

Jörg Wallaschek
Joachim Lückel
Walter Littmann (Editors)

Mechatronics
and Advanced Motion Control

Proceedings of
3rd International
Heinz Nixdorf Symposium

May 1999, Paderborn

Contents

Preface	9
---------------	---

Parallel Mechanisms

E. Kallenbach, E. Saffert, Chr. Schäffel <i>Multi-coordinate Drive Systems - Opportunities and Limits</i>	11
--	----

K.-H. Wurst <i>Design and Construction of Machine Tools with Parallel Mechanism on the Base of Mechatronical Components</i>	25
--	----

W. Kuhlbusch, J. Lückel, W. Moritz, S. Toepper <i>Mechatronic Design of the New TRIPLANAR Machine for Highly Precise Process- and Measurement Tasks</i>	45
--	----

Dynamics and Control

P. Maißer, U. Jungnickel <i>Lyapunov-stable Position Control of Constrained Multibody Systems</i>	61
--	----

H. Mann <i>Modular Approach to Lagrange's Formalism for Mechatronic Systems</i>	67
--	----

H. Henrichfreise, S. Oedekoven, M. Pähle <i>An Approach to the Development of an Optimum Manipulator as a Mechatronic System</i>	81
---	----

Piezoelectric Ultrasonic Motors

O. Yu. Zharii <i>Ultrasonic Motor, Wave Gyro and a Snake - What Do They Have in Common?</i>	97
--	----

M. K. Kurosawa, T. Higuchi <i>Surface Acoustic Wave Linear Motor</i>	113
---	-----

J. F. Manceau, S. Biwersi, J. Scortesse, S. Basrouf, F. Bastien <i>Silicone Piezo Micromotor</i>	119
---	-----

J. Maas, T. Schulte, H. Grotstollen, N. Fröhleke <i>Model-Based Control of Travelling Wave Type Ultrasonic Motors</i>	129
--	-----

Electromechanical Actuators

D. Söffker, S. Seelecke

Shape Memory Alloy Actuators -

Thermomechanical Modeling and Control Aspects 145

G. Pritschow, C. Eppler

Adaptive Control Strategies for Precision Gearboxes

in an Integrated Drive System 161

Product Design and Software Technology

J. Gausemeier, M. Flath, B. Riepe

Strategic Planning and Conceptual Design of Mechatronic Products 177

H. Grabowski, S. Rude, M. Huang

Mechatronic Product Design Based on an Integrated Product Model 193

B. Kleinjohann, F.J. Rammig, B.-H. Schmidtfranz, W. Schröder-Preikschat,

C. Stolpe, P. Wältermann,

Parallel Computing for the Design and the Implementation of Mechatronic Systems:

Lessons Learned from the METRO Project 205

R. Kasper, W. Koch

An Innovative Mechatronic Design Environment

Based on COM Technology and ActiveX 225

Vehicle System Dynamics

A. Ams, W. V. Wedig

Sine Sweep Accelerations by Digitally Controlled Hydraulic Test Facilities 241

G.-P. Ostermeyer

A Real-Time Driver Model on a Miniature Demonstrator 255

H. Hennen, A. Pruckner

Formation of a Software Rapid-Prototyping Platform 269

Hydraulic Actuators

M. Garstenauer, R. Scheidl

*Fast Hydraulic Switching Valves - Key Components for the Introduction
of Switching Techniques in Oil-Hydraulic Drives* 281

J. Bormann, H. Ulbrich, C. Abicht

*Theory and Application of an Innovative Hydraulic Actuator
for Active Vibration Isolations* 295

Railway Systems

D. Söffker

*Observer-based Measurement of Contact Forces of the Nonlinear
Rail-wheel Contact as a Base for Advanced Traction Control* 305

A. Veitl

Integrated Design of Mechatronic Components for Controlled Pantographs 321

S. Goldschmidt, J. Wallaschek

*“Paderborn Rapid”: Modelling and Design
of an Active Steering System for the Bogie* 333

Contact 353
