

# **Sea level variability and its role for coastal flood risk in the southeastern North Sea**

**Insights into past, present and future sea level changes**

Vom Department für Bauingenieurwesen der Naturwissenschaftlich-Technischen Fakultät  
der Universität Siegen angenommene

## **Dissertation**

zur Erlangung des akademischen Grades

Doktor der Ingenieurwissenschaften (Dr.-Ing.)

von

**Dipl.-Ing. Sönke Dangendorf**

Referent: **Univ-Prof. Dr.-Ing. Jürgen Jensen**  
Universität Siegen

Koreferent: **Prof. Dr. Hans von Storch**  
Helmholtz-Zentrum Geesthacht

Tag der Einreichung: 05.06.2014

Tag der mündlichen Prüfung: 05.09.2014

# Content

<b>1</b>	<b>INTRODUCTION</b>	<b>1</b>
1.1	Regional and global sea level: how it is measured and determined	3
1.2	Processes behind sea level variations	6
1.3	Geographic and hydrographic properties of the North Sea	10
1.4	Objectives and outline of the thesis	12
<b>2</b>	<b>MSL VARIABILITY AND INFLUENCE OF THE NAO ON LONG-TERM TRENDS IN THE GERMAN BIGHT</b>	<b>16</b>
2.1	Abstract	16
2.2	Introduction	16
2.3	Data	18
2.3.1	Sea level data	19
2.3.2	NAO data	19
2.4	Methods	21
2.4.1	Calculating the seasonal cycle	21
2.4.2	Amplitudes of the seasonal cycle	21
2.4.3	Inter-annual changes in monthly MSL	22
2.4.4	The influence of the NAO on MSL	22
2.5	Results	23
2.5.1	The seasonal MSL cycle	23
2.5.2	Annual amplitudes of the seasonal cycle	26
2.5.3	Inter-annual MSL changes	27
2.5.4	Relationship between the NAO and MSL	28
2.6	Discussion	32
2.7	Conclusions	37
<b>3</b>	<b>CHARACTERISTICS OF INTRA-, INTER-ANNUAL AND DECADEAL SEA LEVEL VARIABILITY AND THE ROLE OF ATMOSPHERIC FORCING: THE LONG RECORD OF CUXHAVEN</b>	<b>39</b>
3.1	Abstract	39
3.2	Introduction	39
3.3	Data and methods	42
3.4	Results	46
3.4.1	Observed seasonal MSL variations	46
3.4.2	Meteorological forcing of seasonal MSL	47
3.4.2.1	Correlation analysis	47

3.4.2.2	Regression analysis	49
3.4.2.3	Model validation	52
3.4.2.4	Meteorologically corrected MSL variations	54
3.4.3	Meteorological forcing on inter-annual and decadal time scales	54
3.4.4	The effect of SE reduction	56
3.5	Conclusions	58
<b>4</b>	<b>MSL VARIABILITY IN THE NORTH SEA: PROCESSES AND IMPLICATIONS</b>	<b>60</b>
4.1	Abstract	60
4.2	Introduction	60
4.3	Data and Methods	63
4.3.1	Data	63
4.3.2	Methods	66
4.4	Results	70
4.4.1	The atmospheric contribution	70
4.4.2	Steric height	75
4.4.3	Remote forcing	76
4.4.4	Implications for the estimation of linear trends and acceleration patterns	80
4.5	Conclusions	83
<b>5</b>	<b>A NEW ATMOSPHERIC PROXY FOR SEA LEVEL VARIABILITY IN THE SOUTHEASTERN NORTH SEA: OBSERVATIONS AND FUTURE ENSEMBLE PROJECTIONS</b>	<b>88</b>
5.1	Abstract	88
5.2	Introduction	89
5.3	Data and methods	91
5.3.1	Data	91
5.3.2	Methods	93
5.4	Results and discussion	97
5.4.1	MSL hindcast (1871-2008)	97
5.4.2	Model validation	102
5.4.3	Simulating the atmospheric contribution to MSL with AOGCMs for the control period (1961-1990)	104
5.4.4	Simulating the atmospheric contribution to MSL with AOGCMs for the 21 <sup>st</sup> century	105
5.5	Conclusions	112
<b>6</b>	<b>NORTH SEA STORMINESS FROM A NOVEL STORM SURGE RECORD SINCE AD 1843</b>	<b>115</b>

---

6.1	Abstract	115
6.2	Introduction	115
6.3	Data and methods	117
6.4	Results	124
6.4.1	Storm surge trends and variability	124
6.4.2	Differences between observations and reanalysis data	127
6.5	Discussion and conclusions	131
<b>7</b>	<b>SUMMARY AND CONCLUSIONS</b>	<b>133</b>
<b>8</b>	<b>RECOMMENDATIONS FOR FURTHER RESEARCH</b>	<b>140</b>
<b>9</b>	<b>APPENDIX</b>	<b>162</b>
