Brief Contents

| | |
|--|-----|
| 1. Introduction | 3 |
| 1.1. Architecture & Human-Computer Interaction..... | 7 |
| 1.2. Goal & Structure..... | 8 |
| 2. Smart Environments | 13 |
| 2.1. Research and Technology Paradigms..... | 13 |
| 2.2. Commercial Products..... | 23 |
| 2.3. User Interfaces for Smart Environments..... | 26 |
| 3. Making Bits Inhabitable | 45 |
| 3.1. The Future Care Lab..... | 46 |
| 3.2. Applications..... | 49 |
| 4. Controlling Inhabitable Bits with UbiGui | 73 |
| 4.1. Design Challenges..... | 73 |
| 4.2. Hardware Infrastructure..... | 75 |
| 4.3. Software Design..... | 78 |
| 4.4. Interaction Techniques..... | 88 |
| 4.5. Input Devices..... | 93 |
| 4.6. Hand Gesture Interfaces for Microinteractions..... | 111 |
| 4.7. Adapting towards Input Devices..... | 117 |
| 4.8. Comparison of Linear and Circular Menus..... | 137 |
| 4.9. Controlling Content on Multiple Displays..... | 150 |
| 5. Summary & Conclusion | 155 |
| 5.1. Summary..... | 155 |
| 5.2. Conclusion..... | 159 |
| 5.3. Future Work..... | 161 |
| A. Index | 165 |
| B. List of Figures | 171 |
| C. References | 175 |
| D. Appendix | 187 |
