Kartensysteme
How to Build up a Powerful but Secure Network

F: Engineering in the Virtual Enterprise
Chair: F.J. Stewing, Cadlab 121

G. v.d.Broek, Philips
Aspects of Distributed Engineering 127

D. Schefström, CDT
WebDesk - Collaboration Support in MATES 131

W. Doster, Daimler Benz
Telecooperation - Global Teleteam 155
